

# Sahaja Priya Bonagiri

## Java Full Stack Developer

3137560632 | [sahajapriya007@gmail.com](mailto:sahajapriya007@gmail.com) | [LinkedIn](#)

### Professional Summary

- **Java Full Stack Developer** with **Around 6 years** of experience in data analysis, specializing in Spring Framework technologies including **Spring REST, Spring WebFlux, Spring Web Flow, Spring Batch, and Spring Security**.
- Experienced in a range of **AWS services**, including **EC2, SQS, SNS, Elastic Beanstalk, Lambda, Code Deploy, and CloudWatch**, enabling the ability to work with diverse data analysis and cloud-based projects.
- Expertise in **DevOps** (Gitlab, Jenkins), **API integration** (GraphQL, Postman), **testing** (Mockito), and **API documentation** (Swagger UI) for efficient data analysis and project delivery.
- Experience in designing and implementing database solutions using both **relational databases** (MySQL, SQL Server) and **NoSQL** databases (MongoDB), including expertise in stored procedures, triggers, and SQL queries.

### Work Experience

#### Piper Sandler, USA

Feb 2023 – Present

##### Java Full Stack Developer

- Designed a dynamic single-page **React.js** application, leveraging functional components and hooks (useState, useEffect) to optimize state management integrated **Redux** for global state control, ensuring smooth component updates and enhanced user experience.
- Established the application's security stance by implementing robust authentication and authorization mechanisms using **Spring Security**, leading to a reduction in security vulnerabilities.
- Built a high-performance **RESTful API** using **Spring Boot**, resulting in a 20% reduction in API response times and a 15% increase in application throughput, significantly improving application performance.
- Implemented CI/CD pipelines using **AWS CodePipeline** and CodeBuild, automating deployments and reducing manual intervention by 50%, leading to faster time-to-market and development velocity.
- Designed database schemas and optimized **SQL queries**, utilizing **PostgreSQL** features like indexes and partitioning in a 30% reduction in database query response times and application performance.
- Collaborated with designers to translate **UI/UX mockups** into functional, pixel-perfect web interfaces that exceeded user expectations.
- Improved and managed the CI/CD pipeline using **Jenkins** and **Kubernetes**, implementing automated testing and deployment within an **agile** development framework for seamless backend changes integration and delivery.

#### Streebo Inc, India

Apr 2018 – Nov 2021

##### Full Stack Developer

- Created user-friendly front-end components using **Figma, HTML, and CSS**, and incorporated **React hooks** for functional component state management, ensuring smooth user experiences.
- Optimized data operations by seamlessly integrating applications with databases through **Spring Boot** and **Spring Data JPA**, ensuring efficient and reliable data transactions across the entire system architecture.
- Led sprint planning and task management using **Jira** and **Bitbucket**, improving team efficiency while advancing **J2EE** development with design patterns and integration of **SOAP** and **REST APIs**, resulting in a 20% increase in code quality and a reduction in bug rates.
- Implemented secure authentication and authorization frameworks using **Spring Security, JWT, OAuth, and LDAP**, ensuring reliable access control and safeguarding sensitive user data across multiple applications.
- Leveraged a **GraphQL API server** using graphql-http library for optimized querying from **MongoDB**, elevating throughput and ensuring efficient data transfers between client and server sides.
- Integrated **Azure DevOps** with **Git repositories** to enable seamless code versioning and collaboration, improving code quality by 30% through automated pull request validations and code reviews.
- Applied test-driven development (TDD) practices within an **Agile environment**, resulting in a 50% reduction in defects found during testing and increased code quality.

### Education

#### Master of Science in Computer Science

May 2023

Southeast Missouri State University, Cape Girardeau, MO

#### Bachelor of Technology in Information Technology

Sep 2020

Mahatma Gandhi Institute of Technology, Telangana, India

### Skills

**Methodologies and Languages:** SDLC, Agile/Scrum, Test-Driven Development (TDD), C, C++, Java (Core, Java 8/11, J2EE), SQL

**Frameworks/Libraries:** JavaScript (ES6, React.js, Angular, jQuery, Node.js), JSF, Hibernate, OAuth 2.0

**Spring Frameworks:** Spring Boot, Spring MVC, Spring REST, Spring Batch, Spring Security, Spring Data JPA, Spring Cloud

**J2EE Technologies:** Servlets, JSP, JSTL, JavaBeans, JDBC, Microservices, Multi-threading, Java Networking

**Web Technologies:** HTML5, CSS3, Bootstrap5, Ajax, JSON, XML, Redux, UI Frameworks

**Cloud & Testing:** AWS (EC2, SQS, SNS, Elastic Beanstalk, Code Deploy, CloudWatch), Azure, JUnit, Postman, Mockito, Swagger UI

**Databases & Architecture:** MySQL, PostgreSQL, Oracle, SQL Server, MongoDB, DynamoDB, Microservices Architecture

**CI/CD & Tools:** Maven, Git, Gitlab, Docker, Kubernetes, Jenkins, GraphQL
