SUMMARY

QA Automation Engineer | 7+ Years

Experienced in Java, Selenium, TestNG, Cucumber, REST Assured, and Page Object Model for scalable automation frameworks. Hands-on experience with Cursor AI and LLM-based validation, enhancing testing efficiency and accuracy. A collaborative team player in Agile environments, delivering high-quality software. Authorized to work in the U.S. without sponsorship.

TECHNICAL SKILLS

Testing: Functional, Regression, Smoke, Integration, Ad Hoc

Automation & Frameworks: Selenium WebDriver, TestNG, JUnit, Cucumber, REST Assured, Page Object Model, Playwright, API Testing

API & Tools: Postman, Cursor AI, LLM, Playwright MCP Server

DevOps & CI/CD: Git, GitHub, Maven, Jenkins, Allure, AWS

Programming & Databases: Java 17, SQL, Supabase

Collaboration & Platforms: Jira, Confluence, Windows, macOS

WORK EXPERIENCE

Blue Cross Blue Shield – Chicago, IL

April 2024 – Present

QA Automation Engineer (SDET)

- Developed and executed automated UI tests using Selenium WebDriver, Java, JUnit, Maven, and Cucumber BDD.
 - Designed Page Objects following the Page Object Model (POM) pattern for maintainable test automation.
 - Created automation scripts using Java, IntelliJ IDEA, Gherkin, and Cucumber.
 - Led testing efforts for functional, business, smoke, regression, and end-to-end testing.
 - Developed and executed test scenarios, test cases, and reports.
 - Maintained daily Smoke Tests on Jenkins and reported issues.
 - Tracked defects and collaborated with developers using JIRA.
 - Performed API testing with REST Assured and Postman.
 - Implemented AI-driven testing using Cursor AI and LLM-based validation to optimize test coverage and efficiency.
 - Followed Agile Scrum, participating in daily stand-ups and testing sprint deliverables.
- Environment: Agile Scrum, Java, Selenium WebDriver, JUnit, Maven, Cucumber BDD/Gherkin, Jenkins, Jira, IntelliJ IDEA, Postman, Cursor AI, LLM
-

Aisle Rocket – Chicago, IL
April 2022 – 2024

Quality Assurance (QA)

- Created and maintained test data for multiple testing phases using Agile methodology.
- Performed integration, regression, and end-to-end testing.
- Analyzed requirements and collaborated with cross-functional teams.
- Developed automated test flows and provided team training sessions.
- Designed and automated front-end test cases using Selenium WebDriver.
- Defined and implemented a Java-based automation framework.

Encompass Insurance – Chicago, IL
October 2020 – 2022

Quality Assurance (QA)

- Automated front-end test cases using Selenium WebDriver, JUnit, Maven, and Cucumber BDD with Java.
- Followed Page Object Model (POM) for scalable test design.
- Tracked and reported defects using JIRA.
- Performed database testing with SQL and JDBC.

Environment: Agile Scrum, Java, Selenium WebDriver, TestNG, Maven, IntelliJ IDEA, Cucumber BDD, Jira, Git/GitHub, SQL

Groupon – Chicago, IL
September 2018 – 2020

QA Analyst

- Performed functional, regression, smoke, and integration testing for web-based applications.
- Identified, documented, and tracked defects using Jira, and partnered with developers for issue resolution.
- Participated in requirement review and design meetings to provide QA feedback early in the development lifecycle.
- Prepared test summary reports and communicated testing progress to stakeholders before production releases.
