Summary

I would like to start off with my introduction - I am highly experienced in enterprise application development with extensive success in designing, and developing large-scale projects from end to end.

With over 10 years of experience in fullstack development, I drive solutions throughout the software development lifecycle while following iterative and Agile methodology.

Throughout my career, I have demonstrated my ability to undertake ownership of project management to delivery while recommending approaches and best practices for continuous improvement.

Much of my hands-on experience includes:

- Worked on using React, React-Native, Vue.js, Gatsby and Next.js with the latest technologies and experience
- Have hands-on experience in Back-end development (Node.js, PHP, .NET Core, Python, GoLang, Apollo-GraphQL).
- Unit test and E2E testing libraries like Jest, Cypress.io, Selenium, PlayRight, snap shooting testing, react testing library .
- hands-one experience in Styled-component, MUI, SCSS, Less and TailwindCSS.
- Worked as front-end engineer in NFT market place using Web3.js and ethers.js.
- Webservices development using API protocols and data formats (REST, JSON, SOAP, XML).
- Utilizing SQL, PostgresSql, and NoSQL (MongoDB) for application development, optimization, and performance tuning.

Experience

Senior Software Engineer

Unique Software Development

Apr 2023 - Present (1 year 10 months +)

- Built Chatting app using React, React Native, Next.js, Node.js, Apollo-GraphQL, Python and PostgreSQL.
- Built Event scheduling app using Vue.js, Vuex, TailwindCSS, GoLang and PostgreSQL.
- Applied redux middleware using redux-promise, redux-thunk and redux-saga.
- Developed Server-Side REST APIs, Microservices using NodeJs, Express.js, Python and GoLang.
- Boosted overall performance of the applications using react-query library and react hooks.
- Created helpful reusable React hooks to increase speed of development.
- Implemented Unit and E2E testing using Jest for react application along with Enzyme test utilities.
- Mentored junior developers to follow the correct business logic and implement requirements without possible crashes or bugs.
- Attended daily stand-up dev meetings and participated in Agile and Safe ceremonies such as grooming, retro, and PI planning.

Senior Frontend/Web3 Developer

Dapper Labs

May 2021 - Mar 2023 (1 year 11 months)

- Contributed to building a new Genies NFT marketplace, integrating AWS Cognito authentication and building the storefront and profile pages.
- Maintained Frontend of the NBA topshot NFT marketplace using React, Next.js, Typescript, IPFS and

web3.js.

- Developed NFT Marketplace smart contract using Solidity and Hardhat framework.
- Implemented Unit and E2E testing using Jest for react application along with Enzyme test utilities.
- Followed the Scrum methodology using Asana while collaborating closely with the UX design and back-end teams.
- Worked actively in Agile and Scrum environments with 2-week sprints.

Full Stack Engineer

Liftango

Apr 2020 - Apr 2021 (1 years 1 month)

- Built a Carpooling(RideSharing) web app: React, Next.js, Gatsby, Typescript, .NET Core, Apollo GraphQL, MongoDB.
- Implemented Robust Backend Restful APIs using .NET Core and Dependency Injection.
- Developed Website from scratch, put e2e test / integration / unit testing. React testing library
- Built iOS and Android app with React Native, styled-component.
- Implemented snapshot testing using Jest for react application along with Enzyme test utilities.
- Customized various chart libraries as D3.js, High chart, Recharts and Ant-design chart.
- Oversaw the building of pixel-perfect and mobile-friendly UI/UX of various web applications and API integration

Frontend Engineer

Etsy

Oct 2018 - Mar 2020 (1 year 6 months)

- Built a e-commerce website using Angular, Typescript, REST APIs, Emotion, and Markdown.
- Created reusable angular components using Angular Material and managed application state with Dependency Injection.
- Collaborated with back-end developers to integrate REST API endpoints.
- Implemented Payroll service integration using .NET Core.
- Followed the Scrum methodology using Asana while collaborating closely with the UX design and back-end teams.
- Worked actively in Agile and Scrum environments with 2-week sprints.
- Boosted the project infrastructure, optimizing the performance and enhancing code quality to the next level.

Software Engineer

Experian

Dec 2015 - Sep 2018 (2 years 10 months)

- Provide development, ongoing software support and issue resolution using PHP laravel framework, MySQL, html5, css3, JavaScript and docker
- Developed E-commerce platforms using Wordpress and Yii.
- Developed UI using jQuery and Bootstrap.
- Planning and delivering software platforms used across multiple products and organizational units in General Insurance Business
- Partner with the Business Analysts and ui/ux designers to understand application requirements and develop applications that meet the business need

Education

University of Scranton

Bachelor of Science - BS, Computer Science

Apr 2011 - Nov 2015

Skills

- **Languages & Frameworks:** TypeScript, JavaScript, HTML, CSS, PHP, C#, Python, C++, Solidity, Java, Go, Kotlin.
- **Frontend:** React, React Native, Vue.js, Next.js, Styled Components, TailwindCSS, Chakra UI, MUI.
- **Backend:** Node.js, ASP.NET, Django, Laravel, Express.js.
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB.
- **Blockchain/Web3:** Solidity, Web3.js, Ethers.js, Wagmi, OpenZeppelin, Truffle, Hardhat.
- **DevOps & Cloud:** AWS, Heroku, Kubernetes, CI/CD, Git, GitLab, Jenkins.
- **Testing & Tools:** Jest, Mocha, Cypress, GraphQL, RestAPI, WebRTC.
- **UI/UX & Collaboration:** Figma, Agile, Scrum, Jira.

Language

English: Fluent or Native (Professional Proficiency)
