

Ujwala Kavya Jayarama

Data Analyst

USA | +1 (623) 295-1052 | Email: ujwala@techcareermail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Senior Data Analyst with 5+ years of experience transforming complex enterprise data into actionable business insights across technology, healthcare, HR/payroll, ERP, supply chain, and cloud migration environments. Expertise in SQL, Python, Power BI, Tableau, Advanced Excel, Snowflake, and ETL processes to build scalable dashboards, automate reporting, perform data validation, and improve data quality. Proven track record of developing KPI dashboards, optimizing analytical workflows, conducting source-to-target validation, and delivering executive reporting that supports strategic decision-making. Experienced in cross-functional collaboration, business intelligence, data governance, trend analysis, and process improvement, enabling organizations to enhance operational efficiency, reporting accuracy, and business performance.

PROFESSIONAL EXPERIENCE

Senior Data Analyst | Intuit | USA

Jun 2026 – Present

- Analyzed large-scale product, customer, and operational datasets using SQL, Python, and Advanced Excel to generate actionable insights, supporting weekly business reviews and improving reporting efficiency by 20%.
- Developed and enhanced interactive Power BI and Tableau dashboards to monitor KPIs, user engagement, and business performance, enabling stakeholders to track key metrics with 98% reporting accuracy.
- Collaborated with cross-functional teams to perform data validation, automate recurring reports, and optimize analytical workflows, reducing manual reporting effort by 25% while improving data quality.

Data Analyst | Pioneer Management Consulting (Client: LACOE) | USA

Jul 2025 – Jun 2026

- Executed SQL-based source-to-target validation, data profiling, and reconciliation across HR/payroll migration cycles supporting 39 school districts and 125 public agencies, identifying mapping gaps, data quality issues, and conversion risks before production deployments.
- Automated migration tracking, reporting workflows, defect alerts, and readiness dashboards using Power Automate, reducing manual follow-up efforts by 80% while improving visibility into ETL status, defect ownership, and deployment readiness.
- Developed recurring SQL reports and executive dashboards to monitor 3,000+ table-load requests, migration progress, unresolved defects, and conversion milestones, enabling leadership to prioritize high-risk issues before payroll parallel testing and go-live.
- Performed source-to-target data validation, record reconciliation, and quality assurance across multiple enterprise systems, ensuring data integrity, completeness, and compliance throughout each migration cycle.
- Partnered with business analysts, data engineers, QA teams, and client stakeholders to investigate data discrepancies, validate transformation rules, and resolve migration issues, improving delivery timelines and reporting accuracy.
- Created ad hoc SQL queries and analytical reports to evaluate migration readiness, defect trends, and operational KPIs, providing actionable insights that supported project governance and executive decision-making.
- Maintained migration documentation, validation logs, mapping artifacts, and audit reports while supporting data governance standards and improving traceability across enterprise reporting processes.
- Collaborated with cross-functional teams throughout testing, deployment, and post-migration validation activities, ensuring successful production releases with minimal data-related issues.

Software Engineer II – Data Analytics | GE HealthCare | India

May 2023 – Jul 2024

- Developed interactive Power BI dashboards and executive reporting solutions to monitor migration readiness, milestone progress, application dependencies, and unresolved risks across 500+ enterprise applications, improving visibility for cross-functional leadership during cloud migration initiatives.
- Built SQL and Python analytics solutions supporting 35+ GenAI-enabled supply chain workflows within a \$14B ERP ecosystem, delivering KPI dashboards and operational reports that tracked order exceptions, chatbot adoption, workflow performance, and business trends.
- Designed business intelligence reports for 1,300+ managed file transfer (MFT) migration events, analyzing load status, failure patterns, downtime trends, and migration readiness across 5 enterprise migration waves, enabling faster issue resolution.
- Developed automated reporting and data validation processes using SQL and Power BI to improve reporting consistency, reduce manual effort, and provide stakeholders with accurate project status and operational metrics.
- Performed data quality analysis, source-to-target validation, and reconciliation across enterprise datasets to ensure reporting accuracy, strengthen data integrity, and support successful migration deployments.
- Collaborated with project managers, infrastructure teams, business stakeholders, and data engineers to define reporting requirements, resolve data discrepancies, and deliver actionable business insights for executive decision-making.
- Standardized reporting templates, governance documentation, and audit tracking across enterprise data flows, improving reporting consistency, data traceability, and compliance while earning the 2023 Delivery with Focus Award.
- Created ad hoc SQL analyses and executive reports to identify migration bottlenecks, monitor operational KPIs, and support strategic planning throughout large-scale cloud transformation programs.

Software Engineer – Data Analytics | GE HealthCare | India

Jan 2020 – Apr 2023

- Analyzed chatbot interactions, ERP transactions, and support ticket data using SQL and Python to identify automation opportunities, reducing ticket resolution time by 80% and saving approximately 3,000 hours per quarter through workflow optimization.
- Developed analytical solutions for order management and supply chain operations by evaluating workflow bottlenecks, business rules, and integration performance, reducing order processing turnaround time by 91%.
- Improved customer master data accuracy by 20% through data profiling, validation, reconciliation, and root cause analysis across ERP and supply chain systems, strengthening downstream reporting reliability.
- Designed and maintained 10+ batch and real-time ETL workflows integrating ERP, HR, and supply chain applications, processing and reconciling over 30,000 records while improving data quality and operational reporting.

- Built SQL queries, Python scripts, and automated reports to monitor ETL performance, identify data quality issues, and provide business stakeholders with timely operational insights.
- Partnered with cross-functional teams including business analysts, application owners, and data engineers to gather reporting requirements, validate business rules, and deliver scalable analytics solutions aligned with organizational goals.
- Supported enterprise data governance initiatives by documenting transformation logic, source-to-target mappings, validation procedures, and reporting standards, improving audit readiness and data consistency across business systems.
- Developed executive dashboards and ad hoc analytical reports that tracked operational KPIs, workflow performance, and business trends, enabling leadership to make data-driven decisions and continuously improve business processes.

TECHNICAL SKILLS

- **Analytics & Business Intelligence:** SQL, Power BI, Tableau, Microsoft Excel (Advanced), DAX, Power Query, Dashboard Development, KPI Reporting, Executive Reporting, Business Intelligence, Data Visualization, Self-Service Analytics, Interactive Dashboards.
- **Programming & Analytics:** Python, Pandas, NumPy, Scikit-learn, Statistical Analysis, Exploratory Data Analysis (EDA), Hypothesis Testing, A/B Testing, Forecasting, Trend Analysis, Predictive Analytics.
- **Data Engineering & ETL:** Snowflake, ETL/ELT, Data Modeling, Data Migration, Source-to-Target Mapping, Source-to-Target Validation, Data Profiling, Data Quality Testing, Data Validation, Data Governance, dbt, Apache Airflow.
- **Databases & Query Languages:** SQL, T-SQL, Snowflake SQL, Microsoft SQL Server, PostgreSQL.
- **Data Analysis & Reporting:** Data Cleaning, Data Wrangling, Data Integrity, Root Cause Analysis, Ad Hoc Analysis, Business Insights, Operational Analytics, Performance Analysis, Reporting Automation, Executive Dashboards, Stakeholder Reporting.
- **Cloud & Tools:** Azure, AWS, Dell Boomi, Informatica, Pentaho, Power Automate, SAS, Jupyter Notebook, Git, GitHub.
- **Methodologies & Collaboration:** Agile, Scrum, SDLC, Cross-Functional Collaboration, Stakeholder Management, Requirements Gathering, Business Process Improvement, Documentation, Data Governance.

EDUCATION

Master of Science in Business Analytics Arizona State University – W. P. Carey School of Business, Tempe, AZ, USA	Aug 2024 – May 2025
Bachelor of Engineering in Computer Science RV College of Engineering, Bengaluru, India	Aug 2017 – Jul 2020

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate	Dec 2025
Lean Six Sigma Green Belt	Jul 2025

PROJECTS

Enterprise Analytics Pipeline Python, Snowflake, dbt, Airflow	Feb 2026 – Apr 2026
● Designed and implemented an end-to-end analytics pipeline using Python, Snowflake, dbt, and Apache Airflow to process 155K+ event records, automating data ingestion, transformation, and validation workflows for reliable downstream reporting. ● Developed Power BI dashboards to monitor channel performance, data quality metrics, and pipeline health, implementing 16 automated data quality checks that improved reporting accuracy and enabled faster identification of data anomalies.	
HonorHealth Capstone: Healthcare Inventory Analytics Tableau, SAS, SQL	Jan 2025 – May 2025
● Analyzed 58K+ consignment implant transactions representing approximately \$75M in inventory spend across 6 hospitals, identifying vendor utilization trends, inventory risks, and cost optimization opportunities. ● Built Tableau dashboards and SAS forecasting models using regression and ensemble techniques to analyze inventory movement and replenishment across 40+ vendors, supporting data-driven recommendations that improved inventory planning and turnover.
