SUMMARY

Financial Data Analyst with **4+ years of experience** bridging financial strategy and analytical problem solving to uncover business opportunities within complex datasets. Skilled at transforming fragmented information into actionable intelligence that supports investment evaluation, **revenue optimization**, and operational accountability. Combines quantitative reasoning, **financial domain expertise**, and modern data technologies to drive informed decision making across dynamic enterprise environments.

SKILLS

Corporate Finance & Valuation: FP&A, Financial Statement Analysis, DCF Valuation, Comparable Company Analysis (CCA), Profitability Analysis, Financial Performance Management, Working Capital Analysis

Forecasting & Risk Modeling: Budgeting & Forecasting, Variance Analysis, Sensitivity Modeling, Monte Carlo Simulation, Credit Risk Modeling, Market Risk Measurement, Portfolio Risk Analytics, Stress Testing, Scenario Analysis, Time Series Forecasting

Financial Data Science: Python (Pandas, NumPy, SciPy, Statsmodels), SQL, R, Predictive Analytics, Data Validation

Business Intelligence & Reporting: Power BI, Tableau, KPI Reporting, Executive Dashboards, Ad Hoc Analysis

Market Intelligence Platforms: Bloomberg Terminal, AlphaSense, Earnings Call NLP Analysis, DataSnipper, Datarails

Data Infrastructure & Cloud Analytics: Snowflake, ETL Pipelines, Data Modeling, PostgreSQL, AWS (Redshift, Athena), Azure Synapse Analytics, Google BigQuery

Controls, Compliance & Delivery: Financial Controls, Regulatory Reporting, Data Quality Management, Agile, SDLC

EXPERIENCE

Goldman Sachs, United States

January 2025 – Present

Financial Data Analyst

- Established KPI measurement frameworks through Tableau and Azure Synapse Analytics, consolidating fragmented financial datasets into executive dashboards that **reduced manual reporting efforts by 36%**.
- Developed forecasting and profitability analytics solutions utilizing Snowflake, SQL, and Power BI, **improving forecast modeling accuracy by 27% across \$145M** investment portfolios through sensitivity based financial analysis.
- Designed Monte Carlo simulation and stress testing frameworks using Python, SciPy, and Statsmodels, strengthening market risk assessment capabilities and **reducing portfolio exposure deviations by 18%** across trading operations.
- Integrated Bloomberg Terminal datasets into AWS Redshift and PostgreSQL environments through scalable ETL architecture, **accelerating executive reporting availability by 41%** while improving enterprise data reliability standards.
- Delivered valuation intelligence supporting DCF modeling and comparable company assessments for transactions exceeding \$110M, **enabling investment teams to identify opportunities with 23%** stronger return expectations.
- Applied earnings call NLP analysis and predictive analytics techniques utilizing R and AlphaSense insights, uncovering emerging business performance **indicators that enhanced planning effectiveness by 17%**.

Mphasis, India

September 2020 – July 2023

Financial Data Analyst

- Produced working capital intelligence and variance assessment models leveraging Advanced Excel, SQL, and financial data analytics techniques, **increasing liquidity visibility by 29%** across client financial operations.
- Analyzed financial statements, budget performance, and profitability metrics supporting financial performance management initiatives, uncovering opportunities that **generated \$1.6M** in annual savings and **improved operating efficiency by 14%**.
- Created time series forecasting and scenario analysis models utilizing Python, Pandas, and NumPy, **improving portfolio analytics effectiveness by 22%** while supporting data driven investment evaluations.
- Consolidated operational and financial information into Power BI reporting environments, providing leadership teams with actionable **performance metrics that accelerated review cycles by 31%**.
- Streamlined audit readiness processes through DataSnipper, Datarails, and automated validation controls, **shortening compliance preparation timelines by 34%** while improving reporting traceability and governance oversight.
- Maintained regulatory reporting datasets within Google BigQuery environments by implementing data quality management controls, **reducing reporting inconsistencies by 27%** across enterprise analytics initiatives.

EDUCATION

Masters of Science in Computer Science

September 2023 – May 2025

Pace University

New York, United States

Bachelors in of Technology in Computer Science Engineering

August 2018 – May 2022

Anil Neerukonda Institute of Technology and Sciences

India

PROJECTS

Enterprise Revenue Leakage Analytics Platform

- Developed a transaction intelligence framework utilizing Python, PostgreSQL, and anomaly detection techniques to analyze 3M+ revenue records, identifying billing leakage patterns that **improved revenue recovery opportunities by 31%**.
- Implemented automated reconciliation workflows across Snowflake and AWS Athena environments, **reducing financial exception investigation effort by 38%** while strengthening enterprise revenue assurance and audit transparency.

Customer Lifetime Value & Retention Intelligence Hub

- Engineered a customer profitability measurement solution leveraging R, SQL, and behavioral segmentation analytics to evaluate 750K+ customer relationships, **improving retention targeting effectiveness by 26%** across simulated financial services portfolios.
- Built interactive decision support reporting through Power BI and Azure Synapse Analytics, consolidating customer, operational, and financial performance indicators that **accelerated strategic planning cycles by 34%**.
