

# SRINIVAS KAIPU

Oviedo, Florida, USA | (443) 851-9290 | [srinivaskaipu27@gmail.com](mailto:srinivaskaipu27@gmail.com)

## SUMMARY

AWS DevOps Engineer with 2+ years of experience automating cloud infrastructure and application deployments across development, staging, and production environments. Skilled in AWS, Terraform, CloudFormation, Jenkins, GitHub, Docker, Linux, Bash, and Python, with experience building CI/CD pipelines, containerizing applications, and implementing monitoring and high-availability solutions. Seeking a junior DevOps role focused on reliable infrastructure and deployment automation.

## TECHNICAL SKILLS

- **Cloud Computing:** EC2, S3, RDS, VPC, IAM, ALB, Route53, Lambda, ECS, ECR, CloudWatch, SNS, SQS, Google Cloud Platform, Microsoft Azure
- **Infrastructure as Code:** Terraform, CloudFormation
- **CI/CD:** Jenkins, GitHub Actions, GitLab CI, AWS Code Pipeline, Code Deploy
- **Containers & Orchestration:** Docker, Kubernetes
- **Configuration Management:** Ansible
- **Monitoring & Logging:** ELK Stack, Splunk, Nagios, Grafana, Prometheus
- **Scripting:** Bash, Python, JavaScript, PHP
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Databases:** MySQL, MongoDB, DynamoDB, Cassandra
- **Operating Systems:** Linux (RHEL, Ubuntu, CentOS), UNIX, Windows

## PROFESSIONAL EXPERIENCE

### Deloitte | AWS Cloud/DevOps Engineer

Oct 2025 - Present

- Architected and deployed highly available AWS infrastructure using VPC, EC2, RDS, IAM, and Route53 across development, staging, and production environments, supporting reliable enterprise application operations.
- Automated infrastructure provisioning using Terraform and CloudFormation, reducing manual configuration effort by 60%.
- Built and maintained Jenkins and GitHub-based CI/CD pipelines, decreasing application deployment time by 65%.
- Implemented Blue/Green deployment strategies to minimize downtime and ensure zero-disruption releases.
- Containerized applications with Docker and deployed them through AWS ECS, improving release consistency and scalability.
- Implemented Auto Scaling and Load Balancing strategies achieving 99.9% system uptime.
- Configured centralized logging and monitoring with CloudWatch and the ELK Stack, using Python scripts to automate alerts and reduce incident resolution time by 40%.
- Managed Kubernetes container orchestration with Amazon EKS, enabling scalable microservices deployments and improving deployment reliability.
- Implemented security-hardening practices-including least-privilege IAM policies, secure VPC design, and encrypted EBS storage-enhancing compliance and reducing security-incident frequency.
- Designed IAM policies and role-based access controls using AWS IAM, tightening cloud security posture and decreasing permission-related alerts.
- Managed VPC networking, including subnets, route tables, security groups, and NACLs, using Ansible automation in Linux environments to improve network security and reduce latency.
- Developed Python automation scripts for routine system checks and backups across Linux environments, improving operational efficiency by 30%.

### Persistent Systems | Cloud Engineer

Oct 2022 - Aug 2023

- Designed and deployed AWS infrastructure, including VPC, EC2, and RDS, using Terraform to support application migrations and accelerate cloud deployments.
- Built Jenkins pipelines that automated Terraform-based deployments from Git repositories, reducing manual steps and deployment errors.
- Implemented Auto Scaling groups and high-availability architectures using ELB and RDS, ensuring continuous service availability and improving system resilience.
- Supported disaster recovery and backup automation by configuring AWS Backup, S3 versioning, and automated RDS snapshots on Linux systems, improving recovery readiness and reducing potential data loss.
- Optimized AWS resource utilization, reducing overall cloud costs by 20%.
- Wrote modular CloudFormation templates in YAML to automate provisioning of EC2, RDS, IAM, S3, and networking components, integrating them with GitHub Actions for CI/CD to cut infrastructure setup time by 50% and eliminate manual configuration errors.
- Monitored AWS environments with CloudWatch to maintain availability, performance, and security, promptly troubleshooting and resolving incidents to keep services running without disruption.

## EDUCATION

### Wilmington University

Master of Science, Information Assurance

Aug 2023 - May 2025

Delaware, USA

- **Coursework:** Network Security, Cryptography, Risk Management, Security Architecture

### Jawaharlal Nehru Technological University Hyderabad

B. Tech, Computer Science and Engineering

Jul 2018 - Mar 2022

Hyderabad, India

- **Coursework:** Data Structures & Algorithms, Database Management Systems, Cloud Computing
