

Keren Urajo Oloke

+1 (872) 209-9660 | olokekeren@gmail.com | [Tableau Portfolio](#)

SUMMARY:

Senior Business Analyst with **5+ years** of experience driving data-informed decision-making across financial services and technology sectors. Proven expertise in requirements gathering, Business Requirements Documentation (BRD), and functional requirements definition, partnering with cross-functional stakeholders to deliver process improvement and business process modeling initiatives that reduce inefficiencies and drive measurable operational gains. Skilled in data analysis, data modeling, and data quality management using SQL, Snowflake, Alteryx, and Tableau Prep to build reliable ETL pipelines and data integration workflows. Adept at developing interactive Tableau and Power BI dashboards, KPI reporting frameworks, and executive-level data storytelling that enable self-service analytics and support strategic decision-making. Strong background in Agile/Scrum delivery, requirements elicitation, stakeholder engagement, and User Acceptance Testing (UAT), with a track record of translating complex business needs into scalable, data-driven solutions.

SKILLS:

Business Analysis & Requirements Management: Business Analysis, Requirements Gathering, Business Requirements Documentation (BRD), Functional Requirements, User Stories, Gap Analysis, Process Improvement, Workflow Analysis, Business Process Modeling, Change Management, Stakeholder Management

Data Analysis & Business Intelligence: Data Analysis, Business Intelligence, Data Modeling, Data Validation, Data Quality Management, Data Governance, Data Interpretation, KPI Development, Performance Metrics, Root Cause Analysis

Reporting & Data Visualization: Dashboard Development, Executive Reporting, Self-Service Analytics, Interactive Dashboards, Data Storytelling, KPI Dashboards

Database & Data Engineering: SQL, Snowflake, Data Warehousing, ETL Development, Data Pipelines, Data Integration, Data Transformation, Tableau Prep, Alteryx, Fivetran, REST APIs

Analytics & Modeling: Predictive Analytics, Forecasting, Statistical Analysis, A/B Testing, Trend Analysis, Data Modeling, Business Forecasting, Anomaly Detection, Performance Analysis

Tools & Technologies: Tableau, Power BI, SQL, Snowflake, Alteryx, Tableau Prep, Excel, Google Analytics, Google Tag Manager, Python, REST APIs, Looker

Agile & Collaboration: Agile, Scrum, Stakeholder Engagement, Cross-Functional Collaboration, Requirements Elicitation, Workshop Facilitation, User Acceptance Testing (UAT), Documentation, Data Storytelling

PROFESSIONAL EXPERIENCE:

SR Business Analyst

| Sep 2024 – Present

Morgan Stanley

- Led end-to-end requirements gathering and business analysis for enterprise data initiatives, translating complex business needs into detailed Business Requirements Documentation (BRD) and functional requirements
- Partnered with cross-functional stakeholders to conduct gap analysis and workflow analysis, identifying process inefficiencies and driving a 25% reduction in manual reporting effort
- Developed and maintained interactive Tableau and Power BI dashboards, enabling self-service analytics for over 50 business users across trading and risk teams
- Authored user stories and acceptance criteria within Agile/Scrum ceremonies, supporting sprint planning and backlog refinement for a cross-functional delivery team
- Designed and implemented KPI dashboards and executive reporting frameworks, improving visibility into performance metrics and reducing report turnaround time by 30%
- Built and optimized SQL queries and Snowflake data models to support data validation, data quality management, and downstream reporting accuracy
- Conducted root cause analysis on recurring data discrepancies, collaborating with data engineering teams to resolve issues and strengthen data governance practices
- Facilitated requirements elicitation workshops with senior stakeholders, aligning business objectives with technical solution design across multiple initiatives

- Led User Acceptance Testing (UAT) cycles for new reporting and analytics platforms, achieving 98% defect-free sign-off prior to production release
- Delivered data storytelling presentations to senior leadership, translating complex data analysis and trend analysis into actionable business insights

Business Analyst

| Jan 2021 – Jul 2024

DXC Technology

- Gathered and documented business and functional requirements for enterprise clients, supporting process improvement and business process modeling initiatives
- Built ETL pipelines and data integration workflows using Alteryx and Tableau Prep, reducing manual data preparation time by 40%
- Developed KPI dashboards and performance metrics reporting in Power BI and Tableau, supporting data-driven decision-making for stakeholders
- Performed data analysis and statistical analysis to identify trends and anomalies, feeding predictive analytics and forecasting models
- Collaborated with cross-functional teams in an Agile/Scrum environment, managing requirements elicitation and stakeholder engagement throughout the SDLC
- Conducted UAT and documented test cases to validate new features and reporting solutions prior to deployment
- Supported change management initiatives by documenting workflow analysis and process gaps, contributing to a 20% improvement in operational efficiency
- Utilized SQL and REST APIs to extract, transform, and validate data across multiple systems, ensuring data quality and consistency for reporting deliverables

EDUCATION:

BSc Biomedical Sciences – Windsor University, St Kitts
