

SRIHARI VEERAPANENI

DATA ANALYST | BUSINESS INTELLIGENCE | SQL | POWER BI | PYTHON
srihariv98701@gmail.com | +1 315-603-7330 | LinkedIn

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience using SQL, Python, Power BI, Tableau, and Excel to analyze large datasets, automate reporting, develop KPI dashboards, and deliver actionable business insights. Experienced in data extraction, transformation, validation, data quality, root-cause analysis, and stakeholder reporting across risk, operations, and healthcare analytics environments. Proven ability to analyze 2M+ records, automate recurring reporting workflows, build self-service dashboards, and translate complex data into clear recommendations for business and operational teams.

TECHNICAL SKILLS

Data Analysis & BI: Data Analysis, Business Intelligence, KPI Reporting, Dashboard Development, Data Visualization, Ad Hoc Analysis, Trend Analysis, Root Cause Analysis, Statistical Analysis

SQL & Databases: SQL (Joins, Subqueries, Window Functions), MySQL, PostgreSQL, SQL Server, Data Extraction, Data Validation, Relational Database Design

BI & Visualization: Microsoft Power BI, Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, Advanced Formulas),

Programming: Python (Pandas, NumPy, Scikit-learn)

Data Engineering & Quality: ETL Pipelines, Data Transformation, Data Cleaning, Data Wrangling, Data Governance, Data Quality Management

Analytics & Modeling: Regression, Classification, Clustering, Forecasting, Hypothesis Testing, A/B Testing

Tools: Jupyter Notebook, Git/GitHub, Google Analytics, MS Office Suite

Also Familiar With: *PySpark, Snowflake, Looker*

PROFESSIONAL EXPERIENCE

Data Analyst – Risk, Controls & Compliance Analytics

June 2025 – Present

Spire Inc. | Missouri, USA

- Analyzed 2M+ transaction and operational records using SQL and Python to identify anomalies and control exceptions, giving the risk team earlier visibility into emerging operational issues.
- Owned end-to-end delivery of 3 Power BI dashboards covering 20+ risk and operational KPIs, partnering directly with 4 team leads to define requirements and giving 30+ stakeholders self-service visibility into performance and risk.
- Automated Python-based ETL workflows across 6 data sources, cutting data-prep time from 6 hours to 90 minutes per cycle and standardizing datasets used for executive reporting.
- Developed a Python classification model using 15+ business variables, achieving 87% accuracy in identifying higher-risk operational patterns and supporting proactive review of control issues.
- Investigated a 12% decline in operational performance through transaction, staffing, and process-level KPI analysis; presented root-cause findings and recommendations directly to leadership.
- Implemented repeatable data-validation and governance controls across reporting datasets, reducing executive-reporting data-quality errors by 25%.
- Partnered with business and operations teams to validate reporting logic, translating findings into actionable insights for risk and compliance decision-making.

Data Analyst Intern – Healthcare Claims Analytics

Feb 2024 – Apr 2025

MedPro | New York, USA

- Analyzed 1M+ healthcare claims using SQL and Python to identify trends in claim volume, utilization, denial rates, and cost drivers, informing payer reporting decisions.
- Cleaned and validated claims, eligibility, and provider datasets, resolving 30K+ duplicate or inconsistent records to improve reporting accuracy for downstream stakeholders.
- Built 3 Power BI dashboards with 15+ KPIs on claims volume, denial rates, utilization, and cost trends; conducted ad hoc analysis on high-cost claim patterns for leadership review.
- Automated recurring claims-analysis workflows in SQL and Python, cutting reporting-prep time ~67% (6 hours to 2 hours per cycle).

- Validated Power BI outputs against SQL queries and source claims data, catching data-quality issues before stakeholder delivery and improving reporting consistency.

Data Analyst

Apr 2022 – May 2023

Cloud Counselage Pvt. Ltd. | India

- Queried large-scale relational databases (MySQL) using advanced SQL to extract insights on customer behavior, delivering ad hoc analysis and recommendations to stakeholders.
- Partnered with cross-functional teams to gather reporting requirements and translate business questions into SQL queries and dashboard views, improving turnaround time on ad hoc requests.
- Built and maintained recurring Power BI and Excel dashboards centralizing KPI tracking; strengthened data governance by cleaning and validating multi-source datasets, cutting downstream reporting errors by 25%.
- Used Python to support data processing and analysis for customer behavior insights, complementing SQL-based querying and reporting.

EDUCATION

Master of Science in Computer Science

Aug 2023 – May 2025

Clarkson University | New York, USA

Bachelor of Technology in Computer Science

Jul 2019 – May 2023

Gudlavalleru Engineering College | Andhra Pradesh, India

CERTIFICATIONS & TRAINING

- Microsoft Power BI Data Analyst Associate (PL-300)
- Google Data Analytics Professional Certificate (Coursera)
