

Triveni Kandimalla

Atlanta, GA | +1 (470) 652-2856 | trivenikandimalla79@gmail.com | [LinkedIn](#)

Professional Summary

QA Automation Engineer with 3+ years of experience building and scaling automated test frameworks across web, API, and mobile platforms including iOS and Android. Expert in Playwright, Selenium, Appium, XCUITest, and UiAutomator2 for end-to-end testing, with a strong focus on Java-based automation. Proven track record of leveraging AI-assisted tools such as Tricentis Testim, Mabl, and AppliTools, and utilizing Docker for containerized test execution and Jenkins for robust CI/CD integration. Highly collaborative in Agile environments, with expertise in defect triage, framework architecture, and cross-team documentation.

Skills

Programming Languages: Java, SQL, JavaScript, Typescript

Automation Tools: Playwright, Selenium WebDriver, Appium, Postman, RestAssured

Mobile Testing: Appium (iOS & Android), XCUITest, UiAutomator2, BrowserStack, Sauce Labs

AI-Powered Testing: Tricentis Testim, Mabl AI, AppliTools Visual AI, GitHub Copilot

Frameworks: TestNG, JUnit, Maven, Cucumber (BDD), Page Object Model (POM), Data-Driven Framework, Hybrid Framework

CI/CD & DevOps: Jenkins, Azure DevOps, GitHub Actions, Git, Continuous Integration, Continuous Testing

API & Database Testing: REST API Testing, Postman, RestAssured, SQL Server, Database Validation, JSON, XML

Test Management: Jira, Xray, Azure Boards, Test Planning, Defect Tracking, Test Execution

Testing Types: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, End-to-End Testing, Cross-Browser Testing, UI Testing, API Testing, Visual Testing

Methodologies: Agile, Scrum, SDLC, STLC, Defect Lifecycle, Risk-Based Testing

Work Experience

Freddie Mac, USA | QA Automation Engineer

January 2026 – Present

- Modernized UI testing framework by integrating Playwright TypeScript alongside existing Selenium WebDriver Java, increasing framework scalability and execution speed for mortgage and loan-servicing workflows; authored 60+ UI test cases including regression, smoke, and cross-browser; automated 25+ REST APIs utilizing Postman, RestAssured, and SQL for database validation.
- Wired new test cases into existing Jenkins CI/CD pipelines using Maven and began adopting GitHub Copilot and Tricentis Testim to speed up test authoring and cut day-to-day maintenance effort.
- Took part in Agile/Scrum ceremonies, including sprint planning, daily standups, and defect triage, coordinating closely with developers, business analysts, and product owners across multiple sprint cycles.
- Built a small Java/SQL utility to auto-generate test data for common scenarios, cutting manual environment setup from hours to minutes for recurring test cycles.

Streebo Inc, India | QA Automation Engineer

May 2021 - July 2024

Web Testing:

- Architected scalable automation frameworks such as Selenium WebDriver, Java, TestNG for enterprise mobility and web portal projects, developing 430+ test cases spanning functional, regression, smoke, UI, cross-browser, and end-to-end coverage. Additionally automated REST API validation across 120+ endpoints using Postman and RestAssured.
- Implemented AI-powered automation with Mabl AI and AppliTools Visual AI for self-healing locators and visual regression checks, cutting test maintenance by 32%. Plugged the suites into Jenkins CI/CD pipelines via Maven, trimming regression execution time by 38%.
- Validated application data using SQL across 55+ business modules and tracked the complete defect lifecycle using Jira, Xray, and Azure Boards, triaging and closing 270+ defects before production releases.
- Authored a company-wide automation best-practices playbook adopted across 3 project teams, cutting new QA hire onboarding time by 35%.

Mobile Testing (Android & iOS):

- Extended automation coverage to mobile by building an Appium-based framework in Java for native and hybrid iOS and Android applications, developing 165+ test cases using Page Object Model, XCUITest, and UiAutomator2 drivers. Ran cross-device regression on real devices and cloud platforms like BrowserStack and Sauce Labs, validating gestures, push notifications, and biometric login across OS versions.
- Folded mobile test suites into Jenkins CI/CD pipelines alongside web automation, cutting mobile regression time by 33%. Worked alongside developers, business analysts, and product owners across 28+ sprint releases.
- Proposed and piloted the company's first cross-platform mobile automation framework, which was later adopted as the team standard for new mobile projects.

Education

Kennesaw State University, Kennesaw, GA

August 2024 - May 2026

Master of Computer Science || 3.7/4.0 GPA
