

Sravani Gangaraju

Business Data Analyst

Farmington Hills, MI • +1 248-772-9314 • sravanigangaraju21@gmail.com • www.linkedin.com/in/sravani-businessdataanalyst/

PROFESSIONAL SUMMARY

Business Data Analyst with 4+ years of experience delivering data-driven insights, scalable BI solutions, and process automation across financial services and technology industries. Deep expertise in **SQL, Python, Power BI, and Tableau**, with a growing specialization in **AI-augmented analytics** by including **Generative AI prompt engineering, Microsoft Copilot, and LLM-assisted workflow automation**. Proven track record of partnering with cross-functional stakeholders to reduce manual reporting burden, accelerate insight delivery, and modernize analytics operations for **US-based organizations**.

CORE COMPETENCIES

Data Analysis & Visualization • Business Requirements Gathering • Stakeholder Management • SQL Querying & Optimization • Dashboard & Report Development • KPI Tracking • Process Improvement & Automation • Generative AI / Prompt Engineering • AI-Augmented Analytics • ETL Pipeline Development • Agile / Scrum • UAT & QA • Data Governance • Forecasting & Trend Analysis • Root Cause Analysis

TECHNICAL SKILLS

Languages & Querying: SQL (Advanced — T-SQL, CTEs, stored procedures), Python (pandas, NumPy, matplotlib, openpyxl), DAX

Visualization & BI: Power BI (data modeling, DAX, RLS), Tableau (intermediate), Excel (Power Query, pivot tables, advanced formulas, VBA macros)

AI & Automation Tools: Microsoft Copilot (Excel, Power BI, Teams), ChatGPT / OpenAI API (prompt engineering, data summarization, report drafting), GitHub Copilot (SQL & Python productivity), LLM-assisted ETL documentation

Databases & Platforms: MS SQL Server, Oracle, Snowflake (basic), Azure Data Factory (basic), Jira, Confluence, SharePoint, Visio, Lucidchart

Methodologies: Agile / Scrum, Waterfall, SDLC, BPMN process mapping, UAT coordination, Requirements Traceability

PROFESSIONAL EXPERIENCE

Senior Business Data Analyst | **PNC Bank** • Michigan, USA

Sep 2023 – Present

- **Designed and deployed 14 Power BI dashboards** monitoring portfolio performance, settlement efficiency, and regulatory compliance KPIs for 65+ stakeholders across Operations, Risk, and Finance — reducing ad-hoc reporting requests by 42%.
- **Integrated Microsoft Copilot** into the team's Power BI and Excel reporting workflows, **reducing dashboard annotation and commentary drafting time by 35%** and enabling analysts to focus on higher-value analytical tasks.
- **Authored 20 BRDs and Agile user stories** for core banking reporting enhancements across 4 sprint teams, sustaining a 94% on-time delivery rate and reducing post-deployment rework by 28%.
- **Built a Python automation pipeline** (pandas, openpyxl) to reconcile daily trade settlement data across 3 source systems — eliminating 15 hours of manual monthly processing and cutting reconciliation errors by 34%.
- **Leveraged ChatGPT-assisted prompt engineering** to accelerate SQL query documentation and data dictionary generation, **reducing documentation effort by ~50%** across 30+ recurring reports and improving audit-readiness.
- **Coordinated UAT for 3 CCAR-aligned regulatory reporting modules**, managing 200+ test cases and achieving a 97% first-submission pass rate — strengthening stakeholder confidence in reporting accuracy.

Data Analyst / Business Analyst | **Dataone Solutions** • India

Jan 2021 – Jul 2022

- **Delivered 18 Tableau and Power BI dashboards** for 6 enterprise clients across retail, logistics, and BFSI sectors, reducing client reporting turnaround from 3 days to same-day and achieving a 94% client satisfaction score.
- **Pioneered use of OpenAI API** to automate generation of narrative business summaries from structured SQL query outputs, **cutting manual report-writing time by 60%** for 5 recurring monthly client deliverables.
- **Constructed end-to-end Python + SQL data pipelines** ingesting 4 GB/day of raw transactional data into a normalized reporting schema, enabling daily KPI refresh across 12 dashboards and reducing data preparation time by 45%.
- **Conducted SQL-driven root cause analysis** on 2+ years of customer transaction data, surfacing churn drivers that informed a client retention strategy projected to recover ~\$180K in annual recurring revenue.
- **Gathered requirements for 5 concurrent analytics products** via stakeholder interviews, JAD sessions, and process mapping — translating findings into prioritized backlogs and accelerating time-to-delivery by 22% over 2 quarters.
- **Trained 20+ end users** on deployed BI dashboards and **AI-assisted reporting tools**, achieving 90% self-service adoption within 30 days and reducing analyst support tickets by 36%.

EDUCATION

Master's degree in computer science • Lawrence Technological University and Southfield, MI - USA
