SUMMARY

Data (Analytics) Engineer with 1 year of experience building end-to-end data pipelines and analytics-ready datasets that translate business requirements into reliable data solutions. Proficient in SQL, Snowflake, dbt, AWS, Python, and Airflow, with an understanding of CI/CD, Docker. Skilled at collaborating with cross-functional teams to improve data quality, automate workflows, and deliver trusted data products for reporting and decision-making.

PROJECT

HCP (Healthcare Professional) 360 & Commercial Analytics Platform

Internship Project | Snowflake, dbt, AWS, Airflow, SQL, Python

May 2026

- Modeled CRM-based HCP interactions, digital campaign events, master records, and commercial data into a unified HCP 360 layer; built dbt staging, dimensional, and Gold-layer models with incremental CDC and SCD Type 1/2 logic to track engagement histories, customer attributes, and account relationships
- Built reusable dbt KPI marts using event sequencing, window functions, and funnel aggregations to measure engagement rate, channel response, interaction frequency, touchpoints-to-conversion, and segment performance, enabling HCP prioritization and omnichannel campaign analysis.

EXPERIENCE

Conba Pharmaceutical

Analytics Engineering Intern

Remote

Jan 2026 – May 2026

- Built and maintained AWS-to-Snowflake ELT workflows for commercial analytics, supporting scheduled batch and event-driven ingestion through S3 and Snowpipe within a Bronze–Silver–Gold architecture
- Developed reusable SQL/dbt transformation models across Silver and Gold layers, applying incremental processing and data-quality controls to deliver analytics-ready customer datasets
- Orchestrated transformation and validation workflows with Airflow and dbt tests while contributing to CI/CD, Terraform-based deployment, and role-based access controls for sensitive commercial data

Hilton

Data Engineer Intern

Shanghai, China

May 2025 – Aug 2025

- Orchestrated an Airflow-scheduled ETL pipeline from Splunk to PostgreSQL for server backup monitoring, standardizing log ingestion and improving visibility into compliance performance across properties
- Built and maintained property-level analytics datasets by joining customer, revenue, and location data across 500+ hotels, supporting downstream segmentation workflows and contributing to a 12% increase in campaign adoption

Georgia Tech, Computational Health Lab

Research Assistant

Atlanta, GA

Jan 2025 – Dec 2025

- Built AWS Glue PySpark ETL jobs and orchestrated multi-stage workflows with Step Functions to clean and consolidate web-scraped and IRS Form 990 data from S3, incorporating automated retries and data-quality checks
- Designed analytics-ready research datasets by joining policy, organizational, and geographic data, enabling staggered DiD analysis of post-Dobbs changes in abortion fund service distribution

Conba Pharmaceutical

Data Analyst Intern

Shanghai, China

Jun 2023 – Sep 2023

- Queried, cleaned, and validated 5,000+ pharmaceutical sales records using SQL, addressing missing data and outliers to improve data quality for downstream analysis
- Conducted ARIMA-based sales forecasting to support business planning and estimated a 2.8% annual profit increase associated with a proposed shift of a product line to outsourced medicines

EDUCATION

Georgia Institute of Technology, Atlanta, GA

Master of Science in Statistics | *GPA: 3.70*

Aug 2024 – May 2026

University of Nottingham, Nottingham, UK

Bachelor of Science in Economics | *GPA: 3.75* | *Dean's Scholarship*

June 2024

CERTIFICATIONS & SKILLS

Certification: [AWS Certified Data Engineer – Associate](#), [AWS Certified Solutions Architect - Associate](#)

Other Skills: Tableau, Power BI, AI Engineering (RAG, Workflow Automation), ML & Statistical Analysis
