Developing Skills

- Languages: Python, Java, C++, SQL, HTML
 - Frameworks: Flask, Spring Boot
 - Tools: Git, REST APIs, SQLite/MySQL
 - Concepts: OOP, MVC architecture, RESTful API design
-

Work History

Foundation Lending 02/23-12/24

Loan Production Specialist

Worked with lending team to streamline client management, loan sourcing, and loan fulfillment pipelines. Located opportunities to improve customer experience, file quality, and turnaround times. Instituted policies and procedures for effective and efficient loan handling.

Integrity Home Mortgage Corporation 10/20-02/23

Loan Partner

Analyzed income, asset, credit, and other applicable factors. Researched loan program guidelines to structure files and solve problems. Worked directly with underwriters to review files, clear conditions, and meet deadlines. Ensured all active, closed, and non-dispositioned files complied with regulation.

First Bank 8/17-10/20

Banking Associate

Assisted in cash and security audits at a branch level. Worked with compliance department on incident assessment and research. Accounted for branch cash reserves. Coordinated document retention.

Access National Corporation 1/13 – 8/17

Client Service Representative

Education

Western Governors University - Bachelor of Science in Computer Science (2025)

Competency-based program with emphasis on software engineering, data structures, algorithms, and databases

Completed hands-on projects involving:

- C++ for object orientation
- Java & Spring Boot for RESTful API development
- Java & Angular for full-stack web development
- Python for data structures and algorithms
- Python & Flask for backend web services and data-driven applications

John Tyler Community College - Associate of Science in Business Administration (2014)
