SUMMARY

Data Analyst with **5 years of experience** across the **insurance**, **asset management**, and **healthcare** sectors. Specialized in **quantitative data modeling**, **ETL pipeline architecture**, and **variance analysis**. Technical foundation includes **SQL**, **Python**, **Snowflake**, and **Power BI**. Experienced in reconciling **enterprise-scale datasets**, automating **statutory reporting**, and ensuring strict adherence to **regulatory compliance frameworks** including **CCAR**, **GAAP**, and **CMS**.

PROFESSIONAL EXPERIENCE

Data Analyst | Allianz Life | USA

Nov 2024 – Present

- Modeled premium and payout liability forecasts using **Advanced Excel**, **SAS**, and **Guidewire** data, applying judgment to align assumptions across 8 product lines and reduce reserve discrepancies by \$4.1 million.
- Correlated policy, claims, and billing records through **SQL** and **Snowflake**, applying logic to reconcile 2.2 million records and isolate 63 exception cases for financial review.
- Projected expense and actuarial trends with **Python (pandas)** and **Power BI**, using context awareness to adjust forecasts across 11 cost centers and avoid \$2.7 million in unfavorable variance.
- Reconciled statutory and management reports using **Excel VBA**, **Power BI**, and **Allianz Life** reporting standards, applying precision to secure 26 approvals and meet 4 regulatory deadlines.

Data Analyst | Allianz Investment | USA

Nov 2023 – Oct 2024

- Resolved **1,200+ complex data queries**, for **800+ stakeholders** across five global cohorts using **SQL** and **Salesforce CRM**, maintaining a 4.8/5 satisfaction score.
- Conducted **performance analytics** on **500K+ records** using **SQL**, **Excel VBA**, and **Power Query**, cutting data-processing turnaround by 48 hours per cycle.
- Built **Power BI** and **Tableau dashboards** standardizing 15 core **financial** and **GAAP metrics** across workflows for 150+ users, delivered through 24 review sessions.
- Partnered with leadership to streamline **data feedback loops**, building 12 **automated reporting workflows** that eliminated 40+ hours of manual reconciliation monthly.

Data Analyst | BNY Mellon | USA

Jul 2022 – Sep 2023

- Analyzed **\$1.6M in equity portfolio data**, utilizing **quantitative data modeling** and **comparative analysis** to support 5 strategic asset additions, outperforming baseline benchmarks across 3 market volatility cycles.
- Architected interactive **Power BI risk dashboards** integrating **scenario analysis** and **regression analysis**, processing **500,000+ data records** to enhance visibility into **portfolio exposure** across 12 sectors.
- Engineered **data simulations** for **CCAR-compliant stress testing**, extracting **complex macroeconomic datasets** to evaluate **capital adequacy** and model 4 distinct market downturn impacts.
- Led 40 weekly technical workshops for 50+ analysts on **predictive data forecasting**, **risk modeling**, and **data compliance frameworks**, eliminating 120+ manual forecast discrepancies.

Jr.Data Analyst | Blue Cross Blue Shield (BCBS) | USA

Apr 2021 – Jul 2022

- Built **healthcare data models** using **Advanced Excel** and **Power Query** to reconcile multi-state **provider network datasets**, eliminating 14 reporting gaps and advancing **claims reporting** readiness by 6 business days.
- Queried and processed **healthcare datasets** through **SQL** and **Alteryx** to standardize **1.8 million patient encounter records**, successfully isolating 47 **billing compliance anomalies** escalated for clinical review.
- Analyzed **population health data** using **Python (pandas, NumPy)** and **Tableau** to track **utilization trends** across 9 **care management programs**, delivering insights that prevented **\$3.2 million** in projected **claims overpayments**.
- Automated **data validation workflows** utilizing **Power BI**, **Excel VBA**, and **HIPAA compliance frameworks**, ensuring **data accuracy** to enable 22 stakeholder approvals across 3 critical **CMS reporting deadlines**.

TECHNICAL SKILLS

Programming Languages: SQL (T-SQL, PostgreSQL), Python (Pandas, NumPy, SciPy), SAS, VBA, DAX, M Code

Cloud & Databases: Snowflake, AWS (Redshift, S3), Microsoft Azure (Data Factory, Synapse), Google Cloud Platform (BigQuery), Relational Database Management Systems (RDBMS)

BI & Data Visualization: Power BI, Tableau, Advanced Excel (PivotTables, Macros, Power Pivot), Looker

ETL & Data Engineering: Alteryx, Power Query, SSIS (SQL Server Integration Services), Data Warehousing, Data Pipeline Automation, Dimensional Data Modeling

Insurance & Actuarial Analytics: Guidewire, Premium & Loss Forecasting, Reserve Discrepancy Analysis, Payout Liability Modeling, Claims Reconciliation, Actuarial Trend Projection

Financial & Risk Analytics: CCAR Stress Testing, GAAP & Statutory Reporting, Quantitative Risk Modeling, Scenario & Regression Analysis, DCF/DDM Models, Variance Analysis

Tools & Methodologies: Salesforce CRM, SAP, Agile Methodologies, Data Governance, Master Data Management (MDM), Predictive Forecasting

EDUCATION

M.S., Information Technology Management | Concordia University, St. Paul, MN | 2021 – 2022

CERTIFICATIONS

- Introduction to Structured Query Language (SQL) - Coursera
- Programming for Everybody: Getting Started with Python - Coursera
