PROFESSIONAL SUMMARY

People-centered analyst and consultant with a talent for understanding problems at their roots, blending analytical precision with empathy to deliver solutions that inspire trust, confidence, and measurable results. Known for building strong relationships through reliability, collaboration, and a genuine focus on people, fostering environments where teams feel supported and business goals are achieved.

Experienced Business Analyst and Scrum Master with 5+ years leading digital transformation across enterprise finance and retail systems. Skilled in translating complex requirements into actionable solutions that improve efficiency, accuracy, and customer satisfaction. Currently driving multi-brand technology modernization at Inspire Brands, aligning business strategy with system enhancements to deliver meaningful impact.

Work Experience

Client: Inspire Brands

Dec 2022 – Present

Position: Scrum Master

- Lead multiple Agile teams through sprint cycles across multi-million-dollar enterprise initiatives, improving sprint predictability and delivery consistency by aligning priorities and removing blockers early.
- Partnered with Product Owners to refine backlogs and clarify acceptance criteria, resulting in faster decision-making and fewer scope changes during sprint execution.
- Coached QA and business users through SIT and UAT testing, helping them manage defects efficiently and apply structured testing strategies enabling smoother releases and reducing post-deployment issues by 25%.
- Collaborated with cross-functional teams across IT, Finance, and Product to resolve dependency challenges, ensuring on-time delivery of critical ERP and payment integration features.
- Supported requirement gathering and documentation for major banking and payment vendor integrations, improving payables and receipts workflows for franchise operations and enhancing transaction visibility.
- Provided sprint health metrics and KPI reporting to leadership, improving transparency and enabling better forecasting of delivery timelines.
- Mentored new team members on Agile principles and Jira best practices, helping the team increase ownership, communication, and overall Agile maturity.
- Fostered trusted client relationships by clearly communicating insights and recommendations that enhanced decision-making and project transparency.

Teleperformance

Jan 2020 – July 2021

Position: Business Analyst

- Partnered with finance teams to streamline invoice and journal processes, reducing manual effort and close cycles, while consistently delivering solutions across high-value, time-sensitive projects.
- Bridged communication gaps between business users and IT by translating needs into clear requirements and actionable plans, helping teams stay aligned and confident under pressure.
- Led UAT efforts with cross-functional teams, ensuring system changes met business goals while supporting team morale through hands-on guidance and open collaboration.
- Built trusted relationships with stakeholders by listening actively, solving problems thoughtfully, and keeping delivery focused on real business value not just technical fixes.

Education

Master of Science in Information Technology, University of the Cumberlands – Williamsburg, Kentucky, USA
