

Hasena Shaik

Data Analyst

Maple Shade, New Jersey | (856) 359-0645 | Hshaik3590@outlook.com

Summary

- Dynamic Data Analyst with 4+ years of experience in data analysis, data mining, statistical evaluations, A/B experimentation, machine learning models, data visualization, and designing efficient ETL pipelines.
- Proficient in working with both SQL and NoSQL databases, including PostgreSQL, MS SQL Server, MySQL, Oracle, MongoDB, and DynamoDB, with expertise in creating stored procedures, triggers, and advanced queries using joins, sub-queries, and window functions to generate comprehensive reports and actionable insights.
- Skilled in data visualization tools like Tableau, Power BI, and Python visualization libraries (e.g., Matplotlib, Seaborn) to design impactful, interactive dashboards and reports.
- Adept at leveraging Excel functions, including PivotTables, VLOOKUP, and Power Query, to extract, manipulate, and analyze datasets according to business requirements.
- Extensive experience writing Python scripts for the full data science pipeline, from data extraction and preprocessing to exploratory analysis and model deployment, utilizing libraries like Pandas and Scikit-learn.
- Hands-on experience in building and managing ETL workflows using tools like Apache Airflow and AWS Glue, and integrating them with data warehouse platforms such as Snowflake to support large-scale analytics.
- Experienced in using MS Office Suite (Excel, Word, PowerPoint, Visio, and Outlook), Tableau, and Power BI to develop professional presentations and data visualizations tailored to stakeholder needs.

Key Skills

Data Analytics Tools: Power BI, Tableau, RStudio, Microsoft Excel, Jupyter Notebook, SQL Developer, Hadoop, Spark, Apache Kafka, Snowflake, Visual Studio, Google Colab

Programming language: Python, R, HTML, Databricks, SQL, SSRS and SAS

Management Tools: JIRA, Microsoft Office, SharePoint, Confluence, Bitbucket, GitHub, Service Now

Databases: PostgreSQL, MS SQL Server, MySQL, Oracle, NoSQL, MongoDB, DynamoDB, and RDS

Methodologies: SDLC, Agile, Scrum, and Waterfall

Data Manipulation & Transformation: Data Wrangling, ETL & ELT, Data Cleaning, metadata management

Data Visualization and Reporting: Data Visualization, Dashboards & Reporting

Analytics and Decision-Making: Risk & Decision Analysis, Analytical Skills, Regression Analysis, Classification Modeling, Statistical Inference, Time- Series Analysis, Model Diagnostics

Libraries: Pandas, NumPy, SciPy, TensorFlow, Scikit-Learn, Plotly, Matplotlib, Ggplot, and PySpark

Others: AWS, Azure, GCP, ETL, Glue, Airflow, and DBT

Operating Systems: Windows, Mac, and Linux

Professional Experience

McKinsey & Co., USA | DATA ANALYST

Jun 2024 – Present

- Engineered and deployed advanced statistical models and machine learning algorithms using Scikit-learn, TensorFlow, and PySpark, improving predictive analytics accuracy by 20% and enhancing data-driven decision-making processes.
- Planned and optimized ETL workflows leveraging tools such as AWS Glue, Airflow, Informatica Power Center, and DBT, resulting in a 30% improvement in data integration efficiency across multiple platforms.
- Monitored, maintained, and fine-tuned data pipelines, increasing data extraction, transformation, and loading performance by 25%, supporting large-scale analytics with AWS S3 and Redshift tools.
- Implemented scalable and cost-effective data warehousing solutions in Snowflake, reducing query response times by 40% and enabling efficient management of datasets exceeding 10TB.
- Developed advanced SQL Server databases by creating custom stored procedures and user-defined functions, automating recurring reporting tasks, and saving 15 hours of manual effort weekly.
- Built dynamic and interactive Tableau dashboards to visualize key business metrics by integrating diverse data sources, including AWS S3, RDS, Redshift, MS Excel, JSON, and XML, increasing report accessibility by 35%.
- Created and maintained over 25 actionable dashboards and reports using Tableau and Power BI, empowering stakeholders with real-time insights that improved decision-making processes by 20%.
- Authored optimized SQL scripts for Snowflake and Teradata, alongside developing Python-based process automation workflows to streamline file transfers, reducing errors by 30%.

- Analyzed A/B testing outcomes using R, identifying optimal strategies that increased email engagement rates by 25% for specific content types.
- Created detailed source-to-target data mappings and utilized Excel pivot tables, improving reporting workflows and achieving a 25% gain in efficiency.
- Collaborated with ETL teams to define requirements, generate new data files, and successfully integrate over 15 datasets into the enterprise data warehouse.

Avenir Technology, India | DATA ANALYST

Aug 2019 – Dec 2022

- Designed and executed interactive dashboards using Power BI and Tableau, enhancing real-time data visualization and decision-making efficiency by 35%, enabling stakeholders to analyze key performance metrics effectively.
- Developed and optimized over 50 complex SQL queries in PostgreSQL, MS SQL Server, and Oracle, reducing query execution time by 40% and improving data retrieval for analytical reporting on large datasets.
- Conducted regression analysis and classification modeling using Python (Pandas, NumPy, SciPy, Scikit-Learn) and R, analyzing data points to identify business trends and improve predictive accuracy by 30%.
- Utilized Apache Kafka and Spark Streaming for real-time data ingestion, processing 1.5 million records per hour, ensuring accurate and timely data availability for analytics and reporting.
- Automated ETL workflows using SSIS, Airflow, and AWS Glue, reducing manual data transformation efforts by 60%, and significantly enhancing reporting speed and operational efficiency.
- Performed extensive data wrangling and cleaning in Jupyter Notebook, improving data accuracy by 25%, and ensuring high-quality inputs for analytical modeling and business intelligence reporting.
- Integrated Snowflake and Google BigQuery into the analytics pipeline, improving query performance by 50% and ensuring efficient cloud-based data storage, retrieval, and analysis at scale.
- Collaborated with cross-functional teams using JIRA, Confluence, and Bitbucket, improving project execution efficiency by 30%, and ensuring seamless integration of analytics solutions into business operations.

Education

Master's in Information Technology - Project Management | St Francis College, New York

Bachelor in Mechanical Engineering | Vasireddy Venkatadri Institute of Technology (VVIT), India
