

Nikhila Thotakuri

Data Analyst

North Hollywood, CA | (561) 664-6030 | nikhilathotakuri3@gmail.com | LinkedIn

SUMMARY

Data Analyst with almost 4 years of experience leveraging SQL, Power BI, Python, and business intelligence solutions to transform complex healthcare and enterprise data into actionable insights. Experienced in analyzing claims, member enrollment, provider, revenue cycle, financial, operational, and population health data while ensuring compliance with HIPAA, HL7, FHIR, ICD-10, CPT, HCPCS, and EDI X12 standards. Skilled in developing executive dashboards, optimizing ETL pipelines, improving data quality, and delivering KPI-driven reporting using Microsoft Fabric, Snowflake, Azure Data Factory, and Tableau. Proven ability to collaborate with cross-functional stakeholders to automate reporting, improve operational efficiency, and support strategic decision-making. Passionate about leveraging AI-assisted analytics and modern BI technologies to enhance healthcare outcomes and business performance.

TECHNICAL SKILLS

Programming & Analytics: SQL, Python, R, SAS, Advanced Microsoft Excel, VBA, Statistical Analysis, Exploratory Data Analysis (EDA), Predictive Analytics, Forecasting, Data Mining, Data Cleaning, Data Validation

Business Intelligence & Reporting: Power BI, Tableau, Microsoft Fabric, Looker, SSRS, Cognos, Domo, Executive Dashboards, KPI Development, Self-Service BI, Interactive Reporting, Data Storytelling

Cloud & Databases: Snowflake, SQL Server, Oracle, PostgreSQL, MySQL, Amazon Redshift, Google BigQuery, Azure Data Factory (ADF), Data Warehousing, Data Modeling, Dimensional Modeling

Healthcare Analytics: Claims Analytics, Member Enrollment, Provider Analytics, Eligibility Verification, Revenue Cycle Management (RCM), Clinical Reporting, Operational Reporting, Financial Reporting, Population Health Analytics, Utilization Analysis, Healthcare KPIs

Healthcare Standards & Compliance: HIPAA, HL7, FHIR, ICD-10, CPT, HCPCS, EDI X12 (834, 835, 837), Medicare, Medicaid, Commercial Healthcare Data, PHI Data Security

ETL & Data Integration: Azure Data Factory (ADF), Alteryx, SSIS, Informatica, Talend, dbt, ETL Pipelines, Data Transformation, Data Integration, Data Quality Management

AI & Advanced Analytics: Generative AI, AI-Assisted Analytics, Predictive Modeling, Machine Learning Fundamentals, Natural Language Processing (NLP), Prompt Engineering

Methodologies: Requirements Gathering, Business Process Analysis, Root Cause Analysis, Data Governance, Data Stewardship, SDLC, Agile, Scrum

Collaboration Tools: JIRA, Confluence, SharePoint, Visio, Microsoft Office Suite, Power Automate

EXPERIENCE

Data Analyst | Syneos Health

Sep 2025 – Present

- Developed Power BI dashboards analyzing 5M+ healthcare claims, member, provider, and revenue cycle records, reducing reporting turnaround by 40%.
- Queried, transformed, and analyzed healthcare data using SQL, Snowflake, and Microsoft Fabric to deliver clinical, claims, operational, and population health insights for executive reporting.
- Automated recurring reporting workflows using Power BI, Excel VBA, and Power Automate, eliminating 25+ hours of manual reporting each week while improving reporting accuracy by 99%.
- Validated healthcare datasets against HIPAA, HL7, FHIR, ICD-10, CPT, HCPCS, and EDI X12 standards to ensure regulatory compliance and high data quality.
- Optimized complex SQL queries and reusable datasets supporting claims, provider, revenue cycle, and financial analytics, improving dashboard performance and accelerating data retrieval for business users.
- Collaborated with business, clinical, and operations stakeholders to define healthcare KPIs and translate reporting requirements into interactive Power BI dashboards.
- Supported ETL pipelines using Azure Data Factory and dbt by validating source-to-target data mappings, ensuring accurate and reliable healthcare reporting.
- Applied Generative AI and AI-assisted analytics to automate data summarization, accelerate documentation, and improve reporting efficiency for business users.

Data Analyst | Avenir Technologies

Jan 2021 – Dec 2023

- Extracted and analyzed 12M+ enterprise records using SQL Server, Oracle, PostgreSQL, and MySQL, improving data accessibility and reducing report generation time by 35%.
- Developed interactive Power BI and Tableau dashboards tracking operational performance, financial metrics, and executive KPIs, enabling faster data-driven decision-making.

- Designed and maintained ETL workflows using SSIS, Informatica, and Talend to integrate structured and unstructured data from multiple enterprise systems.
- Cleansed, standardized, and validated enterprise datasets, increasing reporting accuracy to 99% and reducing duplicate records across reporting environments.
- Performed statistical analysis, forecasting, and exploratory data analysis (EDA) using Python, R, SAS, and Advanced Excel to identify business trends and support strategic planning.
- Partnered with business analysts and department leaders to translate reporting requirements into scalable BI solutions within Agile development cycles.
- Optimized SQL queries and database structures through indexing and performance tuning, decreasing execution time by 40% across enterprise reports.
- Maintained technical documentation, reporting standards, and data governance artifacts using JIRA and Confluence to improve collaboration and knowledge sharing.

EDUCATION

Master of Science in Information Systems | *Nova Southeastern University*
