PROFESSIONAL SUMMARY

Data Analyst with **3 years of experience** delivering data analytics, predictive modeling, and AI-driven reporting solutions across operational and machine learning environments. Proficient in **SQL, Python, Power BI, Tableau, Scikit-learn, PyTorch, LangChain, Apache Airflow**, and **AWS SageMaker** for building analytics workflows, developing ML pipelines, and deploying data products. Specialized in **Data Validation, ETL Development, Statistical Analysis, Dashboard Reporting**, and **Retrieval-Augmented Generation (RAG)** applications, enabling data-informed decisions and scalable AI solutions through cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Molina Healthcare

Data Analyst - AI/ML | USA

Mar 2026 - Present

- Spearheaded the prevention of **85** clinical readmissions by isolating **1,200** high-risk **Medicaid** and **Medicare** members via predictive models built with **Python** and **scikit-learn** using **analytical reasoning**.
- Automated a savings of **35** hours of manual work monthly by building serverless ETL pipelines using **AWS Lambda** and **Amazon S3** to ingest metrics through **technical translation**.
- Accelerated the processing of **4,500** health charts weekly for **HEDIS** and **CMS Star Ratings** by optimizing NLP models via **PyTorch** and **Hugging Face** using **collaborative alignment**.
- Orchestrated cross-department workflow unifications by deploying production **Agentic Workflows** and **RAG Patterns** within **AWS SageMaker** into **Excel dashboards** for **3** cross-functional executive stakeholders.
- Engineered a reduction of **15** duplicate reporting hours weekly by writing data extraction layers via **SQL** and **Pandas** to populate healthcare metrics through clear team **communication**.
- Operationalized lifecycle validation frameworks for **2** analyst-led pilot models by establishing structured MLOps governance via **MLflow** and **PowerBI** to audit **Payment Integrity** inside **QNXT** systems.

Dell Technologies

Data Analyst | IND

Jul 2021 - Dec 2023

- Prepared automated reporting workflows using **Python, Pandas**, and **VBA macros**, consolidating data from **5 operational systems** and reducing manual report preparation efforts by **8 hours per month** across finance and operations teams.
- Integrated curated reporting datasets using **Azure Data Factory** and **Azure SQL Database**, processing **450K+ records** from **4 source systems** and enabling sales, inventory, and order performance reporting across **5 business cycles**.
- Analyzed reporting datasets containing **850K+ sales and inventory records** using **SQL joins, CTEs**, and **aggregations**, identifying demand and fulfillment trends that supported **12 monthly** business review meetings and planning activities.
- Validated reporting datasets using **SQL data validation, data profiling**, and **Excel reconciliation**, resolving discrepancies across **300K+ records** and supporting the delivery of **15 recurring** operational and management reports.
- Designed **10 interactive dashboards** using **Tableau** and **calculated fields**, enabling business teams to monitor **40+** sales, inventory, and operational performance metrics across product, supply chain, and customer support functions.
- Generated recurring business reports using **Alteryx** and **Excel Power Query**, reducing report turnaround time from **1 business day** to **3 hours** and collaborating **8 business stakeholders** with weekly and monthly reporting requirements.

TECHNICAL SKILLS

- **Programming & Query Languages:** SQL, Python, PySpark, R, Scala, Shell Scripting
- **Data Analytics & Visualization:** Power BI, Tableau, Excel (Power Query, Pivot Tables), DAX, Plotly, Matplotlib, Seaborn, Dashboard Development, KPI Reporting, Data Storytelling
- **Statistical & Analytical Techniques:** Exploratory Data Analysis (EDA), Hypothesis Testing, A/B Testing, Predictive Analytics, Time Series Forecasting, Cohort Analysis, Root Cause Analysis, Feature Engineering
- **Machine Learning & AI:** Scikit-learn, TensorFlow, PyTorch, XGBoost, Supervised Learning, Unsupervised Learning, Deep Learning, Natural Language Processing (NLP), Recommendation Systems, Model Evaluation
- **Generative AI & LLM Engineering:** OpenAI APIs, LangChain, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering, AI Agents, Embedding Models, Semantic Search, LLM Evaluation
- **Healthcare Analytics & Interoperability:** Healthcare Data Analytics, Population Health Analytics, CQMs, Value-Based Care Analytics, Claims Analytics, EHR, EMR, Healthcare Data Integration, HL7, FHIR, ICD-10, CPT, Healthcare KPI Reporting
- **Data Engineering & Storage:** Apache Spark, Databricks, Apache Airflow, dbt, ETL/ELT Development, Data Modeling, Data Quality Management, Snowflake, PostgreSQL, SQL Server, MongoDB
- **Cloud & MLOps:** AWS (S3, Glue, SageMaker, Redshift), Azure (Data Factory, Synapse, Azure ML), GCP (BigQuery, Vertex AI), MLflow, Docker, Kubernetes, FastAPI, REST APIs, CI/CD Pipelines, Model Monitoring
- **Collaboration & Governance:** Git, GitHub, JIRA, Confluence, Agile (Scrum), SDLC, Data Governance, Data Lineage, Metadata Management, GDPR, CCPA

PROJECTS

Weather Data Lakehouse Pipeline

- Developed **PySpark** jobs on **Databricks** to process nested weather data, define schemas, and remove duplicate records across **500K+ observations** before loading analytics-ready datasets.
- Created an automated workflow using **Apache Airflow, AWS Lambda, Amazon S3**, and **dbt** that ran about **8,760 times per year** and enforced **20+ data validation checks** during data loading.

Multi-Label Toxic Comment Analytics & Classification System

- Built a **multi-label classification model** using **Scikit-learn** to analyze qualitative sentiment distributions, **which secured publication** for **1 peer-reviewed** student research paper on online content moderation.
- Optimized model performance across **4 distinct behavioral toxicity categories** by executing **text preprocessing, hyperparameter tuning**, and **cross-validation techniques** on raw text datasets to minimize false positives.

EDUCATION

M.S. Data Science - Montclair State University, Montclair, NJ

Jan 2024 - Dec 2025
