

RISHI PREETHAM KADAVERUGU

DATA ANALYST | POWER BI DEVELOPER

New York, USA | +1 (704) 430-4001 | satyarish2@gmail.com | [linkedin.com/in/rishi-p](https://www.linkedin.com/in/rishi-p)

25+ Dashboards

Enterprise Power BI dashboards built for 200+ stakeholders

20M+ Records

Analyzed at scale using advanced SQL & Azure Databricks

60% Faster

Manual reporting effort cut via automated ETL/ELT pipelines

99.8% Accuracy

Reporting accuracy through automated data validation

SUMMARY

Results-driven Data Analyst with 3+ years of experience turning complex healthcare data into executive-ready insights. Built and scaled 25+ Power BI dashboards used by 200+ stakeholders, cut manual reporting effort by 60% through automated ETL/ELT pipelines, and lifted self-service analytics adoption by 40%. Skilled across SQL, DAX, Power Query, Microsoft Fabric, Azure Synapse, Azure Databricks, Snowflake, and Python, with hands-on experience applying Generative AI to accelerate reporting and insight generation.

PROFESSIONAL EXPERIENCE

DATA ANALYST

Aug 2024 – Present

Cigna Healthcare, USA

- Built and scaled 25+ enterprise Power BI dashboards and KPI scorecards used daily by 200+ stakeholders across claims, provider, member, and financial analytics.
- Cut manual reporting effort by 60% by architecting ETL/ELT pipelines in Microsoft Fabric, Azure Data Factory, Azure Databricks, and PySpark.
- Increased self-service analytics adoption by 40% by designing scalable semantic and dimensional models across Azure Synapse and SQL.
- Improved dashboard performance by 35% and slashed refresh times through optimized DAX and Power Query transformations.
- Drove 99.8% reporting accuracy by implementing automated data validation, reconciliation, and quality monitoring on 20M+ record datasets.
- Reduced recurring reporting issues by 30% through root cause analysis and hands-on production support for critical ETL and analytics platforms.
- Applied Generative AI to automate insight generation and accelerate executive reporting turnaround.

DATA ANALYST

2021 – 2022

Flipkart, India

- Delivered interactive Power BI and Tableau dashboards that gave leadership real-time visibility into revenue, operations, and customer performance.
- Cut manual effort by 35% by automating recurring reporting and ETL workflows with SQL and Python.
- Built KPI scorecards and dimensional data models that became the standard for self-service analytics across the team.
- Ran trend analysis, forecasting, and predictive analytics using SQL and Python to directly inform business planning.
- Partnered directly with stakeholders to translate business goals into KPIs, requirements, and production-ready reporting.

TECHNICAL SKILLS

BI & Reporting: Power BI, DAX, Power Query, Tableau, SSRS, Executive & KPI Reporting, Data Visualization, Self-Service Analytics

Data & Analytics: SQL, T-SQL, Spark SQL, Data Validation & Quality, Root Cause Analysis, Forecasting, Predictive Analytics

Cloud & Platforms: Microsoft Fabric, Azure Synapse Analytics, Azure Data Lake, Azure Databricks, Azure Data Factory, Snowflake, AWS S3/Redshift

ETL & Integration: ETL/ELT Development, Data Integration & Transformation, CDC, Data Migration & Reconciliation, Data Warehousing

Programming & AI: Python, PySpark, Pandas, NumPy, Generative AI, Azure OpenAI Service, LLMs, Machine Learning Fundamentals

Modeling & Leadership: Dimensional Modeling, Star/Snowflake Schema, Semantic Models, Stakeholder Management, Agile, Cross-Functional Collaboration

EDUCATION

Master of Science in Computer Science

2022 – 2024

University of Illinois Springfield, United States
