

RUTHWIK REDDY ADAPALA

Chicago, IL | 510-560-3292 | ruthwikreddy9347@gmail.com | <https://www.linkedin.com/in/ruthwik-a-382459428/>

SUMMARY

Generative AI Data Analyst with **4+ years of experience** across BCBS, JPMorgan Chase, and Accenture, covering **healthcare, financial services, and technology analytics**. Applies **SQL, Python, machine learning, Generative AI, LLMs, Power BI, and Tableau** to build analytical solutions, predictive models, AI-assisted reporting, and data-quality processes. Delivered analytics across **3 business domains**, translating complex datasets into actionable insights and supporting data-driven decisions for enterprise stakeholders and cross-functional **business teams**.

PROFESSIONAL EXPERIENCE

Data Analyst – Generative AI | BCBS | Dallas, Texas

February 2026 – Present

- Analyzed 80K+ healthcare claims, member, provider, and encounter records using SQL, Python, and Pandas to identify utilization trends, cost drivers, anomalies, and operational reporting gaps
- Engineered 15+ Power BI dashboards and automated reporting workflows across claims processing, member utilization, provider performance, and financial analytics
- Implemented Generative AI and LLM-based analytics workflows for data summarization, unstructured-data classification, natural-language insight generation, and recurring analytical reporting
- Designed prompt engineering templates and structured-output validation processes to compare LLM responses with SQL-derived results and source datasets across 8+ analytical use cases
- Collaborated with 10+ business and healthcare stakeholders to translate analytical findings and AI-assisted insights into reporting enhancements, data-quality improvements, and actionable operational recommendations

Data Analyst | JPMorgan Chase | Hyderabad, India

January 2022 – December 2023

- Evaluated 3M+ customer, account, and transaction records using SQL and Python to identify behavioral trends, transaction anomalies, revenue drivers, and financial risk indicators
- Performed exploratory and statistical analysis across customer activity, payment behavior, account characteristics, and historical transaction data to uncover patterns affecting banking operations and financial outcomes
- Developed machine learning models for customer segmentation, transaction classification, anomaly detection, and predictive risk analysis across 6+ analytical use cases
- Constructed model-ready datasets through feature engineering, data cleansing, missing-value treatment, outlier analysis, and transformation of transaction and account-level attributes
- Produced Tableau dashboards tracking 20+ banking and operational KPIs across customer activity, transaction performance, account trends, and risk indicators
- Presented analytical findings and model outputs to 12+ risk, operations, and business stakeholders, translating technical results into actionable recommendations for financial-services processes

Data Analyst | Accenture | Hyderabad, India

February 2020 – December 2021

- Assessed 1.5M+ application, customer, and operational records with SQL and Python to uncover usage patterns, service trends, anomalies, and performance gaps across technology operations
- Applied machine learning techniques with Scikit-learn for customer segmentation, behavioral modeling, outlier identification, and predictive analytics across 5+ analytical use cases involving application and customer behavior
- Integrated data from relational databases, application logs, and business systems through SQL and Python workflows for extraction, cleansing, transformation, reconciliation, and analytical dataset preparation
- Generated Power BI and Tableau dashboards tracking 18+ application, customer, service, and operational KPIs to support technology and business performance reviews
- Automated recurring analytical reports and data-preparation activities using Python, SQL, and Excel while coordinating with technology and business teams to improve reporting consistency and address data-quality issues

CERTIFICATONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

IBM Certified watsonx Generative AI Engineer – Associate

AWS Certified Machine Learning Engineer – Associate

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, Pandas, NumPy, Exploratory Data Analysis, Statistical Analysis, Data Analysis, Data Validation, Data Quality

Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Classification, Regression, Clustering, Customer Segmentation, Anomaly Detection, Predictive Analytics, Feature Engineering, Model Evaluation

Generative AI & LLM: Generative AI, Large Language Models (LLMs), Prompt Engineering, LLM Workflows, Structured Outputs, LLM Output Validation, Natural Language Data Analysis, AI-Assisted Analytics

Business Intelligence & Visualization: Power BI, Tableau, Advanced Excel, DAX, Power Query, KPI Reporting, Dashboard Development, Data Visualization

Databases & Data Processing: Relational Databases, Data Extraction, Data Transformation, Data Cleansing, Data Reconciliation, Data Preparation, ETL Workflows

Healthcare & Financial Analytics: Healthcare Claims Analytics, Member Analytics, Provider Analytics, Utilization Analytics, Financial Risk Analytics, Transaction Analytics, Customer Behavior Analytics

EDUCATION

Illinois Institute of Technology | Master of Science in Artificial Intelligence | Chicago, IL | CGPA: 3.9/4.0

December 2025
