

NAING NAING AYE

naingnaingaye86@gmail.com | +1 (626) 6146667 | Los Angeles, CA

PROFILE SUMMARY

Solutions-focused Software Engineer with 12+ years of **Singapore** experience across the semiconductor and IT services sectors. Expertise in **C#, WPF, MVVM, MS SQL and ETL / Data Integration**, and Hardware-Software integration with C++ System. Skilled in full-lifecycle development to deliver a robust business and automation applications.

SKILLS

- **Programming Languages:** C#, C++, VB6, VB.Net and VBA
- **Web Development:** ASP.Net, ASP, JavaScript, HTML, CSS & Ajax
- **Framework:** .Net and WPF (MVVM)
- **Operating System:** Windows 10 & 11
- **Databases:** MSSQL, MS Access, T-SQL
- **Data Integration & ETL:** End-to-end ETL development, (flat files to MSSQL, MS Access RDBMS)
- **Architecture & Methodology:** Software architecture design, Requirements gathering, Continuous Integration, Testing and Debugging
- **Tools & Environment:** Microsoft Visual Studio, Jenkins, Git and Inno Setup
- **Networking and Industrial Protocols:** TCP/IP, Ethernet, RS485 and other serial protocols.
- **Domain Expertise:** Semiconductor Automation, Factory Integration and ERP Systems
- **Deployment:** Hardware and Software Installation, Deployment and Packaging

EXPERIENCES

Software Design Engineer

MIT SEMICONDUCTOR, Singapore (05/2019 - 02/2025)

Responsibilities

- Designed and developed GUI software using C# and WPF (MVVM), creating generic, reusable control libraries to streamline tasks and accelerate development for factory automation systems, including the Wafer Map automation system.
- Integrated critical hardware devices, including Simco Ionizer, Keyence, Futek sensors, and fingerprint devices, into automation systems.
- Engineered a customized communication system for a specific client, providing a tailored solution that replaced the standard SECS/GEM protocol and met specialized requirements.
- Developed data import processes for (.txt, .cfg, and .sql) data into MS Access.
- Managed the full software release cycle, including preparing standard release notes and deploying installers to customers.
- Used C#, C++, MS Access, and TCP/IP for back-end development and database connectivity to ensure robust and scalable application performance.

Software Engineer

Akribis Systems, Singapore (11/2018 – 04/2019)

Responsibilities

- Developed and debugged the GUI for the Automation system using C#.
- Integrated key devices, including Barcode Readers and Balluff RFID Readers, into the Automation system to streamline data capture and automate manufacturing processes.
- Authored and maintained comprehensive user manuals and technical documentation, which improved usability and reduced support inquiries for the Automation system.

Software Engineer

Centiforce Instruments (05/2017 – 09/2018)

Responsibilities

- Designed and implemented the GUI application for the Wire Inspection System using C# and C++, ensuring the user interface met all system requirements.
- Developed and tested key software features, debugging code to align the system with strict functional and performance requirements.
- Authored the technical user manual and system documentation to improve usability and reduce user support inquiries

Programmer

SEG IT Services, Singapore (04/2012 – 04/2017)

Responsibilities

- Customized and integrated technical solutions for clients, including Sage Accpac ERP, Card Timesheet, PO, and Order Entry system to meet specific business requirements.
- Provided technical architecture and design expertise, collaborating with clients to develop solutions that optimized business processes and enhanced system performance.
- Developed and maintained functional specifications for projects, translating complex business needs into clear and actionable technical requirements for the development team.
- Performed ERP data integration for customer data into Sage Accpac using ERP's SDK.
- Served as a technical lead by identifying and resolving technical problems, documenting solutions, and ensuring seamless communication between development and client teams.
- Utilized a diverse technology stack including VB.Net, ASP.Net, ASP, VB 6.0, and Microsoft SQL Server to deliver robust and stable client-server applications.

QUALIFICATION AND CERTIFICATES

- | | |
|--|------|
| ▪ Bachelor of Computer Science, B.C.Sc (University of Computer Studies, Mandalay, Myanmar) | 2007 |
| ▪ Certified Software Engineering (ACE Data Systems, Yangon, Myanmar) | 2010 |
| ▪ MCTS (Microsoft Certified Technology Specialist) | 2012 |
| ▪ MCPD (Microsoft Certified Professional Developer) | 2012 |
| ▪ FMEA (Apply Failure Mode Effect and Analysis) | 2022 |

LANGUAGES

- **English:** Fluent
- **Chinese** (Mandarin): Limited
