

RAMA NARAYANA

Data Analyst | Power BI, DAX, Advanced SQL & Data Modeling

+1 (347) 766-5212 | ramnarayana2025@gmail.com | [linkedin.com/gurrampati2025](https://www.linkedin.com/in/gurrampati2025)

SUMMARY

Data Analyst with almost 4 years of experience developing and maintaining Power BI dashboards, reports, KPIs, and data visualizations using advanced DAX measures. Writes complex SQL queries with CTEs, joins, and window functions to extract, transform, validate, and analyze data, optimizing reports for performance. Builds and maintains effective data models and semantic datasets, using Power Query for data transformation and a Python-based script for data validation and reporting automation. Performs data quality checks and investigates discrepancies, analyzing trends and business performance to provide actionable insights. Gathers business requirements and translates them into analytical and reporting solutions, documenting data sources, metrics, and reporting logic.

CORE SKILLS

- Power BI & DAX: Dashboard development, advanced DAX measures, performance optimization
- Advanced SQL: CTEs, joins, window functions, query optimization
- Data Transformation: Power Query, data modeling, semantic datasets
- Python: Data validation and reporting automation scripting
- Data Platforms: Snowflake, Databricks, Azure, Azure Data Factory
- Data Quality: Quality checks, discrepancy investigation, documentation

WORK EXPERIENCE

Healthcare Data Analyst — Universal Health Services

Jan 2025 – Present

- Develop and maintain Power BI dashboards, reports, KPIs, and data visualizations, creating advanced DAX measures, driving an 18% adoption gain.
- Write complex SQL queries with CTEs, joins, and window functions to extract, transform, validate, and analyze data, reducing anomalies by 27%.
- Build and maintain effective data models and semantic datasets using Power Query for data transformation.
- Developed a Python-based script to automate data validation and reporting, reducing manual data handling.
- Perform data quality checks and investigate discrepancies, analyzing trends and business performance to provide actionable insights.
- Gather business requirements and translate them into analytical and reporting solutions, collaborating with data engineers and technical teams.
- Document data sources, metrics, reporting logic, and analytical processes, cutting manual processing by 31%.

Healthcare Data Analyst — Cybage Software

Feb 2022 – Jun 2023

- Developed Power BI dashboards and DAX measures, writing complex SQL queries for data extraction and analysis, reducing turnaround time by 32%.
- Built data models using Power Query, performing data quality checks and investigating discrepancies.
- Analyzed trends and business performance, gathering requirements and translating them into reporting solutions, improving accuracy by 28%.
- Documented data sources and reporting logic for cross-functional teams.

Data Analyst (Healthcare) — CitiusTech

Jan 2021 – Jan 2022

- Used SQL with joins and CTEs to extract and analyze data, building Power BI dashboards for stakeholders.
- Supported data quality checks and documentation across technical and clinical teams.
- Collaborated with stakeholders to gather requirements for reporting solutions.

EDUCATION

Master's Degree, Data Analytics — Indiana Wesleyan University, Marion, USA

Nov 2023 – Aug 2025

Bachelor's, Electrical, Electronics & Communications Engineering — Andhra Engineering College, India

Jun 2018 – Aug 2022

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Fabric Analytics Engineer Associate
