EDUCATION

Trine University

Master of Science, Information Science

- **Coursework:** Data Analytics, Data Management, Database Systems, Information Systems, Business Intelligence

Aug 2024 - Aug 2026

Allen Park, MI

Anurag University

Bachelor of Technology, Electronics and Communications Engineering

Aug 2020 - May 2024

India

TECHNICAL SKILLS

- **Data Analysis:** SQL, Python, Pandas, NumPy, Statistical Analysis, Exploratory Data Analysis
- **BI & Visualization:** Power BI, Power Query, DAX, Tableau, KPI Dashboards, Interactive Reports
- **Excel & Reporting:** Advanced Excel, PivotTables, VLOOKUP/XLOOKUP, INDEX-MATCH, Advanced Formulas
- **Data Management:** Data Cleaning, Transformation, Validation, Data Quality, ETL, Data Modeling
- **Databases & Tools:** SQL Server, MySQL, BigQuery, Snowflake, Jupyter Notebook, Git, GitHub
- **Professional:** Problem Solving, Stakeholder Collaboration, Cross-functional Communication, Process Improvement

PROFESSIONAL EXPERIENCE

Trine University | Graduate Data Analyst – Academic Project

Jan 2025 - May 2026

- Analyzed structured datasets using SQL, Python, Excel, and Power BI to identify trends, performance gaps, and actionable insights.
- Performed data cleaning, transformation, validation, and exploratory analysis using Python, Pandas, SQL, and Power Query.
- Designed interactive Power BI dashboards and KPI reports to communicate analytical findings and support data-driven decisions.
- Created SQL queries using joins, aggregations, subqueries, and CTEs to extract, validate, and analyze business data.
- Automated recurring reporting and data-preparation workflows using Python, SQL, Excel, and Power Query to reduce manual effort.
- Applied statistical analysis and data visualization techniques to evaluate performance, identify patterns, and present recommendations.

T-Hub | Data Analyst

Jul 2023 - May 2024

- Cleaned and transformed large datasets using Python, enhancing data quality and reporting accuracy.
- Developed interactive Power BI dashboards to monitor KPIs and support informed business decisions.
- Automated data preparation tasks with Python, significantly reducing manual effort and improving efficiency.

Accenture | Programmer Analyst

Jan 2022 - Jan 2023

- Completed comprehensive training in SQL, Python, DBMS, Excel, and data analysis concepts.
- Built SQL queries for data extraction, filtering, aggregation, and reporting to support data-driven decisions.
- Developed analytical problem-solving skills through hands-on experience with real-world datasets.

PROJECTS

Supply Chain Analytics | Power BI

- Analyzed inventory, sales, and logistics data; developed KPI dashboards and identified bottlenecks, trends, and resource-allocation opportunities.

Superstore Sales Analytics | Power BI

- Analyzed sales, profit, regional performance, product categories, and customer segments; developed interactive reports.

Laptop Price Analysis | Python, Power BI

- Cleaned, transformed, and analyzed pricing data; identified trends and translated findings into data-driven recommendations.

HR Employee Attrition Dashboard | Power BI

- Built an interactive dashboard analyzing employee KPIs and communicated actionable findings through data visualization.

Uber Rides Analytics | Python

- Analyzed ride data across time, location, and day segments to identify booking patterns and operational insights.
