SUMMARY

Business Intelligence Analyst with **3+ years** of experience in financial and consulting domains. Transformed complex, high-volume multi-source datasets into KPI-driven dashboards and compelling data stories that drive actionable business insights. Proven expertise in Power BI dashboard development, DAX, Power Query, and data governance, including data lineage, data quality validation, and data mapping from source to target systems.

WORK EXPERIENCE

Power BI Developer, KPMG (Client Project) | Hexaware, Jersey City, NJ

July 2025 - Current

- Spearheaded end-to-end migration of **30+** enterprise dashboards from QlikView/Qlik Sense to Power BI, replicating analytical logic and ensuring full data and visual parity across business-critical reports
- Delivered interactive Power BI dashboards that enabled clear data storytelling for stakeholders, reducing report load time by **20%** through optimized data models, efficient Power Query transformations, and advanced DAX measures.
- Integrated Databricks Delta tables with Power BI via Direct Query and Import modes, optimizing query performance for large-scale financial datasets and reducing query execution time
- Collaborated with cross-functional business and compliance stakeholders to gather reporting requirements and designed & deployed paginated SSRS reports for operational and regulatory submissions, improving delivery efficiency
- Automated data refresh cycles and parameterized reports, eliminating manual interventions and improving reporting turnaround time by **30%**

Data Analyst, Clark University, Worcester, MA

January 2025 - May 2025

- Engineered end-to-end data workflows using Python (Pandas), SQL, and Excel to extract, clean, and transform event datasets from multiple sources including Google Sheets and internal databases, ensuring data consistency for stakeholder reporting
- Developed dynamic Tableau dashboards to track KPIs including attendance trends, budget utilization, and vendor performance, enabling data-driven event planning and operational decision-making
- Identified data quality issues across multiple input sources and implemented validation checks in Python and SQL, resolving inconsistencies that improved reporting accuracy and stakeholder trust in the data

Data Analyst, Barclays (Client Project), TCS, Pune, India

July 2022 - November 2023

- Supported data operations for a large-scale co-branded travel credit card portfolio, analyzing cardholder transaction data, loyalty points activity, and tier-status earning patterns in collaboration with business and reporting teams to ensure accurate, timely portfolio reporting
- Engineered ETL pipelines using SQL, Python, and Power Query to automate ingestion and transformation of daily transaction feeds across **5+** source systems processing **100K+** daily records, reducing manual processing effort by 40%, and ensuring data readiness for daily reporting cycles
- Built enterprise Power BI dashboards on Azure SQL Database with intuitive, business-focused visualizations tracking KPIs such as transaction volumes, spend categories, and rewards redemption, enabling real-time portfolio monitoring.
- Enhanced pipeline reliability using Azure Monitor, Activity Logs, and custom SQL alerting scripts to proactively flag data issues in credit card feeds, minimizing business impact and meeting reporting SLAs

TECHNICAL SKILLS

Data Analysis & Visualization: Power BI (Desktop, Service, Paginated/SSRS), Tableau, DAX, Power Query (M), Report Builder, QlikView/Qlik Sense, Data Modeling (Star/Snowflake Schema), KPI Development

Data Engineering & ETL: Azure Data Factory, Databricks, Microsoft Fabric, SSIS, Alteryx, SSMS, Power Automate

Cloud & Databases: Azure (Data Factory, Synapse, Monitor), Snowflake, Databricks, NoSQL (MongoDB, DynamoDB)

Languages & Query: SQL (MySQL, PostgreSQL, Redshift, Azure SQL), Python (Pandas, NumPy), R, Excel (Advanced)

Methodologies & Tools: Agile/Scrum, Jira, Confluence, Data Modeling (Star/Snowflake Schema), KPI Design, Requirements Elicitation

Certifications: **PL-300** Power BI Data Analyst (Aug 2025) | **DP-600** Fabric Analytics Engineer (Jul 2025) | **DP-700** Fabric Data Engineer (Jan 2026)

EDUCATION

Clark University, Worcester, United States of America

January 2024 - May 2025

Masters of Science in Data Analytics

CGPA: 3.9/4

Relevant Courses: Machine Learning, Deep Learning, Natural Language Processing, Big Data Technologies

Government College of Engineering, Aurangabad, India

August 2018 - May 2022

Bachelor of Engineering in Information Technology

CGPA: 3.5/4

Relevant Courses: Probability, Data Analytics, Advanced Algorithms, Database Management Systems, Applied Mathematics
