Profile Summary

- Results-driven QA Automation Engineer with around **5** years of experience in designing, developing, and implementing scalable automation frameworks for web, API, cloud-based applications using Playwright, Python, and Selenium in Agile environments.
- Strong expertise in QA Automation, Functional Testing, **Regression Testing, Smoke Testing, Integration** Testing, End-to-End (E2E) Testing, and API Testing, ensuring high-quality software delivery and reduced production defects.
- Hands-on experience in developing robust test automation frameworks using **Python, Playwright, Pytest**, Selenium, and Page Object Model (POM) for cross-browser and cross-platform validation.
- Proficient in API Testing & Automation using **Postman, REST APIs, JSON** validation, REST Assured/Python Requests, and validating microservices architecture for seamless backend integration.
- Experienced in integrating automated test suites with CI/CD pipelines using **Jenkins**, enabling continuous testing and faster release cycles in DevOps environments.
- Hands-on experience with cloud environments, especially **Amazon Web Services (AWS)**, for test execution, environment validation, log monitoring, and cloud-based deployment verification.
- Strong experience in containerization technologies using **Docker** for creating consistent and scalable automation test environments.
- Experience in **Java, C#, JavaScript and Python** programming for Selenium WebDriver.
- Good understanding of AI/GenAI-powered testing methodologies, leveraging AI for test case generation, defect prediction, intelligent test data creation, self-healing automation, and automated script generation to improve testing efficiency.
- Experience working in **Agile/Scrum** methodologies, collaborating with developers, product owners, and DevOps teams to ensure quality deliverables and sprint-based testing execution.
- Proficient in defect tracking, test management, and reporting using Jira, ensuring effective defect lifecycle management and traceability.
- Strong expertise in version control and collaboration tools such as **Git and GitHub** for source code management and automation framework maintenance.
- Knowledge of AWS cloud services, Docker containers, Jenkins pipelines, API automation, and Playwright with Python, enabling efficient implementation of modern QA automation solutions.

Experience

Fiserv

Apr 2024 – Present

QA Automation Tester

- Extensive hands-on experience with test automation tools frameworks including **Selenium WebDriver, TestNG, Appium, Sauce Labs, Postman, Cucumber and Protractor**.
- Designed and Developed Selenium TestNG Framework, using Data Driven Framework, **Page Object Model** and Singleton Architecture
- Wrote and executed automated test case using Selenium Web Driver to automate manual testing solutions.
- Building and scaling Ruby on Rails applications with Agile processes and write clean, modular, and clear Ruby code.
- Developed scalable automation frameworks using Playwright with Python and Pytest for UI automation.
- Conducted cross-platform testing for both iOS and Android applications using Perfecto Mobile, ensuring consistent performance across multiple devices.
- Implemented AWS solutions like Route **53, EC2, S3, IAM, EBS, Elastic Load Balancer (ELB)**, Security Group, Auto Scaling in Cloud Formation JSON templates.
- Experience profiling tool (java) integration in **JMeter** and **Blaze meter** and hands on great flexibility of using tools like Dynatrace, Visual, HP Diagnostics.
- Developed and executed automated test scripts using Azure Pipelines, integrating with various testing frameworks such as Selenium, JUnit, or NUnit.
- Automated angular based web application using Codefest JS and Cypress, Playwright tool.
- Used BDD framework with Cucumber (JAVA) and created Feature Files with scenario and scenario outlines using Gherkin language.
- Generated the Test Defects report and reported it to development team for bug fixing through JIRA.
- Involved in the Complete Integration with Jenkins and GIT.
- Involved in grouping of Test Cases for Smoke Test to ascertain the crucial functions of the application.
- Wrote automated scripts for angular JS application using protractor and Java scripts.

- Involved in all **SDLC** phases using Agile/Scrum methodology.
- Executing the automation scripts created in AWS device farm.
- Performing **API testing (SOAP and REST)** using **Postman**.
- Developed the features, scenarios, and step definitions for BDD (Behavior Driven Development) using Cucumber with Gherkin.

Environment: Selenium WebDriver, Junit, TestNG, GitHub, Ruby, Jenkins, iOS Android, Appium, Cucumber, Oracle, Maven, angular, python, POM, Java Cypress, Playwright, JIRA, REST API, JSON, XPath, HTML, JavaScript, Postman, Soap UI, Karate.

Johnson & Johnson

Sep 2022 – Aug 2023

QA Automation Tester

- Developed and maintained automated test scripts for Regression testing using Selenium WebDriver and Java.
- Worked on the implementation of **BDD framework** using **Cucumber, TestNG and POM** design pattern with Page Factory concepts.
- Wrote and executed automated tests in **Playwright** for a browser-based application.
- Preparing **Test Strategy/Test Cases** based on Business Requirements.
- Drafted Test Plan which included Scope, Testing Objectives, Testing Phases, Test Scenarios, Test Criteria and Test Environment, after a thorough analysis of the business rules.
- Created Automation framework in **Selenium WebDriver** using Behavior driven approach like **Cucumber**.
- Applied Load Testing using JMeter and asynchronous node.js testing using Mocha.js.
- Developed custom Frameworks for UI Automation using **JAVA** and Web driver, and seamlessly integrated them with CI/CD tool Jenkins, deploying them in the **Azure Cloud**.
- Integrated Automation scripts (Selenium WebDriver API) in Continuous Integration tools (**Azure Devops**) for nightly consignment run of the Script. Designed Project plan on Azure Devops.
- Performed extensive Database Testing, by writing SQL scripts to compare the UI results with that in the Database.

Environment: Selenium WebDriver, TestNG, XML, ChroPath, Ruby, Maven, Eclipse, JavaScript, Azure Extent Reports, Azure Devops.

Honeywell

May 2021 – Aug 2022

QA Automation Engineer

- Analyzed the system requirements and developed detailed test plans and test cases and provided the documentation, collaborated with product management teams in an agile environment to develop a comprehensive set of tests for web-based applications.
- Leveraged AI/GenAI tools for automated test case generation and intelligent defect analysis.
- Implemented self-healing automation concepts to reduce script maintenance.
- Developed Playwright automation scripts using Python for UI testing.
- Used AI-powered approaches for test data generation and validation.
- Integrated automation pipelines with **Jenkins and Docker** for continuous testing.
- Performed API testing and cloud validation in AWS environments.
- Experience with Android Unit Testing & used tools like **J-UNIT, Espresso**.
- Designed Automation Test cases using **Selenium WebDriver, Java, TestNG, and Maven**.
- Used JMeter during performance testing of the **Oracle ERP** application for the DAI project.
- Performed REST Web Services testing with **Postman** and Performed Security Testing for Employee login validations.
- Executed end-to-end testing for mobile applications used by operators and employees, ensuring smooth functionality across iOS and Android platforms
- Involved in designing the framework to integrate HP ALM to cucumber using the newly released version of HP ALM rest API.
- Responsible for implementation of Hybrid Test Automation Framework, Page Object Model using, TestNG, **Maven and Java**.
- Using **Jasmine and karma** test runner extensively for unit testing for end-to-end testing.
- Automating the Test Scripts are planned, prepared and upgraded using HP Quality Centre.
- Verified the data in database through SQL statements and executed stored procedures and triggers.

Environment: Selenium WebDriver, SQL, Oracle, Java, Agile, Cucumber, Appium iOS/Android, JMeter, HP ALM Quality Centre, BDD, End to End Testing, AWS, LoadRunner, Jira, Jenkins.

Technical Skills

- **Programming:** Java, Python, JavaScript/TypeScript, SQL, Shell Scripting
- **Automation Frameworks:** Selenium WebDriver, Playwright, Cypress, Appium
- **API Testing:** REST APIs, Postman, Python Requests, JSON, XML
- **Testing Frameworks:** TestNG, JUnit, PyTest, Jest, Cucumber (BDD)
- **DevOps / CI-CD:** Jenkins, GitHub Actions, GitLab CI/CD, Maven, Gradle, Docker, Kubernetes (basic)
- **Cloud:** AWS (S3, Lambda, CloudWatch, API Gateway), Azure DevOps, GCP Basics
- **Performance Testing:** JMeter, k6, Gatling
- **Tools & Platforms:** Git, Bitbucket, Jira, Azure DevOps

Education

California State University – San Bernardino

Master of Science in Computer Science
