SUMMARY

Results-driven Data Analyst with 5 years of experience delivering end-to-end analytics solutions across healthcare, finance, and education domains. Proven track record of transforming raw data into actionable insights through advanced SQL, Python, and BI tools. Skilled in the full data analytics lifecycle including data extraction, cleansing, transformation, analysis, visualization, and stakeholder storytelling. Demonstrated success in improving reporting efficiency, increasing data accuracy, and driving measurable business impact through data-driven decision-making in fast-paced Agile environments.

SKILLS

- **Analytics & Querying:** SQL (Advanced), Data Exploration, Data Profiling, Ad-hoc Analysis, Root Cause Analysis, KPI Development
- **Programming & Data Handling:** Python (Pandas, NumPy), Data Cleaning, Data Transformation, Statistical Analysis
- **Visualization & BI Tools:** Power BI, Tableau, Looker, Excel (Power Query, Power Pivot, Advanced Formulas, Pivot Tables), Dashboard Design
- **Data Management:** Data Validation, Data Quality Monitoring, Data Modeling (Snowflake), Data Integration
- **Business Analytics:** A/B Testing, Experiment Design, Trend Analysis, Forecasting Basics, Stakeholder Reporting, Insight Storytelling
- **Tools & Collaboration:** Git, Agile/Scrum, JIRA, Cross-functional Collaboration, Requirements Gathering, Documentation

EXPERIENCE

Senior Data Analyst | Publicis Groupe | Los Angeles

Oct 2025 – Present

- Executed end-to-end data analysis across healthcare datasets by extracting and querying large-scale data using advanced SQL, enabling faster reporting cycles and improving decision turnaround time by 30%.
- Cleaned and transformed multi-source datasets using Python (Pandas, NumPy) to standardize data structures and resolve inconsistencies, improving downstream reporting accuracy by 35% and strengthening overall data reliability.
- Designed and deployed interactive Power BI and Tableau dashboards to track operational KPIs and performance metrics, providing leadership with real-time visibility into trends and enabling faster data-driven decisions.
- Conducted deep-dive exploratory analyses to identify utilization trends, anomalies, and performance gaps, driving data-backed process improvements and measurable operational efficiency gains.
- Partnered with business stakeholders to translate ambiguous requirements into structured analytical workflows, aligning data outputs with business objectives and enabling more informed, data-driven decisions.
- Implemented automated validation checks and reconciliation frameworks to proactively detect data inconsistencies, reducing discrepancies and improving trust in reporting outputs across business stakeholders.
- Developed recurring executive reports and analytical narratives that translated complex data into clear, actionable business recommendations. Presented insights to senior stakeholders, enabling informed decision-making and strategic planning.
- Streamlined reporting workflows by standardizing reusable queries and templates, reducing manual effort and significantly improving reporting efficiency across teams.

Data Analyst | Department of Education, Los Angeles, CA

Nov 2024 – Oct 2025

- Built automated Power BI dashboards integrating academic, operational, and spatial datasets to deliver unified institutional insights, improving reporting efficiency by 20% through self-service analytics and reduced manual reporting dependencies.
- Extracted and transformed raw data from Excel, internal databases, and GIS systems to standardize and consolidate multi-source datasets, enabling centralized analytics for academic planning and performance tracking initiatives.
- Performed large-scale data cleansing and normalization to standardize reporting metrics across departments and improve overall data consistency.
- Delivered ad-hoc analyses and executive summaries to leadership, enabling data-driven decisions for resource allocation and student outcomes.
- Designed reusable data models and calculated measures to support scalable reporting and reduce dashboard refresh complexity.
- Implemented data validation rules and reconciliation frameworks, improving reporting reliability and minimizing stakeholder escalations.
- Collaborated with cross-functional academic and operations teams to define KPIs and reporting requirements aligned with institutional goals.
- Reduced reliance on manual Excel reporting by implementing automated data refresh pipelines and centralized dashboards, significantly improving reporting speed and scalability.

Data Analyst | Infosys, Hyderabad, India

May 2021 – Dec 2023

- Analyzed large financial datasets using advanced SQL queries and performance-tuned joins to extract meaningful patterns, enabling faster insights into customer behavior and key operational metrics.
- Developed executive Tableau dashboards tracking customer engagement, KPIs, and digital adoption, increasing stakeholder engagement by 30%.
- Conducted exploratory data analysis to identify performance bottlenecks and behavioral trends, influencing product and workflow optimizations.
- Automated recurring reporting workflows using SQL and Python, reducing manual effort and improving report delivery timelines.
- Designed A/B testing analysis frameworks to evaluate product feature effectiveness and quantify user engagement improvements.
- Integrated structured and semi-structured datasets for holistic analytics, enabling cross-domain insights across business units.
- Standardized enterprise reporting definitions and metric logic, improving consistency and trust in analytics outputs across teams.
- Partnered with product managers, analysts, and engineers in Agile environments to translate business questions into analytics requirements, defining KPIs and delivering insights for product and operational decisions.

EDUCATION

University of Cincinnati – Master of Science in Information Technology

Jan 2024 – May 2025
