

Professional Summary

Results-driven **Data Analyst** with 3.5+ years of experience transforming complex datasets into actionable insights across **healthcare** and **telecom** industries. Proven expertise in **Power BI, Azure Synapse, Python, and SQL** to build scalable dashboards, predictive models, and data pipelines processing **5TB+ daily data**. Adept at driving **data governance, automation, and GenAI-driven analytics** that improve efficiency and decision-making by up to **35%**. Passionate about leveraging **data engineering and AI integration** to optimize performance and deliver measurable business impact in data-driven organizations.

Technical Skills

Data Visualization & Reporting: Power BI (DAX, Power Query, Row-Level Security, Data Modeling), Tableau, Excel (Pivot Tables, Power Pivot), Azure Synapse Analytics

Data Engineering & ETL Tools: Azure Data Factory, Azure Synapse Pipelines, PySpark, SQL Server Integration Services (SSIS), Databricks, Snowflake, Oracle, SQL Server

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R (ggplot2, caret), SQL (T-SQL, PL/SQL), M Query, DAX

Machine Learning & Analytics: Regression, Classification, Random Forest, Gradient Boosting, XGBoost, Forecasting, Anomaly Detection, Predictive Modeling, Statistical Analysis (ANOVA, Hypothesis Testing)

Cloud & Data Platforms: Microsoft Azure (Data Factory, Synapse, Functions, Storage), AWS (S3, Redshift basics), Snowflake, Databricks

Data Warehousing & Database Management: Data Modeling, Data Warehousing Design, Star/Snowflake Schema, Performance Tuning, Query Optimization, Indexing & Partitioning

Automation & Workflow Orchestration: Azure Functions, API Integration, Power BI Gateway Automation, Cron Jobs, Scheduling Pipelines

Version Control & Collaboration: Git, GitHub, Azure DevOps, Jira, Agile/Scrum

Other Tools & Techniques: Excel VBA, REST APIs, Regex for Data Validation, GenAI/LLM Integration in BI (Forecasting, Anomaly Detection), Data Governance & HIPAA Compliance

Professional Experience

Data Analyst | Databricks, USA | Jul 2024 – Present

- Designed, developed, and maintained **20+ Power BI dashboards** for healthcare claims, provider performance, and member engagement — supporting **250+ stakeholders** and improving decision-making efficiency by **35%**.
- Built and optimized **ETL/ELT pipelines in Azure Synapse Analytics** and **Azure Data Factory**, automating API integrations and processing **5+ TB daily data** from SQL Server, Oracle, and Snowflake sources, reducing latency by **30%**.
- Architected a **centralized data warehouse** integrating claims, enrollment, and care management data, reducing manual reconciliation by **40%** and enabling **real-time analytics**.
- Engineered **predictive models** (regression, random forest, gradient boosting) using **Python/R** on **5M+ patient records** to forecast utilization trends, readmission rates, and care costs with **90% accuracy**.
- Implemented **Power BI Row-Level Security (RLS)** and dynamic access controls for **300+ users**, ensuring **100% HIPAA compliance** and audit readiness.
- Automated Power BI data refresh workflows via **gateways, M Query, and Azure Functions**, achieving **99% reliability** and reducing manual maintenance by **80%**.
- Embedded **GenAI/ML capabilities** (forecasting and anomaly detection) into Power BI dashboards, enabling predictive insights and reducing reporting turnaround time by **25%**.
- Acted as **Power BI and DAX SME**, mentoring **12 analysts** and advising governance teams on experimental design and KPI frameworks, improving analytical accuracy by **20%**.
- Collaborated with business analysts, clinicians, and compliance officers to translate healthcare requirements into accessible Power BI prototypes, delivering **30+ reports** that enhanced executive visibility.
- Analyzed **10M+ healthcare data records** (claims, EHR, provider data) using **ANOVA, regression, and predictive analytics**, improving population health planning accuracy by **15%**.

Data Analyst | Sigma InfoTech, India | June 2021 – April 2023

- Developed **PySpark pipelines** to process **100M+ daily device usage records** from telecom markets, enabling real-time analytics and reducing manual workload by **40%**.
- Built **SQL-based user segmentation models** for targeted marketing, improving campaign ROI by **20%**.
- Deployed **XGBoost-powered fraud detection models**, improving detection accuracy by **30%** and reducing false positives for risk management.
- Created **Power BI pricing dashboards** to identify seasonal revenue leakage, boosting Q4 promotional sales by **15%**.
- Performed **Python-based sentiment analysis** (NLTK, TextBlob) on customer feedback to guide UX improvements for digital products.
- Optimized high-impact **SQL queries** using indexing and partitioning, cutting dashboard refresh time by **40%** and maintaining SLA compliance.
- Led a **data quality improvement initiative**, implementing regex-based validation within ETL workflows to achieve **99.5% accuracy** in regulatory reports.

Educations

Master of Science in Computer Science | Rowan University, Glassboro, New Jersey, USA | Sep 2023 – May 2025

Bachelor of Engineering in Electronics and Communication Engineering (ECE) | Bharath University, Chennai, India | May 2018 – May 2022

Certifications

- Google Business Intelligence Professional Certificate
- Microsoft Certified: Power BI Data Analyst Associate
