EDUCATION

Northeastern University

Master of Science, Engineering Management

September 2023 - May 2025

GPA 3.8/4

Coursework: Advanced Product Development, Economic Decision Making, Digital Product Design, Customer Driven Technical Innovation, Probability and Statistics, Engineering Project Management, Computation and Visualization

KLE Technological University

Bachelor of Engineering, Electronics and Communication

August 2017 - May 2021

GPA 3.5/4

SKILLS

Languages: Python, R, JavaScript, SQL (Stored Procedures, Joins, CTEs), HTML, CSS, C, C++, Embedded C, C#

Visualization: Tableau, Power BI, Plotly, Seaborn, Matplotlib, Jupyter Notebook, Google Colab

Databases: PostgreSQL, MySQL, MongoDB, Oracle, NoSQL, ETL, Data Migration

Tools: Jira, Confluence, Figma, Notion, Microsoft Project, Asana, Smartsheet, Miro

Business: Market Research, Forecasting Models, Cost-Benefit Analysis, Risk Assessment, Performance Reporting

Methods: Agile (Scrum, Kanban), Process Documentation, Budgeting & Forecasting, Resource Allocation, Process Mapping

Analytics: Pandas, NumPy, Scikit-Learn, Advanced Excel (PivotTables, VLOOKUP, INDEX-MATCH), KPI Tracking

PROFESSIONAL EXPERIENCE

Business Technology Analyst, Core Business Operations | Deloitte, Bangalore, India

September 2021 - June 2023

- Translated insurance requirements into low-code configurations for 6 Origami Risk clients, reducing onboarding timelines by 15%
- Designed and automated 30+ workflows, rating logics, and forms, cutting manual processing time for claims, rating, and policies
- Managed 255 test cases and logic bugs, troubleshooting scripts and using SQL for root-cause analysis, accelerating resolution by 30% while maintaining 95% SLA compliance
- Developed interactive dashboards and reports to visualize claims activity, pricing trends, and underwriting KPIs in real time
- Engineered structured datasets for workers' compensation across 40+ states using advanced Excel, and used SQL to validate and troubleshoot migrated data within Origami Risk's backend

Graduate Teaching Assistant, Project Management | Northeastern University, Boston, USA

January 2025 - April 2025

- Developed case-based assignments and exercises to teach data-informed decision-making, risk analysis, and Agile project planning
- Guided teams in translating ambiguous stakeholder expectations into actionable plans, improving delivery quality across 3 projects
- Reviewed 100+ project deliverables, assessing cost-benefit tradeoffs, risk mitigation plans, and KPIs to ensure execution alignment

Business & Data Analyst Intern | Harlal Seeds (CT), Hyderabad, India

June 2020 – May 2021

- Leveraged Power BI to visualize inquiry trends and automate reporting on high-demand SKUs, accelerating order routing and contributing to a 20% boost in conversion and 15% faster fulfillment cycles
- Built and maintained dashboards tracking key metrics - acres under cultivation, trade partnerships, and farmer reach across 8 crop lines, enabling leadership to fine-tune market focus
- Streamlined trade partner onboarding by automating data capture workflows, reducing manual entry by 40% and increasing data accuracy for 3,000+ farmer records

Product Analyst Intern, HCI Research Lab | Indian Institute of Technology, Guwahati, India

December 2019 - January 2020

- Designed business workflows and requirements for campus access system using RFID and QR based security system, optimizing throughput and minimizing verification failures
- Analyzed operational data from access logs to drive improvements in user experience and security protocols

PROJECTS AND LEADERSHIP

Origami Risk Projects - Deloitte (Bangalore, India)

- Led the implementation strategy for a new client (TBG), establishing custom workflows that set new platform standards
- Conducted 10+ training sessions and built onboarding guides, accelerating new hire ramp-up by 25%
- Facilitated cross-functional collaboration among 40+ developers, analysts, and client stakeholders to drive seamless delivery

ComViz Projects - Data Visualization and Analysis (Boston, USA) ([Link](#))

- Analyzed public datasets to identify key trends, performing data cleaning, feature extraction, and correlation analysis using Python
- Built interactive dashboards using Python and Tableau to analyze public datasets; synthesized behavioral insights to support policy simulations and presented findings to academic panels

Image Fusion Using CNN - Applied AI Project (Hubli, India) ([Link](#))

- Built a CNN-based image fusion model to generate single high-quality images from multi-focus inputs, enabling use in AR/VR
- Engineered a dataset of 1000 image pairs and implemented a 4-layer ResNet101 architecture to extract and merge salient features
- Achieved ~23% improvement over baseline using PSNR (31.5), SSIM (0.91), and BRISQUE (26.7) to validate image fidelity for real-time processing contexts
