INTRODUCTION

I would like to pursue my career in the fields of communicable disease surveillance, health data analytics, and epidemiology to enhance myself as a promising public health professional and researcher in the state of Texas.

EDUCATION

Master of Science in Health, Community and Policy

Graduation - May 2025

Specialization: Health Data Analytics & Population Health

CGPA: 3.94 | University of Texas at San Antonio

Bachelor of Business Administration

Graduation - 2019

Major: Marketing | North South University, Bangladesh

SOFTWARE PROFICIENCY

SPSS, R, R Studio, ArcGIS Online, Minitab, Excel, PowerPoint, Outlook, and Word

WORK EXPERIENCE

Texas Department of State Health Services (DSHS), San Antonio, TX

Jan 2025 - Mar 2025

Communicable Disease & Preparedness Program (Tuberculosis) Intern, PHR 8

- Developed training materials and evaluation survey forms of an introductory TB training program for community health workers.
- Prepared conference presentations on addressing socio-economic barriers in TB patients to improve treatment outcomes.
- Performed digital records retention involving TB patient data management and contact investigations as a part of audit preparation.
- Reviewed training materials on combating antibiotic-resistant bacteria for community health workers.
- Completed several courses on TB (NEDSS), cybersecurity, and confidentiality.

Texas Department of State Health Services (DSHS), Austin, TX

Sep 2024 – Dec 2024

Data and Training Intern, Healthcare Safety Unit

- Developed an antibiogram targeting a set of pathogens and associated infections (2022-2023) for region-4/5 N, TX. The antibiogram highlights the overall antibiotic susceptibility of various organisms, helps to monitor resistance trends and can guide clinicians in selecting antimicrobial therapies. It will be published on the Texas Health Care Safety Network.
- Developed an Infection Prevention and Control (IPC) toolkit for outpatient hemodialysis facilities. This toolkit can provide healthcare workers with accessible, evidence-based guidelines, training tools, and best practices.
- Analyzed and prepared results from the Learning Needs Assessment survey, which gathered standardized information from healthcare professionals (HCPs) about their experiences with infection control training.

- Collaborated with the Healthcare Safety Unit to manage and evaluate Healthcare-Associated Infections (HAIs) related data.
- Supported interdisciplinary collaboration by working closely with the Data & Training Team Leads to streamline infection prevention efforts.

Assistant Teacher, Children's Lighthouse

Jun 2023 - Dec, 2023

Seasonal Team Member, Target, San Antonio, TX

Nov 2022 - Jan 2023

Seasonal Sales Associate, Macy's, San Antonio, TX

Oct 2021 – Feb 2022

Bank Intern, Prime Bank Limited, Bangladesh

Jun 2019 – Aug 2019

ACADEMIC/RESEARCH EXPERIENCE

As Graduate Student:

- Developed a health program planning report on Syphilis in Los Angeles County among Hispanic/Latino men.
- Performed statistical modeling of Cancer mortality by Year, Age, Gender, Race/Ethnicity for Texas, 2018-2021.
- Performed statistical analyses in SPSS and R/R Studio to measure the association among pre-diabetes, blood CRP levels, and education levels on prevalence of coronary heart diseases utilizing demographic datasets from NHANES. Also developed a poster presentation on it. Performed complex sampling, prevalence measure, non-parametric tests, central tendency & variability measure, hypothesis tests (ANOVA, t-test, and chi-square test).
- Programmed in R to measure the statistical association of gender, age, heart rate, HbA1C, CRP and systolic blood pressure with high total cholesterol prevalence. Developed a poster presentation on it.
- Developed a health policy brief on lung cancer associated with tobacco use in the U.S. population.
- Developed a research project on controlling gestational diabetes on newborn mortality.
- Prepared an epidemiological research proposal on the effectiveness of awareness training programs in obesity reduction among middle and high school students in San Antonio, TX.
- Developed a proposal for a community nutrition intervention program to prevent Iron-Deficiency Anemia (IDA) among middle adolescents in high school students of San Antonio.

As Undergraduate Student:

- Conducted a comprehensive analysis on disease causation and prevention at Health Aid Diagnostic and Hospital, Bangladesh. Gained experience in methodologies of epidemiology and their applications in community, business, and industry settings. Learned on protections regarding the use and storage of health-related data.
- Carried out a predictive analysis using the SPSS software on consumer satisfaction and switching intentions in the mobile communication industry in Bangladesh.

EXTRACURRICULAR ACTIVITIES

- Voluntary blood donor at Quantum Foundation, Bangladesh
- Best Captaincy Award in Viqarunnisa Noon School, Bangladesh, 2007
