EXPERIENCE

ONE FEDERAL SOLUTION – Fullerton, California

Business Development Associate

Mar 2025 – Apr 2026

- Bridged gap between IT and stakeholders by translating complex business needs into 50+ detailed functional requirements and technical workflows.
- Facilitated comprehensive User Acceptance Testing (UAT) for 5 major product releases, ensuring 100% alignment with initial business objectives.
- Managed end-to-end lifecycle of high-priority FinTech projects, delivering complex system integrations 2 weeks ahead of the scheduled milestones.
- Lead cross-functional teams in refining product roadmaps, aligning technical delivery with corporate strategy while mentoring junior BA staff.

eClerx – Mumbai, India

Senior Data Analyst,

Feb 2022 – Aug 2023

- Leveraged **Python-based web scraping and data engineering techniques** to collect, clean, and structure large-scale datasets from diverse websites, ensuring accuracy and reliability of client deliverables.
- Developed **standalone automated scripts** to bypass bot detection mechanisms, significantly improving data extraction efficiency and reducing manual intervention.
- Partnered with **Adidas on a key analytics project**, transforming raw data into actionable insights that supported strategic, data-driven business decisions.
- Acted as the **primary point of contact with clients**, gathering requirements, presenting insights, and aligning deliverables with evolving business needs to maximize impact.
- Designed and implemented **data pipelines and reporting frameworks**, enabling seamless delivery of business insights and improving decision-making efficiency for stakeholders.

EDUCATION

WAYNE STATE UNIVERSITY – Detroit, Michigan

Dec 2024

Master of Science, Computer Science; Cumulative GPA: 3.66/4.0

Relevant Courses: Parallel Computing, Cyber Security Practice, Introduction to Computer Vision, Distributed Systems, Principles of Cybersecurity, Theory of Languages and Automata, Artificial Intelligence, Data Communication and Computer Networks, Digital Image Processing and Analysis, Network Distributed and Concurrent Programming.

UNIVERSITY OF MUMBAI – Mumbai, India

Jun 2021

Bachelor of Engineering in Information Technology; Cumulative GPA: 3.2/4.0

COMPANY PROJECTS

Vendor Evaluation Intelligence Tool

- Lead development of AI-driven source selection tools to automate federal past performance evaluation, reducing manual review time for SOW data.
- Directed deep research to refine AI logic, ensuring 100% accuracy in distinguishing project compliance from critical performance discriminators.
- Managed project lifecycles and stakeholder syncs to align tool features with federal market requirements, ensuring seamless product delivery.

TECHNICAL SKILLS

Languages: Python, C++, R, C#, MySQL, JavaScript, TypeScript, Next.js.

Frameworks/Libraries: Django, Pandas, NumPy, Selenium, Scrapy.

Cloud & Database: MySQL, SSMS, PostgreSQL, Oracle, Azure, AWS, Snowflake, GCP BigQuery.

Data Skills: Data Visualization, Data Analysis, Advanced Scripting, Data Pipeline Development, Tableau.

Excel & Microsoft Tools: Advanced Excel (Pivot Tables, VLOOKUP, Macros), Microsoft SQL, Power BI.

AI/ML Tools: PyTorch, FAISS, BM25, LangChain.
