SUMMARY

Data Analyst with 1.5+ years of experience transforming complex multi-source datasets into actionable business and product insights. Expertise in **SQL (complex joins, window functions)**, **Python (Pandas, NumPy)**, and building high-adoption **Tableau/Power BI** dashboards for executive leadership. Proven track record of optimizing customer funnels, executing end-to-end **A/B testing frameworks**, and building predictive models that **reduced churn by 14%** and **boosted operational efficiency by 25%**.

SKILLS

Programming & Analytics: SQL, T-SQL, PL/SQL, PostgreSQL, Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, R, Statistical Analysis, Data Mining

Business Intelligence & Visualization: Power BI, Tableau, Excel (Advanced), Looker Studio, KPI Dashboards, Data Storytelling, Executive Reporting, Self-Service Analytics, Star Schema, Data Modeling

Data Engineering & Warehousing: dbt, Apache Airflow, AWS Glue, Informatica, Talend, ETL/ELT Pipelines, Data Transformation, Data Validation, Data Quality Assurance, Regression & Functional Data Testing, Data Governance & Lineage

Cloud & Big Data: AWS, S3, Redshift, Athena, Lambda, Azure Synapse, Databricks, GCP BigQuery

Databases: SQL Server, PostgreSQL, Oracle, MySQL, MongoDB, Redshift, Snowflake

Data Science & Product Analytics: A/B Testing & Experimentation, Hypothesis Testing, Predictive Modeling (Regression, Classification, Clustering), Forecasting, Cohort Analysis, User Funnel Optimization

Modern Analytics & Collaboration: SOP, AI-Assisted Data Analytics (LLM/Prompt Engineering), GA4, Git, JIRA, Confluence, Agile Scrum,

PROFESSIONAL EXPERIENCE

Capital One, USA | Data Analyst

January 2026 – Present

- Designed and maintained **15+ interactive Power BI and Tableau dashboards** using complex SQL queries and Snowflake, providing 50+ business stakeholders real-time visibility into operational KPIs.
- Automated recurring weekly and monthly executive performance reports, reducing manual reporting turnaround time by **60% saving 12+ hours per week for the analytics team**.
- Migrated legacy Excel reporting workflows into self-service Tableau dashboards, increasing daily active report usage **among business users by 40%**.
- Built automated dbt data transformation models** integrated with Snowflake and AWS S3, improving daily data ingestion processing speed by **30%** and ensuring **99.5% data consistency**.
- Performed exploratory data analysis** using **Python (Pandas, NumPy)** on historical customer datasets, identifying key process bottlenecks and saving **\$85,000+** in annual operational costs.
- Collaborated on end-to-end A/B testing variations** for digital customer onboarding workflows, analyzing user conversion funnels and boosting form completion rates by **7.5%**.
- Developed a baseline predictive classification model in Python (Scikit-learn)** to score customer churn probability, helping the operations team proactively target high-risk accounts and improve retention by **8%**.

BrownFrame Technologies, Remote | Data Analyst

January 2025 – December 2025

- Authored **detailed data dictionaries, job aids, and SOP documentation** for 50+ business users, streamlining user onboarding and lowering recurring support tickets by **25%**.
- Engineered self-service **Power BI and Tableau dashboards** for **global business teams**, reducing client dependency on manual IT reporting requests by **40%**.
- Tuned slow-running database queries and views**, reducing report load execution times from **12 minutes to under 45 seconds** and optimizing server compute usage.
- Automated legacy Excel reporting tasks** using **Advanced XLOOKUP, Power Query, and VBA Macros**, saving the operations team **12+ hours of manual compilation weekly**.
- Executed data anomaly detection and customer segmentation scripts in **Python (Pandas, NumPy)** across multi-source sales datasets, **preventing \$18,000+** in operational revenue leakage.
- Participated in migrating legacy enterprise database tables to cloud platforms (Snowflake, AWS S3)**, validating data integrity and ensuring zero downtime during transition.
- Built dbt data transformation pipelines** integrated with Snowflake and Airflow, cutting daily ETL data sync schedules by **30%**.

PROJECTS

E-Commerce Customer Churn Prediction & Retention Analytics | Python, Scikit-learn, SQL, Tableau

- Developed a predictive classification model in **Python (Scikit-learn)** achieving an **84% ROC-AUC score**, and deployed an interactive **Tableau** dashboard that drove a **12% increase in customer retention**.

Automated Cloud Data Pipeline & Quality Framework | Snowflake, dbt, SQL, Power BI, QA Testing

- Built automated **Snowflake** and **dbt** data transformation pipelines with **embedded data quality** test assertions (QA/validation), **reducing daily ingestion processing times by 35%** and **guaranteeing 99.8% metric accuracy in Power BI**.

CERTIFICATION

- [Google Data Analytics Certificate from Google](#)
