

Saranya Namala | Python Developer

TX, USA | +1 (940)-784-3789 | saranya072026@gmail.com | [LinkedIn](#)

SUMMARY

Python Developer with over 3 years of experience designing, developing, and deploying scalable backend applications, data pipelines, and machine learning solutions. Proficient in Python, FastAPI, Flask, Django REST Framework, and modern libraries for data analysis and AI/ML model development. Experienced in building secure and high-performance RESTful APIs with OAuth2 and JWT authentication, integrating third-party services, and optimizing data workflows using Pandas, NumPy, SQLAlchemy, and relational/non-relational databases. Skilled in cloud and DevOps practices, including AWS, Docker, Terraform, and CI/CD pipelines, ensuring reliable deployment and monitoring of applications. Adept at implementing microservices architecture, performing unit testing, and maintaining code quality in Agile/Scrum environments. Strong focus on automation, performance optimization, and technical documentation to support seamless software delivery.

TECHNICAL SKILLS

Programming & Scripting: Python (3.x), Java, JavaScript (ES6+/Node.js), SQL, Bash, HTML5, CSS3, C# (familiarity)
Frameworks & Libraries: FastAPI, Flask, Django, Django REST Framework, React.js, Bootstrap, Scikit-learn, TensorFlow, PyTorch, LangChain
Machine Learning & AI: Model Training & Evaluation, Feature Engineering, LLM Integration (OpenAI API, LangChain), Prompt Engineering, Generative AI, Retrieval-Augmented Generation (RAG), MLflow, Data Pipelines Automation
Data Handling & Analysis: Pandas, NumPy, Matplotlib, Seaborn, SQLAlchemy, Tableau, Power BI
Database Technologies: PostgreSQL, MySQL, MongoDB, Database Design & Basic SQL Queries
Cloud & DevOps: AWS (S3, EC2, Lambda, CloudWatch), Docker, Terraform (IaC), Linux/Unix Environments, GitHub Actions (CI/CD)
API Development & Software Engineering: RESTful API Design, OAuth2, JWT, Swagger/OpenAPI, Microservices Architecture, Object-Oriented Design, Unit Testing (PyTest, unittest), Agile/Scrum, SDLC, Version Control (Git/GitHub), Code Reviews
Other Tools & Utilities: Postman, Visual Studio Code, Figma, Logging & Monitoring, Performance Optimization, Technical Documentation, Project Management (JIRA), Problem-Solving & Debugging (Algorithm Implementation, Testing, Optimization, Error Handling)

PROFESSIONAL EXPERIENCE

Python Developer | Change Healthcare | TX, USA Dec 2024 - Present

- Developed and preserved robust Python backend services using FastAPI and Flask, enabling healthcare teams to efficiently access, manage, and process large volumes of patient data with high reliability.
- Built, secured, and upheld RESTful APIs using JWT and OAuth2 authentication, allowing seamless integration between internal healthcare systems and multiple external platforms while ensuring data privacy.
- Optimized, and monitored complex data pipelines with Pandas, NumPy, SQLAlchemy, and PostgreSQL, ensuring accurate, reliable, and timely healthcare information across diverse sources and departments.
- Collaborated closely with data science teams to deploy, test, and fine-tune machine learning models using Scikit-learn, TensorFlow, and PyTorch, supporting predictive analytics and improving clinical decision-making outcomes.
- Managed application deployment, continuous monitoring, and scaling on AWS (EC2, S3, Lambda) using Docker and automated CI/CD pipelines, ensuring high availability, smooth release cycles, and minimal downtime.

Python Developer | HCL | India Jun 2021 – Jul 2023

- Created and maintained Python applications using Flask, FastAPI, and Django REST Framework, enhancing system performance and significantly reducing API response times across multiple business modules.
- Implemented scalable ETL pipelines with Pandas, NumPy, and SQLAlchemy, automating data processing workflows and improving efficiency while managing large datasets from diverse sources effectively.
- Built, trained, and deployed predictive machine learning models using Scikit-learn, TensorFlow, and PyTorch to generate actionable insights that enhanced operational decisions and business outcomes across departments.
- Integrated RESTful APIs and third-party services using secure authentication protocols such as JWT and OAuth2, enabling reliable and seamless data exchange between internal systems and external platforms.
- Streamlined deployment processes and sustained CI/CD pipelines using GitHub Actions, Docker, and Terraform, reducing deployment errors and accelerating release cycles for production applications efficiently.
- Collaborated in Agile/Scrum teams, performing code reviews, unit testing with PyTest and unittest, and performance optimization to deliver maintainable, high-quality software with comprehensive documentation.

EDUCATION

Masters in Computer Science | University of north Texas, Dallas, USA May 2025
Coursework: Scientific Data Visualization, Computer Architecture, Data Structures, Machine Learning, Artificial Intelligence, Computational Theory, Comparison of Learning Algorithms

Bachelors in Computer Science | Malla Reddy institute, India Jun 2023
Coursework: Data structures, database management systems, Machine Learning, Scripting Language, AI, Software Engineering, Cyber Security, information retrieval systems

PROJECTS

Automatic Meeting Minutes Generator

- Created an application that processes audio/text transcripts into concise summaries, identifying key topics, decisions, and action items.
- Tackled debugging challenges in NLP pipelines using spaCy, NLTK, and BART to improve accuracy.
- Designed a web interface with Flask/Django, ensuring scalability and responsiveness.
- Tech: Python, AWS Transcribe, Whisper (OpenAI), Flask/Django

E-commerce Development Project

- Built a secure clothing e-commerce platform using Django, React.js, PostgreSQL, and AWS.
- Integrated MFA and SSL/TLS-secured payment gateways, defending against SQL injection, brute force attacks, and e-skimming.
- Worked in an Agile team, managing tasks with JIRA and Git while debugging backend and UI issues during sprints.
- Optimized user experience with responsive UI, shopping cart, and streamlined checkout.
