EDUCATION

- **University at Buffalo (SUNY Buffalo)** Buffalo, NY
Masters in Computer Science; GPA: 3.5/4.0
Aug 2024 - Dec 2025
Courses: Analysis Of Algorithms, Operating Systems, Data Models & Query Language, Machine Learning, Data Intensive Computing, Databases
- **Guru Nanak Institutions Technical Campus** Hyderabad, TS
Bachelor of Science in Computer Science; GPA: 8.86/10.0
Aug 2019 - July 2023
Courses: Data Structures & Algorithms, Relational Data Base Management Systems, Machine Learning, Networking, Web Development

SKILLS SUMMARY

- **Languages:** Python, SQL, HTML, CSS, JavaScript, C, C++, Linux, GoLang
- **Frameworks:** React, TensorFlow, PyTorch, Flask, FastAPI, Streamlit
- **Technologies:** Hadoop, Spark (PySpark), Docker, Git, MLflow, GitHub Actions, AWS, GCP, MySQL, PostgreSQL
- **Computer Science Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Relational Databases, System Design, API Design & Integration

EXPERIENCE

- **Doctorite Inc** Hyderabad, India
Software Engineer
Jan 2024– Jun 2024
 - Developed **reusable UI components** and integrated **REST APIs** for Doctorite.ai, increasing development speed by **20%** and enabling rapid rollout of features.
 - Integrated **Gemini AI models** to analyze patient assessments and auto-suggest care plans, follow-up questions, and assessment frequencies — **improving BHN'S workflow efficiency by 75%**.
 - Retrieved and processed patient data from **AWS S3**, deployed backend services on **EC2**, streamlining operations and enhancing **delivery reliability by 25%**.
- **ValueLabs** Hyderabad, India
Software Engineer Specialist
Nov 2022– Nov 2023
 - Contributed to the **Tata Play project** by writing and optimizing **PySpark and Hive queries** for internal reporting, supporting business analytics workflows.
 - Monitored and maintained **cron-based jobs and Hadoop nodes**, performing regular validation and debugging of Hive queries to ensure reliable data flow.
 - Developed a **conversational chatbot** for the **Snapfish e-Commerce** platform to handle queries on orders, products, and support, reducing manual effort and improving user **satisfaction by 60%**.
 - Integrated the chatbot into the website UI, added **fallback handling** for unknown queries, and logged user interactions to enhance future model iterations.
- **Rinex Technology** Bengaluru, India
AI Intern
Nov 2021 – Jan 2022
 - Built a **student feedback prediction model** using **supervised learning** techniques in Python and Scikit-learn, aiding in understanding user satisfaction trends.
 - Contributed to back-end logic design and **API testing**, ensuring seamless integration of the model into RineX.AI platform with smooth data flow.
- **SkillVertex** Bengaluru, India
Machine Learning Intern
Sep 2021 - Nov 2021
 - Performed **web scraping** using Python to gather and preprocess raw data from multiple online sources, streamlining the training pipeline for real-world datasets.
 - Built a **customer churn prediction model** using decision trees with **accuracy 85%**, offering actionable insights to reduce attrition.

PROJECTS

- **Scalable URL Shortener (Bitly Clone) (Flask, PostgreSQL, Docker, GCP, REST APIs):** Created a URL shortening service with features like custom aliases, expiration, and click tracking, backed by a PostgreSQL database and built using Flask. Containerized the app with Docker and deployed it on GCP, exposing REST APIs publicly for link redirection and analytics tracking.
- **Resume Matching System (Python, NLP, TF-IDF, Cosine Similarity, Streamlit, Docker, Render):** Built a tool to match resumes with job descriptions using TF-IDF and cosine similarity, and designed an interactive frontend with Streamlit to visualize matching results. The backend was trained and containerized with Docker, deployed in Render, and connected to the front end via the REST API for a fully functional web app.
- **Comparative Analysis of ML Models for Smart City Use Cases (Python, Flask, scikit-learn, ML Model Evaluation, Classification, Academic publication):** Designed and evaluated ML models—including SVM, Decision Trees, and Deep Learning—for smart city applications, built a Flask-based web app to present model comparisons, and published the research in IJISRT (Vol. 8- 2023, Issue 9): Scribd: <https://tinyurl.com/4xfnftf>
