

SREE LAKSHMI DHANALA

469-642-5883 | sreelakshmi3506@gmail.com

SUMMARY

Data Engineer with 2 years of experience in data integration, cleaning, validation, analytics-ready data modeling, and reporting. Proficient in Python, SQL, Pandas, Apache Airflow, Snowflake, Power BI, and Tableau, with experience preparing customer, subscription, product-usage, and support data for analysis. Currently pursuing a Master of Science in Data Science and interested in AI-driven, user-centered product analytics.

SKILLS

Programming: Python, SQL, Java, R

Data Engineering: ETL/ELT, Apache Airflow, Pandas, PySpark, Batch Processing, Data Integration, Data Validation, Pipeline Monitoring

Databases and Data Warehouses: MySQL, PostgreSQL, Snowflake

Cloud Technologies: AWS S3, AWS Lambda, Azure Data Lake Storage

Big Data and Streaming: Apache Spark, PySpark, Kafka, Spark Structured Streaming

Data Integration: REST APIs, Webhooks, JSON, CSV

Analytics and Visualization: Power BI, Tableau, Microsoft Excel, DAX, Looker

Development Tools: Git, GitHub, Docker, Jira, Linux

Data Concepts: Data Modeling, Dimensional Modeling, Star Schema, Data Warehousing, Data Quality, Agile, UAT, CI/CD, Statistics, Hypothesis Testing

CERTIFICATIONS

- AWS Certified Data Engineer – Associate
- Databricks Certified Data Engineer Associate

EXPERIENCE

Fresh works

Associate Data Engineer

Chennai, India · Sep 2023 - Dec 2024

- Developed and maintained ETL pipelines using Python, SQL, and Apache Airflow to integrate customer, subscription, product-usage, and support-ticket data from relational databases, REST APIs, and cloud storage.
- Built reusable Python and SQL transformations to clean, standardize, join, and aggregate structured and semi-structured datasets, supporting exploratory data analysis and descriptive statistics for analytics and reporting.
- Loaded processed data into Snowflake and created analytics-ready fact and dimension tables using data modeling principles for customer, subscription, product, support-ticket, agent, and calendar-date reporting.
- Implemented incremental data-loading processes, duplicate detection, null-value validation, referential-integrity testing, and source-to-target reconciliation checks.
- Created and scheduled Apache Airflow workflows with task dependencies, retry logic, failure alerts, logging, and backfill support.
- Optimized SQL queries and transformation logic to improve pipeline execution time and performance of analytics dashboards, including Looker reporting.
- Collaborated with product managers, analysts, and engineering teams to define data requirements, source mappings, transformation rules, and key business metrics, communicating data findings and reporting needs clearly across teams.
- Investigated production pipeline failures by reviewing logs, identifying source-data issues, rerunning affected tasks, and documenting root causes.

Data Engineering Intern

Chennai, India · Mar 2023 - Aug 2023

- Assisted in extracting customer, subscription, product-usage, and support data from MySQL databases, CSV files, and REST APIs.
- Developed Python and SQL scripts to remove duplicate records, standardize timestamps, validate identifiers, and prepare datasets for reporting.
- Supported ETL testing by comparing source and target record counts, validating transformed fields, and reviewing aggregate totals.
- Created source-to-target mapping documents, data dictionaries, validation reports, and technical pipeline documentation.
- Monitored scheduled data-processing jobs, reviewed pipeline logs, documented failures, and worked with senior engineers to resolve data-quality issues.
- Developed Power BI validation reports and dashboards to analyze customer activity, subscription trends, product adoption, and support-ticket volumes, highlighting key user and product performance metrics.

EDUCATION

University of North Texas

Master of Science, Data Science

Jan 2025 - Dec 2026

Denton, TX

R.M.K College of Engineering

B.E, Electronics and Communication and Engineering

Aug 2019 - Mar 2023

Chennai, India
