DATA SCIENTIST

Data Scientist with a background in mental health (LPC) and a passion for leveraging data to drive evidence-based decision-making. Combines expertise in human behavior with technical proficiency in **machine learning, data visualization, statistical modeling, and software development** to analyze complex datasets, extract actionable insights, and communicate findings effectively.

SKILLS

Python | Pandas | Matplotlib | EDA | Machine Learning | Time Series Analysis | SQL | Jupyter Notebook | NLP | RAG Modeling

TECH PROJECTS

Telecom Customer Churn Prediction | 03/25 | [Github Repo](#)

This capstone project from my Data Science bootcamp showcases skills with managing multiple datasets to aid a telecommunication company in predicting customer churn using **EDA, feature engineering, and machine learning**.

- Combined four datasets to create a unified set for analysis
- Addressed class imbalance using SMOTE and engineered key predictive features
- Developed and tuned **Random Forest, XGBoost, and LightGBM** models, surpassing required benchmarks
- Evaluated model using **ROC-AUC score**, and **Accuracy score**

Used Car Price Prediction | 01/25 | [Github Repo](#)

Built a predictive model for estimating used car prices based on historical data. The aim was to create a quick and accurate model to maximize business efficiency.

- Performed **feature engineering** and data cleaning to enhance regression accuracy
- Implemented **CatBoost, XGBoost, LightGBM, and Decision Tree** models
- Conducted hyperparameter tuning to optimize performance
- Assessed the model effectiveness using **RMSE** metric

EXPERIENCE

Data Science Extern | 07/2025 - Present | TripleTen Bootcamp & Pro-Elections (Remote)

- **Collaborating on a team** to build an end-to-end Retrieval-Augmented Generation (RAG) application enabling Pro Elections to evaluate HOA election documents quickly and accurately.
- **Applying the latest technologies of Generative AI** (GenAI) to improve document Q&A and streamline decision-making.
- **Contributing to system design, data preprocessing, and model integration** over a six-week externship to deliver a production-ready solution.

Licensed Professional Counselor/Practice Owner | 05/17 - Present | Multi-site | Texas and Tennessee

Skills Used: Interpersonal Communication, Critical and Analytical Thinking, Adaptability

- **Founded and manage** a successful counseling practice, optimizing client acquisition, operations, and financial management.
- **Design data-driven treatment plans** using evidence-based therapies, improving client outcomes.
- **Streamline billing, scheduling, and communications**, enhancing operational efficiency and client satisfaction.
- **Ensure full compliance** with state regulations and APA ethical standards.

EDUCATION

TripleTen | Data Science | 07/24 - 03/25

Completed intensive bootcamp training in Python, SQL, and machine learning, applying statistical analysis, EDA, NLP, and computer vision techniques to real-world datasets. Collaborated on group projects, developed models end-to-end, and strengthened skills in Git, Jupyter Notebook, and mathematical foundations for machine learning.

Dallas Theological Seminary | Master of Arts (MA), Clinical Counseling | 08/14 - 12/17

Texas A&M University | Bachelor of Arts (BA), Psychology | 08/05 - 12/08
