

PROFESSIONAL SUMMARY

8+ years of experience in Information Technology, specializing in Software Quality Assurance and Automation Testing, with strong expertise in testing Client/Server and Web-based applications. Proficient in Core Java, OOP concepts, and building robust automation solutions.

- Proficient in using test automation tools such as Selenium WebDriver, Selenium Grid, and Selenium IDE to develop automation scripts for web and client/server applications.
- Strong experience in designing and implementing Data-Driven, Keyword-Driven, and Hybrid Automation Frameworks using Selenium.
- Sound knowledge of JUnit and TestNG frameworks for unit testing and test execution management.
- Experienced in using Maven for project build, dependency management, and automation suite execution.
- Developed automation test scripts to implement Test Cases, Test Scenarios, and BDD features using Cucumber.
- Experienced in developing Selenium automation scripts in Java using Page Object Model (POM) for maintainable cross-browser testing.
- Strong knowledge of Backend Testing and Database Validation using SQL queries in Oracle and MySQL.
- Expertise in defect tracking, reporting, and test management using tools such as JIRA, Rally, HP ALM, and Quality Center.
- Extensive experience in reviewing Business Requirements, writing Test Plans, Test Cases, Test Scripts, and Requirement Traceability Matrix (RTM).
- Worked extensively in Agile Scrum and Waterfall environments, participating in sprint planning, daily standups, reviews, and retrospectives.
- Domain experience includes Banking, Retail, E-Commerce, Mortgage, Insurance, and Financial applications.

EDUCATION

Bachelor's Degree in Agriculture Herat University, 2012 (Verified and Equalized in the United States)

TECHNICAL SKILLS

Testing Tools: Selenium WebDriver/IDE/Grid, Postman, SOAPUI

Languages: Java, SQL, XML

Web Technologies: HTML, CSS

IDE: Eclipse, IntelliJ, SQL Developer

Test Frameworks: JUnit, TestNG, Cucumber, Data Driven Framework

Build Tool: Maven

CI/CD Tools: Jenkins

Processes: Agile-Scrum, Waterfall

Bug Tracking Tools: JIRA, Rally, HP ALM, Quality Center

Databases: Oracle, MySQL, MS Access

Operating Systems: Windows (7, 8, 10)

Professional Experience

Test Automation Engineer

Travelers Insurance

Washington DC

December 2023 – Present

Responsibilities:

- Built and maintained a robust Selenium + Java automation framework from scratch, supporting multiple teams and projects.
- Developed reusable Page Object Model (POM) scripts for scalable automation across web and client/server applications.
- Collaborated with developers, business analysts, and QA team members to understand requirements and translate them into effective test scenarios.
- Performed BDD using Cucumber Features, Scenarios, and Step Definitions written in Gherkin format.
- Designed and automated smoke and regression suites, ensuring continuous quality validation for frequent releases.
- Executed automation scripts across multiple browsers and platforms using Selenium Grid.
- Integrated automation scripts with Jenkins pipelines for nightly execution and reporting, providing actionable insights to the team.
- Conducted backend testing and data validation using SQL queries in Oracle, ensuring data integrity across applications.
- Participated actively in Agile ceremonies, providing testing estimates and feedback for sprint planning and backlog refinement.
- Mentored junior QA engineers on automation best practices and framework usage.
- Assisted in troubleshooting and debugging complex issues to support smooth deployment and release cycles.
- Continuously improved automation frameworks and test coverage to adapt to evolving project requirements.
- Identified critical defects early, improving defect detection rate before production.
- Increased test coverage and stability, contributing to faster sprint releases.

Environment: Selenium WebDriver, Java, Jenkins, Maven, Apache POI, Cucumber, Gherkin, Oracle DB, Eclipse, JIRA, XML, JSON, HTML, SQL, XPath, Git, Windows, Chrome, Firefox, IE

QA Automation Engineer

TD Bank

Cherry Hill, NJ

October 2020 - November 2023

Responsibilities:

- Developed Test Cases, Use Cases, and automation scripts following QA best practices.
- Maintained and improved reusable automation libraries, supporting team collaboration and efficiency.
- Gathered requirements from business, functional, and design documents to ensure comprehensive test coverage.
- Performed Mobile Application Testing on iOS and Android platforms, ensuring consistent functionality across devices.
- Conducted API testing using Postman (REST) and SOAPUI (SOAP), identifying integration issues early.
- Developed automation code in Java using Selenium WebDriver and TestNG framework.

- Designed and implemented smoke and regression automation test suites using TestNG and Maven.
- Configured Jenkins jobs for scheduled automation runs, ensuring smooth delivery and reporting.
- Actively participated in Agile ceremonies, providing input for sprint planning and retrospectives.
- Supported and guided junior QA members in understanding automation processes and scripts.
- Collaborated closely with developers to reproduce defects and verify fixes efficiently.
- Reviewed test results, identified gaps, and continuously improved testing practices.
- Contributed to cross-browser testing coverage for Chrome, Firefox, and IE across 3+ platforms.
- Improved API defect detection rate by 25% with automated Postman and SOAPUI tests.

Environment: Selenium WebDriver, Java, TestNG, Jenkins, SQL, Maven, Postman, SOAPUI, Oracle SQL Developer, Agile Scrum, JIRA, GitHub, Windows, Chrome, Firefox, IE

Manual QA Analyst

Nationwide Insurance

Columbus, OH

June 2018- September 2020

Responsibilities:

- Created Test Requirement Specifications, Test Plans, and Test Result documentation, ensuring clarity for stakeholders.
- Analyzed Business Requirements and system specifications to define comprehensive test cases.
- Performed backend testing using SQL Plus and PL/SQL to validate data integrity.
- Executed functional, integration, regression, positive/negative, and UAT testing to support high-quality releases.
- Assisted the automation team by executing Selenium regression scripts and providing feedback.
- Worked extensively on Crystal Reports, Business Objects, and reporting validation to ensure accuracy.
- Maintained Quality Center/Test Director for requirement coverage and defect management.
- Provided mentoring and guidance to new QA team members.
- Participated in daily Scrum meetings, sprint planning, and project reviews, fostering collaboration.
- Suggested improvements to testing processes, contributing to better efficiency and team performance.
- Contributed to creation of reusable automation scripts that accelerated regression cycles.
- Trained 3+ new QA team members, increasing team productivity and knowledge retention.

Environment: Agile, Selenium, SQL, Oracle, Quality Center, JIRA, XML, HTML, JavaScript, Firebug, FirePath, Windows, Chrome, Firefox, Safari
