

Pravallika Vallapu

CYBERSECURITY ANALYST | SECURITY ANALYST

United States | +1 (513) 613-3363 | pravallikav2709@gmail.com | [linkedin.com/in/pravallika-vallapu/](https://www.linkedin.com/in/pravallika-vallapu/)

SUMMARY

Cybersecurity Analyst with 3+ years of experience protecting enterprise environments across security operations, threat detection, incident response, vulnerability management, identity security, and privileged access management within regulated financial-services organizations. Hands-on experience investigating and correlating security events using Splunk Enterprise Security and IBM QRadar, improving detection workflows, supporting threat hunting, and coordinating incident response aligned with NIST SP 800-61 and MITRE ATT&CK. Experienced with Qualys VMDR, Rapid7 InsightVM, Nessus, Microsoft Entra ID, Active Directory, SailPoint IdentityIQ, CyberArk, and enterprise IAM/PAM controls. Skilled in Python, PowerShell, and Bash automation with a track record of translating technical security findings into prioritized remediation actions for infrastructure, application, identity, and business teams.

EXPERIENCE

Piper Sandler | Security Operations Engineer – Connecticut, USA October 2024 to Current

- Investigate and triage security events in Splunk Enterprise Security and IBM QRadar, correlating authentication, identity, application, system, and network telemetry to identify suspicious activity, assess risk, and determine appropriate escalation.
- Improved SIEM monitoring through detection tuning, security use-case refinement, and threat-hunting activities, contributing to an approximately 40% reduction in mean time to detect and respond to actionable security events.
- Coordinate incident response using NIST SP 800-61 principles, supporting investigation, containment, remediation, root-cause analysis, evidence preservation, post-incident review, and improvements to response procedures.
- Manage vulnerability exposure through Qualys VMDR and Rapid7 InsightVM, prioritizing findings based on CVSS severity, exploitability, asset criticality, and business impact while driving remediation with infrastructure and application owners.
- Achieved approximately 95% remediation of prioritized high-risk vulnerabilities by improving ownership, remediation tracking, validation, and communication across technical teams.
- Strengthen identity and privileged-access security across Microsoft Entra ID, Active Directory, SailPoint IdentityIQ, and CyberArk through access reviews, RBAC, MFA, Conditional Access, privileged-account governance, and least-privilege controls.
- Develop Python, PowerShell, and Bash automation for log analysis, recurring access-validation activities, security reporting, and repetitive operational workflows, reducing manual effort and improving process consistency.
- Partner with infrastructure, application, IAM, audit, and risk teams to investigate findings, document remediation, strengthen controls, and support security and regulatory obligations within a financial-services environment.

Dataone Solutions | Cybersecurity Analyst – Delhi, INDIA January 2022 to June 2023

- Monitored and analyzed enterprise security events using SIEM and security-monitoring platforms, validating alerts and escalating incidents based on threat severity, affected assets, supporting evidence, and organizational risk.
- Investigated suspicious authentication, privileged-access, network, and system activity by correlating logs and security telemetry to distinguish malicious or anomalous behavior from legitimate business activity.
- Supported vulnerability-management operations using Qualys, Rapid7, and Nessus, validating findings, prioritizing exposures, coordinating remediation with system owners, and tracking high-risk vulnerabilities through closure.
- Managed identity-security activities across Active Directory, Microsoft Entra ID, SailPoint IdentityIQ, and Okta, supporting provisioning, access reviews, RBAC, MFA, SSO, and user-lifecycle controls.
- Supported privileged-access governance using CyberArk, BeyondTrust, and Delinea technologies, helping reduce unnecessary administrative access and improve oversight of privileged identities and accounts.
- Performed network and security analysis using Wireshark and Nmap, correlating network behavior with system and authentication logs to support troubleshooting and security investigations.
- Contributed to incident-response activities by documenting investigation timelines, affected systems, supporting evidence, containment actions, remediation status, and lessons learned for future response playbooks.
- Worked with infrastructure, network, application, IAM, audit, and security teams to resolve security findings and strengthen controls around authentication, privileged access, vulnerability exposure, and enterprise system configurations.

EDUCATION

Youngstown State University, Ohio, USA - Master of Science in Computer Science
Vignan Institute of Technology & Science, Telangana, INDIA - Bachelor’s degree in Electronics and Communication Engineering

TECHNICAL SKILLS

- Security Operations & SIEM:** Splunk Enterprise Security, IBM QRadar, Splunk SOAR, SIEM Monitoring, Security Alert Triage, Incident Investigation, Threat Hunting, Detection Tuning, IOC Analysis, Log Correlation, Security Use Cases, Incident Escalation
- Incident Response & Threat Analysis:** NIST SP 800-61, MITRE ATT&CK, Incident Triage, Containment, Eradication, Recovery, Root Cause Analysis, Evidence Collection, Incident Documentation, Runbooks, Response Playbooks
- Vulnerability Management:** Qualys VMDR, Rapid7 InsightVM, Nessus, Vulnerability Assessment, CVSS, Risk-Based Prioritization, Remediation Tracking, Vulnerability Validation
- Identity & Access Security:** Microsoft Entra ID, Active Directory, SailPoint IdentityIQ, CyberArk, Okta, BeyondTrust, Delinea, IAM, IGA, PAM, RBAC, ABAC, MFA, SSO, Conditional Access, Access Reviews, Least Privilege, Zero Trust
- Network & Security Analysis:** Wireshark, Nmap, TCP/IP, DNS, Firewalls, VPN, IDS/IPS, Network Traffic Analysis, Kali Linux, Burp Suite
- Automation & Scripting:** Python, PowerShell, Bash, Security Workflow Automation, Log Analysis, Access Validation, Security Reporting Automation
- Security Frameworks & Compliance:** NIST Cybersecurity Framework, NIST SP 800-61, MITRE ATT&CK, ISO 27001, SOX, PCI DSS, Security Controls, Risk Assessment, Audit Support
