Chicago, Illinois | +1 (312)-818-8272 | ahema0506@gmail.com

PROFILE

Experienced Data Analyst with over 3 years of progressive expertise in data analysis, statistical modeling, and business intelligence across industries in India and the United States. Proficient in Python, SQL, R, and modern cloud platforms such as AWS and Azure. Skilled in leveraging data visualization tools, machine learning models, and ETL frameworks to uncover actionable insights and improve operational efficiency. Strong ability to collaborate across teams, automate pipelines, and drive data-driven strategies in Agile environments.

TECHNICAL SKILLS

- Programming Languages:** Python, R, SQL, JavaScript, HTML, CSS.
- Data Visualization:** Looker, Tableau, Power BI, Matplotlib.
- Database Management:** MySQL, MongoDB, Snowflake, Teradata.
- Data Analytics & Big Data Tools:** Pandas, PySpark, Apache Spark, **Advanced Excel (Pivot Tables, VLOOKUP, Formulas, Data Cleaning, Data Validation)**, Hadoop, Jupyter Notebook, Git, Google Analytics, Marketing & Web Analytics, Statistical Modeling, Statistical Analysis, Clustering, Seaborn.
- Libraries & Frameworks:** TensorFlow, Keras, Scikit-learn, Flask, Streamlit ,OpenCV
- ETL Tools:** Azure Data Factory, Azure Databricks, AWS Glue, Talend, DBT.
- Cloud Services:** AWS.

PROFESSIONAL EXPERIENCE

Wells Fargo – USA | Data Analyst

Jan 2024 – Present

- Built advanced dashboards using Tableau and Power BI to monitor KPIs and optimize reporting workflows across financial operations.
- Developed Python-based ETL scripts using PySpark and AWS Glue to automate data ingestion, reducing manual reporting time by 40%.
- Supported fraud detection and credit risk analysis through predictive modeling using Scikit-learn and statistical techniques.
- Led cloud migration initiatives for analytics dashboards, improving performance and access scalability across teams.
- Collaborated with cross-functional stakeholders to translate business questions into data-driven insights and recommendations.

IBM India – Bengaluru, India | Data Analyst

June 2021 – Nov 2022

- Analyzed large enterprise datasets to uncover trends and drive actionable insights in consulting projects.
- Designed predictive models to improve marketing and operational outcomes using Python (Pandas, Scikit-learn).
- Developed and maintained ETL workflows using Azure Data Factory and AWS Glue.
- Delivered stakeholder presentations with dynamic dashboards using Tableau, Looker, and Power BI.
- Participated in Agile sprints with engineering and data teams to deliver timely and scalable data solutions.

PROJECTS

Health Insurance Claims Analysis:

- Analyzed health insurance claims data to identify patterns and potential fraud, enhancing efficiency and reducing losses.
- Integrated diverse data sources, including claim amounts and patient demographics, to create a comprehensive dataset.
- Cleaned and standardized data to ensure integrity and accuracy.
- Conducted exploratory data analysis (EDA) to reveal trends in claims and diagnoses.
- Developed statistical models for fraud detection using anomaly detection techniques.
- Created interactive Tableau dashboards to present insights and support data-driven decision-making.
- Tools & Technologies:** Python, Pandas, SQL, Matplotlib, Seaborn, Scikit-learn, Tableau.

House Prices Prediction Using Linear Regression:

- Developed a linear regression model to predict housing prices based on location, room count, and demographics.
- Preprocessed data from the Kaggle housing dataset, addressing missing values and encoding categorical variables.
- Conducted exploratory data analysis (EDA) to visualize key relationships and influences on housing prices.
- Engineered features to improve model accuracy, including transformations and interaction terms.
- Evaluated model performance with cross-validation and optimized for accuracy through feature refinement.
- Compiled a comprehensive report with findings and visualizations for stakeholder communication.
- Tools & Technologies:** Python, Pandas, NumPy, Matplotlib, Jupyter Notebook, Git/GitHub.

EDUCATION

Master’s in Computer Science - Chicago State University

CERTIFICATIONS

AWS Academy Graduate – Machine Learning
