PROFESSIONAL SUMMARY

Results-driven Google Data Analytics Professional Certified **Data Analyst** with **8+ years** of Business Analysis experience in data interpretation, statistical analysis, and business intelligence. Proven expertise in **SQL, Python, and BigQuery** with demonstrated success in **reducing reporting time by 20%** and **increasing data reliability by 15%**. Specialized in **ETL processing, data visualization, and predictive analytics** using **Tableau and Power BI**. Hands-on experience with **Salesforce CRM (reports, dashboards, workflows, and data management)**, combining analytical insights with CRM data to enhance customer engagement and optimize sales performance. Seeking to leverage advanced analytical skills and automation expertise to drive data-driven decision making and optimize business processes.

CORE COMPETENCIES

Programming & Databases

- **SQL** (Advanced) • **Python** (Pandas, NumPy, Scikit-learn)
- **PostgreSQL** • **MySQL** • **BigQuery**
- **GCP** • **R Programming**
- **Data Quality** • **ETL Processing**

Technical Tools

- **Jupyter Notebooks** • **Google Sheets**
- **Business Intelligence (BI)** • **KPI Development**
- **Data Cleaning** • **Process Automation**
- **Salesforce** (Reports, Dashboards, Objects, Data Management)

Analytics & Visualization

- **Tableau** (Advanced) • **Power BI**
- **Microsoft Excel** (Advanced) • **Statistical Analysis**
- **Data Visualization**

Business & CRM Skills

- **Requirements Analysis** • **Stakeholder Management**
- **Cross-functional Collaboration** • **Project Management**
- **Data Governance** • **Performance Optimization**
- **Salesforce CRM** • **Workflow Automation**

PROFESSIONAL EXPERIENCE

Business Analyst

April 2022 - July 2023

Upstream Services, Minneapolis, MN

Client: BestBuy LLC

Technologies: Python, SQL, Tableau, Power BI, BigQuery

Reduced reporting time by 20% through development and maintenance of automated dashboards in **Tableau and Power BI**, serving 10+ stakeholders

Ingested over 25+ datasets data into platform and provided various transformations using **GCP BigQuery** and created **metrics** related to inventory, sales ,etc to identify market trends and optimize business processes

Improved executive decision-making efficiency through collaboration with cross-functional teams to define KPIs and deliver actionable insights for strategic planning

Automated data collection processes using Python and ETL, reducing manual work by **20 hours weekly** and minimizing human error by 30%

Salesforce Sales Dashboard for Retail Inventory using sales & inventory data into a Salesforce Developer Org **using custom objects** and reports showing top-selling products

Business Analyst (Data Analytics & BI)

May 2013 - August 2019

Liberty Oil Mills, Mumbai, India

Technologies: Python, SQL, PostgreSQL, Microsoft Excel, Power BI

Designed and implemented complex SQL queries to extract data from multiple sources, supporting analytics for 3+ business units

Increased marketing ROI by 18% through comprehensive analysis of campaign performance and **customer segmentation** using advanced statistical methods

Enhanced data reliability by 15% by streamlining data validation and error-checking workflows, reducing data quality issues by 40%

Improved stakeholder engagement by 35% through preparation of compelling presentations and visual reports for non-technical audiences

Developed automated **ETL processes** that reduced data processing time from 8 hours to 2 hours daily, improving operational efficiency

EDUCATION

Bachelor of Science in Computer Science

Mumbai University, Mumbai, India

2011

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google Data Analytics Professional - GCP BigQuery, R Programming & Visualization

Microsoft Excel Specialist - Advanced Data Analysis & Visualization

Python for Data Science - Pandas, NumPy, Scikit-learn Specialization

KEY PROJECTS & ACHIEVEMENTS

Marketing Campaign Analytics & Inventory

Liberty Oil Mills

Technologies: Python, SQL, Tableau, Statistical Analysis

Created interactive **Tableau dashboards** for marketing team with drill-down capabilities, tracking campaign performance across 12+ channels

Created optimization algorithm that balanced inventory carrying costs with stockout risks, resulting in **\$0.5M reduction in excess inventory** and 15% improvement in service levels

Automated Reporting System

Upstream Services

Technologies: Python, SQL, Power BI, Excel, BigQuery

Developed end-to-end automated reporting pipeline using **Python scheduling** and SQL/BigQuery, eliminating **30+ hours of manual work weekly** across finance and operations teams

Built dynamic **Power BI executive dashboards** with KPI tracking for revenue, costs, and profitability metrics, serving **across orgs**

Implemented data quality monitoring using Python logging and email alerts, achieving **99.5% data accuracy** and reducing reporting errors by 85%
