SUMMARY

Proactive and results-driven Data Scientist with 2+ years of experience building predictive models and deploying ML solutions in production environments. Proficient in Python, SQL, and cloud platforms (AWS), with hands-on expertise in machine learning (XGBoost, Neural Networks, NLP, ARIMA), data visualization, and statistical analysis. Proven ability to solve complex business problems and drive actionable insights across healthcare, financial, and research domains. Adept in cross-functional collaboration, stakeholder communication, and building data-driven applications.

TECHNICAL SKILLS

- Languages & Frameworks: Python, R, SQL, JavaScript (React), TensorFlow, PyTorch, Keras, Django, REST APIs
- Generative AI & Deep Learning: Diffusion Models (U-Net), CNNs, AI Pipelines, Statistical Modeling
- Data Science & Visualization: Scikit-Learn, Matplotlib, ggplot2, A/B Testing, Tableau, Power BI
- Production & Collaboration: ML Deployment, Experimentation, GitHub Copilot, Agile Workflows
- Cloud Platforms: AWS
- Developer Tools: Git, GitHub Projects

EDUCATION

Master of Science in Data Science Kent, Ohio

Kent State University AUGUST 2023 – MAY 2025

Projects: [University's Academic Projects](#), Deep Learning for Genomic Data, Predictive Modeling with Real-World Datasets

Courses: CS 54201 Artificial Intelligence (TensorFlow, PyTorch, Keras), Statistical Learning, Applied Statistics, Computational Statistics

Bachelor of Engineering – Computer Engineering Mumbai, India

University of Mumbai JULY 2020 – JULY 2023

WORK EXPERIENCE

Kent State University – Kent, Ohio FEB 2025 - PRESENT

Research Assistant – Deep Learning for Genomic Data Analysis

Skills: Python, R, TensorFlow, Keras, Machine Learning, Deep Learning, SQL, Statistical Analysis, Experimentation

- Improved classification accuracy from 24% to 93%+ via CNN and HMM model optimizations.
- Scaled processing pipelines (40k+ sequences), reducing processing time by 30%.
- Deployed experimentation frameworks (A/B testing) to validate model versions.
- Created research-focused visualizations to communicate complex findings to non-technical stakeholders.

Inke(SafeSpace) – Orlando, Florida MAY 2024 – DEC 2024

Software Data Intern

Skills : Python (Django), JavaScript (React, React Native), SQL, RESTful APIs, Data Engineering, Experimentation

- Integrated ML models into Django web apps for real-time anomaly detection, reducing manual monitoring by 40%.
- Built RESTful APIs and optimized SQL ETL pipelines, improving backend performance and reducing latency by 30%.
- Partnered with data science and frontend teams to deploy GenAI features.
- Implemented automated testing, reducing production bugs by 25%.

Jobaaj Learnings – India APR 2023 – AUG 2023

Data Analyst Intern

Skills: Python, SQL, Tableau, Power BI, Excel, AWS

- Developed real-time dashboards (Power BI, Tableau) for business insights.
- Automated validation and reporting scripts using Python and AWS.
- Analyzed and visualized financial data for executive-level presentations

Trainity – India DEC 2022 – MAR 2023

Data Analyst Intern

Skills: Python, SQL, Excel (Advanced)

- Analyzed bank loan data using SQL to improve risk assessment, identifying a 92% repayment rate.
- Drove ad analytics using SQL to optimize TV ad spend (e.g., Maruti Suzuki's peak share at 41%).
- Conducted operational analytics, identifying 20% spikes in user engagement for targeted marketing.

CERTIFICATIONS

GenAI with Diffusion Models | NVIDIA NOV 2024

- Trained and evaluated diffusion-based generative models using U-Net on MNIST dataset
- Mastered forward/reverse diffusion mechanics and implemented end-to-end GenAI pipeline outputs.

Data Analysis with R programming | GOOGLE OCT 2024

- Acquired expertise in R, focusing on data visualization using ggplot2, and statistical analysis functions, including mean, standard deviation, correlation, and linear regression.

PROJECTS

Water Quality Analysis using Satellite Images | [link](#) AUG 2022 – APR 2023

Skills: Python, jupyter notebook

- Developed Random Forest, KNN, and SVM models achieving >94% accuracy
- Automated data pipelines and created interactive visual dashboards
- Extracted and analyzed remote sensing data for environmental research
