

Kiran Sivakumar

Email: kiranshivadatanalyst@gmail.com | **Phone:** (408) 391-8508 | **Location:** Austin, TX, United States

Objective

Process-oriented and enthusiastic Data Analyst with around 8 years of experience in Banking and Healthcare. Skilled in utilizing programming and statistical expertise to analyse and interpret data, enabling business solutions through tools like Tableau, Power BI, SQL, R, and Alteryx. Proficient in data analytics, business analysis, data governance, ETL, and cloud platforms. Committed to optimizing decision-making and delivering impactful, data-driven insights.

Summary

- Data Analyst with deep expertise in Business Intelligence, Data Warehousing, Data Modeling, Master Data Management (MDM), Data Governance, and Data Visualization.
- Strong experience in Data Profiling, Data Migration, Data Quality, and Data Integration.
- Skilled in eliciting requirements and translating them into BRD, FRD, SRS/TRD, User Stories, and Use-case Specifications.
- Expertise in end-to-end ETL pipelines using **Azure Data Factory (ADF)**, **Databricks**, and **Delta Live Tables (DLT)** with **Medallion Architecture** (Bronze/Silver/Gold layers).
- Hands-on experience with **Google Cloud Platform (GCP)** : BigQuery, Cloud DataProc, Cloud Storage, Cloud Composer, Airflow, Cloud Dataflow, Pub/Sub.
- Experienced in migrating legacy ETL to **Azure Databricks** with **Azure Synapse**, optimizing Spark jobs and **managing Databricks clusters** for cost & performance.

- Proficient in **paginated reports** using **Power BI Report Builder** and operational reporting.
 - Used **Microsoft Purview** for data cataloguing, lineage, access control, and compliance.
 - Delivered end-to-end Source-To-Target Mapping with transformation rules and reconciliation.
 - Applied **ANOVA**, hypothesis testing, and statistical analysis to business KPIs.
 - Experience with **SAP Data Lineage**, **MongoDB** (NoSQL), and **Python** for scalable applications.
 - Proficient in **Power BI** (Power Query, Power Pivot, Power View, Power Maps) and **Tableau**.
 - Strong SDLC knowledge including Agile (CSM/CSPO), SAFe, Waterfall, and Jira/Azure DevOps.
-

Technical Skills

Category	Technologies
Data Analysis & Modeling	Power Designer, SQL, R, Informatica, ANOVA, Hypothesis Testing
Database Management	Oracle SQL, MySQL, MS SQL Server, Teradata, Snowflake, Hadoop (Hive, PIG), MongoDB
Data Visualization & Reporting	Tableau, Power BI (including Power BI Report Builder), Paginated Reports , ETL Macros
Cloud Platforms	AWS, Google Cloud (GCP), Azure
ETL & Data Pipeline	Azure Data Factory, Azure Databricks (Delta Live Tables , Cluster Management), Medallion Architecture , Synapse, SSIS, Alteryx, Talend
Data Governance & MDM	Collibra, Informatica MDM, Microsoft Purview, Alation, SAP Data Catalogs

Category	Technologies
Process Modeling	BPMN, UML, Visio, Miro, Lucidchart, Value Stream Mapping
Collaboration & Project Tools	Jira, Confluence, Azure DevOps, MS Project, GitHub
GenAI & Automation	Prompt engineering, LLM integration for project tasks, automated documenta
Technical Stack	REST/SOAP, XML/JSON, SQL (Oracle, SQL Server), Postman, SFTP

Certifications

Certification	Issuing Body
PMP (Project Management Professional)	PMI
CSM (Certified ScrumMaster)	Scrum Alliance
CSPO (Certified Scrum Product Owner)	Scrum Alliance
Six Sigma Black Belt	ASQ / Industry
ITIL Foundation	AXELOS
Microsoft Certified: Power BI Data Analyst Associate	Microsoft
Databricks Certified Data Analyst Associate	Databricks (if applicable)

(Note: Add only certifications you actually hold.)

Professional Experience

Client: PNC Bank | Dallas, TX | Jul 2025 – Present

Senior Data Analyst

- Gathered requirements and managed delivery in an Agile (CSM/CSPO) environment using Jira & Confluence.
- Performed data profiling, root cause analysis, and data validation across Oracle, Teradata, and Snowflake.
- Built **paginated reports** using **Power BI Report Builder** for operational printing and regulatory submissions.
- Managed metadata and business glossary in **Collibra**; enforced data governance and MDM best practices.
- Developed and optimized PL/SQL packages for ETL and data quality.
- Created interactive **Power BI dashboards** (Power Query, Power Pivot) and published to Power BI service.
- Used Alteryx for data cleansing, filtering, and formula-based transformations.
- **Environments:** Collibra, Informatica MDM, Oracle, Teradata, Snowflake, Alteryx, Tableau, Power BI, Jira.

Client: General Motors | Austin, TX | Mar 2023 – Jun 2025

Senior Data Analyst

- Led data mapping, transformation rules, and source-to-target documentation.
- Implemented **Medallion Architecture** (Bronze/Silver/Gold) in **Azure Databricks** using **Delta Live Tables (DLT)** for automated pipeline orchestration and data quality.
- Managed **Databricks clusters** (rightsizing, auto-scaling, monitoring, Spark tuning) to reduce compute costs.
- Designed GCP data pipelines with BigQuery, Cloud Dataflow, and Cloud Storage.
- Applied ANOVA and cohort analysis to customer credit and risk data.
- Developed SAS datasets for BI tools (Power BI/Tableau) and integrated credit scoring outputs.
- Built star and snowflake schemas in Snowflake; optimized Power Query with query folding.
- **Environments:** Azure Databricks, DLT, Synapse, GCP (BigQuery, Dataflow), SAS, Power BI, Tableau, Snowflake, Erwin.

Client: Target | Minneapolis, MN | Jun 2020 – Feb 2023

Business Analyst

- Built end-to-end ETL pipelines with **Azure Data Factory (ADF)** and **Azure Databricks**.
- Implemented **Medallion Architecture** for data lakehouse; used **Delta Live Tables** to automate ingestion and transformation.
- Managed Databricks clusters (Spark config, job clusters, pool management) for performance and cost.
- Used **Power BI Report Builder** to deliver paginated operational reports to business stakeholders.
- Deployed proof-of-concept on AWS S3 and Snowflake; set up CI/CD pipelines for microservices.
- Integrated Azure Purview for metadata management and automated data scans.
- **Environments:** Azure (ADF, Databricks, Synapse, Purview, Data Lake), AWS (S3, App Services), Snowflake, Power BI.

Client: USAA | Plano, TX | Jun 2018 – Apr 2020

Business Analyst

- Performed data modeling, mapping, and definition documentation (Oracle ↔ SQL Server).
- Built advanced Excel dashboards (VLOOKUP, XLOOKUP, Macros, Pivot Charts, Power View).
- Designed source-to-target mapping for healthcare claims and member data.
- Applied ANOVA to compare provider performance and length of stay.
- Used Talend and Informatica for ETL; created **paginated reports** in SSRS/Power BI Report Builder.
- Developed star and snowflake schemas for data warehousing.
- **Environments:** Oracle, SQL Server, Talend, Informatica, Power BI Report Builder, SSRS, Excel.

Education

Degree	Institution	Year
MBA – Executive IT Leadership & Data Analytics	Florida International University	Aug 2025
B.S. Software Engineering	University of Texas at Dallas	May 2021
A.S. Computer Science	Collin Community College	May 2019
