

# DHANISHA ABHAY RAUT

Jersey City, NJ | rautdhanisha76@gmail.com | 551-267-1599 | [linkedin.com/in/dhanisharaut](https://www.linkedin.com/in/dhanisharaut)

**Overview:** Entry-level Data Professional with hands-on experience designing ETL pipelines, data lakehouses, and analytics infrastructure using Python, SQL, Airflow, and Docker. Proven ability to build scalable, production-grade data systems that deliver reliable insights. Eligible to work in the U.S. for 3 years (OPT/STEM OPT – no sponsorship required).

## EDUCATION

### Stevens Institute of Technology

Sep 2024 – May 2026

Master of Science in Computer Science, Hoboken, NJ | GPA: 3.7

Relevant Courses: Applied ML, Knowledge Discovery & Data Mining, Database Management System, Data Visualization and Applications, Advanced Algorithm Design, Agile Methodologies

### University of Mumbai

June 2019 – May 2023

Bachelor of Engineering in Computer Engineering, Mumbai, India | GPA: 3.83

## SKILLS

**Languages & Databases:** Python, SQL, PostgreSQL, MySQL, R

**Data Engineering:** Apache Airflow, ETL Pipelines, Data Modelling, MinIO (S3), Docker, Data Warehousing

**Analytics & Visualization:** Tableau, Apache Superset, pandas, NumPy, Power BI

**Machine Learning:** Scikit-learn, Random Forest, NLP, Text Classification, Feature Engineering

**Tools:** Git, GitHub, Microsoft Office (Excel, Word, PowerPoint), Jupyter, VS Code

## PROFESSIONAL EXPERIENCE

### Stevens Institute of Technology – ISSS Office - Graduate Student Assistant

May 2025 – May 2026

- Managed front desk operations for the ISSS office, serving as the first point of contact for 50+ international students per week, resolving queries related to F-1 visa status, OPT/CPT applications, and immigration compliance.
- Guided students through F-1 visa documentation requirements and SEVIS processes, reducing repeat inquiries by explaining procedures clearly and directing complex cases to advisors, improving overall office efficiency.

### Exposys Data Labs - Data Science Intern

Sep 2022 – Oct 2022

- Benchmarked 5 ML classifiers (Logistic Regression, Decision Tree, SVM, KNN, Random Forest) on a 768-record clinical dataset; Random Forest achieved 78% accuracy, a 6% lift over the baseline model selected as the final production model.
- Engineered 8 clinical features via imputation, normalization, and outlier removal in Python/pandas, resolving data-quality issues that had previously degraded model performance by ~10%.

## PROJECT EXPERIENCE

### NYC Transit Reliability Lakehouse - Stevens Institute of Technology

Fall 2025

Python · Apache Airflow · PostgreSQL · MinIO · Docker · Apache Superset

- Architected a full-stack data lakehouse ingesting 100K+ MTA transit records per run across bronze → silver → gold layers; containerized with Docker Compose for single-command deployment across 3 environments.
- Orchestrated 4 scheduled Airflow DAGs with alerting (zero undetected failures over 8 weeks) and delivered 5 Superset dashboards covering on-time performance across 400+ NYC subway stations.

### U.S. Hospital Performance Intelligence Dashboard - Stevens Institute of Technology

Spring 2026

Python · pandas · Tableau Public

- Built a 4-page Tableau dashboard analyzing 5,400+ Medicare-certified hospitals across all 50 states using 5 CMS datasets (~50 MB); ETL pipeline in Python/pandas cut data-prep time by ~70% vs. manual methods.
- Surfaced that only 17.4% of hospitals achieve high quality at low cost; published to Tableau Public with cross-page filters, scatter outlier annotations, and KPI tiles serving 3 distinct stakeholder audiences.

## PAPER PUBLISHED

### Hate Speech Detection using Machine Learning and Text Analysis

June 2023

7th International Conference on Intelligent Computing and Control Systems (ICICCS)

- Led a 4-month NLP research project: labeled a 10,000+ sample corpus, trained 3 classifiers (LSTM, fine-tuned BERT, SVM-TF-IDF) achieving 84% F1; presented to 150+ researchers at the international conference.
- Published in [IEEE Xplore](https://ieeexplore.ieee.org/document/10200000); paper cited as a reference resource for online content moderation research in the conference proceedings.
