PROFESSIONAL SUMMARY

Data Analyst with over 3 years of experience leveraging SQL, Python, and data visualization tools to deliver impactful business insights. Improved patient outcomes by 20% through Power BI dashboards and reduced query execution time by 30% using advanced SQL optimization. Skilled in automating reporting workflows with Excel VBA, aligning analytics with strategic goals, and partnering across teams to optimize resource allocation and operational efficiency.

TECHNICAL SKILLS

Data Analysis:	SQL (MySQL, SQL Server), Python (Pandas, NumPy, Scikit-Learn), Excel (VBA, Pivot Tables, Advanced Formulas).
Data Visualization:	Tableau, Power BI, Looker, Alteryx, Matplotlib, MATLAB.
Technical Expertise:	Machine Learning, A/B Testing, Statistical Analysis, ETL, Data Cleaning, Data Transformation, Reporting Automation, Ad-hoc Analysis.
Project Management:	Agile Methodology, Scrum, Stakeholder Communication, Cross-Functional Collaboration, Stakeholder Management, Sprint Planning.

PROFESSIONAL EXPERIENCE

HealthFirst Analytics, Boston, MA

July 2024 - Present

Data Analyst

- Transformed 15M+ healthcare records using Python implementing data cleaning workflows that achieved 99% data accuracy.
- Optimized database performance through advanced SQL querying and indexing, reducing query execution time by 30%.
- Engineered interactive Power BI dashboards identifying 3 key improvement areas, resulting in 20% better patient outcomes.
- Streamlined reporting automation with advanced Excel techniques including VBA macros and pivot tables, reducing manual workload by 15% and enhancing productivity across departments.
- Spearheaded Agile methodologies for analytics processes, accelerating deliverable cycles by 20%.
- Advised analytical findings to cross-functional stakeholders, improving decision-making across 3 major projects.
- Orchestrated A/B testing frameworks to evaluate intervention strategies, identifying the most effective approach and contributing to a 15% improvement in treatment adherence.

Apple, Hyderabad, India

December 2020 - July 2022

Associate Data Analyst

- Enhanced Siri's speech recognition accuracy by 30% through algorithm optimization and model refinement.
- Drove benchmarking analyses for Siri interactions, delivering an 18% improvement in customer experience.
- Streamlined reporting processes for audio recording analysis, increasing efficiency by 20%.
- Devised Tableau dashboards with advanced drill-through capabilities, accelerating decision-making by 25%.
- Reduced error rates by 25% through data-driven technical improvements and comprehensive analysis.
- Developed custom Excel tools and automated report templates using VBA, reducing data processing time by 30%.

PROJECTS

Customer Churn Prediction System

- Architected machine learning models using logistic regression and random forests, achieving 85% prediction accuracy.
- Constructed intuitive Tableau dashboards integrating customer behavioral data and predictive churn scores, facilitating targeted interventions that decreased quarterly customer churn by 20%.

Advanced Sales Forecasting Solution

- Built end-to-end Power BI dashboard integrating historical sales data, improving demand forecasting by 30%.
- Deployed 3 time-series forecasting models to enhance revenue projections by 22% and improve inventory management efficiency by 18%.

EDUCATION

Florida Atlantic University, Florida, USA

August 2022 - May 2024

Master of Science in Computer Science

GPA: 3.6/4.0

Relevant Coursework: Data Mining and Machine Learning, Deep Learning, Natural Language Processing, Cloud Computing, Data Mining and Predictive Analysis.

St. Francis College for Women, India

June 2018 - May 2021

Bachelor of Science in Software Engineering

Relevant Coursework: Excel, Database Management Systems, Java, C.
