New Jersey, USA | 857-263-9114 | shobhitha811@gmail.com | [LinkedIn](#)

EDUCATION

Northeastern University, Boston, MA

Sep 2022 - Dec 2024

Master of Science - Information Systems

Ramaiah Institute of Technology, India

Aug 2017 - Aug 2021

Bachelor of Engineering – Electronics and Instrumentation

TECHNICAL SKILLS

Databases: MySQL, SQL Server, Oracle, PostgreSQL, NoSQL (MongoDB, DynamoDB)
Programming Languages: SQL, Python(Pandas, NumPy)
ETL Tools: Talend Studio, Alteryx, SSIS, Informatica, Apache Spark, Apache Airflow
Cloud Technologies: AWS (S3, Redshift, EC2, RDS, Glue, Athena, Lambda, Quicksight, Kinesis), Azure Data Factory, Azure Databricks, BigQuery, Snowflake
Data Visualization: Tableau, MS Power BI, Looker, QlikView
Other Tools: GitHub, Jira, ER Studio, Excel, PowerPoint, Bitbucket, Sharepoint, Jupyter Notebook, Visual Basic
Soft Skills: analytical skills, written and verbal communication skills, fast-paced, growth mindset, attention to detail, problem-solving skills, interpersonal skills, self-starter, organizational skills, critical thinking

PROFESSIONAL EXPERIENCE

OrbisIQ Inc, USA

Feb 2026 - Present

Data Analyst

- Developed complex **SQL queries**, CTEs, and window functions to analyze procurement and supplier performance data, uncovering process bottlenecks that improved RFQ turnaround time and reporting accuracy by **25%**
- Built automated **ETL pipelines** integrating data from multiple business systems, improving data consistency, reducing manual intervention by **35%**, and supporting scalable reporting solutions
- Owned the development and enhancement of **Power BI** dashboards and reports, translating business and product requirements into clear visual metrics and KPIs, improving insight visibility and enabling leadership and product teams to make informed decisions

IpsenLab LLC, USA

Feb 2025 - Jan 2026

Data Analyst

- Led enterprise-level data quality analysis on large procurement and financial datasets using **SQL**, ensuring high data integrity for internal analytics and product reporting used by cross-functional teams
- Streamlined data validation and transformation workflows through **Python (Pandas)**, reducing manual effort by **30%** and improving reliability of product-ready datasets
- Collaborated with cross functional teams to identify, investigate, and resolve critical data discrepancies, using **Microsoft Excel** for validation, reconciliation, and ad hoc analysis, delivering corrected outputs within **6 hours** and consistently exceeding stakeholder reporting **SLAs**

State Street Corporation, USA

Jul 2023 - Dec 2023

Data Analyst

- Utilized financial data for Investment Management analysis and spearheaded the design of a dynamic documentation system, ensuring compliance and leveraging **SQL**, reducing manual efforts by **90%**
 - Leveraged complex SQL queries to **extract, transform, and load** data into **AWS Redshift** from multiple sources. Enhanced data efficiency and reduced retrieval times by **40%**, improving accessibility for cross-functional teams
 - Developed interactive and visually compelling dashboards and reports using **Tableau**, facilitating stakeholders to gain insights into key performance indicators (**KPIs**) and trends, resulting **20%** increase in decision-making optimization
 - Facilitated Agile stand-ups and managed **Jira** backlogs, translating investment reporting requirements into user stories and accelerating reporting enhancements by **20%**
-

ACADEMIC PROJECTS

IMDB Movies and Data Analysis (Alteryx, SQL Server, Power BI)

- Staged 100 million rows of worldwide movie details from IMDB, Movie Lens TSV files using **Alteryx**
- Architected a dimensional model using **ER Studio** and **SQL** to build a data warehouse of IMDB, Movie Lens data
- Optimized **ETL pipelines** in Alteryx ensuring one-click data loading into DW from staging tables, implemented robust error handling, and created dynamic dashboards in **Power BI** for actionable insights

Blood Donation Management System (SQL Server, ER Studio, Tableau)

- Designed an **Entity-Relationship Model** in Third Normal Form using **ER Studio**, implemented **SQL** computed columns, views, functions, and triggers, and developed compelling **Tableau** dashboards to extract actionable insights and trends
