

VEDANT PATEL

Senior Java Full Stack Developer | Java | Spring Boot | TypeScript | Angular | React | Microservices | AI/GenAI

 [MI, USA] |  [+1(732)5967916] |  [patelvedant2730@gmail.com] |  [LinkedIn]

PROFESSIONAL SUMMARY

- Having **9+ years of experience** in software development and full-stack application engineering, specializing in **Java, Spring Boot, TypeScript, Angular, React, Microservices, REST APIs, Cloud, and AI-enabled applications**.
- Strong expertise in designing and developing scalable enterprise applications using **Java 8/11/17/21, Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate, JPA, and RESTful Web Services**.
- Extensive experience building modern frontend applications using **TypeScript, Angular, React.js, JavaScript, HTML5, CSS3, RxJS, Redux, and responsive UI frameworks**.
- Experienced in developing **microservices-based architectures** using Spring Boot, Spring Cloud, API Gateway, service discovery, circuit breakers, and containerized deployments.
- Hands-on experience with **AI and Generative AI integration**, including **OpenAI APIs, Azure OpenAI, AWS Bedrock, prompt engineering, Retrieval-Augmented Generation (RAG), embeddings, vector databases, and AI-powered enterprise applications**.
- Designed and integrated **AI-powered chatbots, intelligent search, document processing, summarization, classification, recommendation, and natural language processing capabilities** into Java-based applications.
- Proficient in developing secure applications using **OAuth 2.0, JWT, OpenID Connect, Spring Security, SSO, RBAC, and API security standards**.
- Strong experience with **SQL and NoSQL databases**, including **PostgreSQL, Oracle, MySQL, SQL Server, MongoDB, DynamoDB, and Redis**.
- Experienced in cloud-native application development and deployment using **AWS and Microsoft Azure**, including **EC2, S3, Lambda, ECS/EKS, RDS, API Gateway, Azure App Services, Azure Functions, Azure SQL, AKS, and Azure OpenAI**.
- Strong knowledge of **Kafka, Apache Kafka Streams, RabbitMQ, event-driven architecture, asynchronous processing, and real-time data integration**.
- Experienced in building CI/CD pipelines using **Jenkins, GitHub Actions, Azure DevOps, Docker, Kubernetes, Terraform, Maven, and Gradle**.
- Proficient in automated testing using **JUnit, Mockito, Spring Boot Test, Selenium, Cypress, Playwright, Jest, and Mockito**.
- Experienced in Agile/Scrum development methodologies, participating in sprint planning, backlog refinement, code reviews, technical design discussions, and production support.

TECHNICAL SKILLS

CATEGORY	TECHNOLOGIES
PROGRAMMING LANGUAGES	Java 8/11/17/21, TypeScript, JavaScript, Python, SQL
BACKEND DEVELOPMENT	Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring Data JPA, Hibernate, JPA, REST APIs, GraphQL

FRONTEND DEVELOPMENT	Angular, React.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Material UI, RxJS, Redux
MICROSERVICES	Spring Cloud, Eureka, API Gateway, Resilience4j, Circuit Breaker, Distributed Systems, Event-Driven Architecture
AI / GENAI	OpenAI API, Azure OpenAI, AWS Bedrock, LLM Integration, Prompt Engineering, RAG, Embeddings, Vector Search, LangChain, AI Chatbots, NLP
DATABASES	PostgreSQL, Oracle, MySQL, SQL Server, MongoDB, DynamoDB, Redis
MESSAGING & STREAMING	Apache Kafka, Kafka Streams, RabbitMQ, JMS
CLOUD PLATFORMS	AWS, Microsoft Azure
AWS SERVICES	EC2, S3, Lambda, RDS, DynamoDB, ECS, EKS, API Gateway, CloudWatch, IAM, SQS, SNS
AZURE SERVICES	Azure App Service, Azure Functions, Azure SQL, AKS, Azure OpenAI, Key Vault, Azure DevOps, Application Insights
DEVOPS & CI/CD	Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, Terraform, Maven, Gradle
TESTING	JUnit, Mockito, Spring Boot Test, Selenium, Cypress, Playwright, Jest
WEB TECHNOLOGIES	REST, SOAP, JSON, XML, OAuth 2.0, JWT, OpenID Connect
VERSION CONTROL	Git, GitHub, GitLab, Bitbucket
MONITORING & LOGGING	ELK Stack, Splunk, Grafana, Prometheus, CloudWatch, Application Insights
METHODOLOGIES	Agile, Scrum, SDLC, TDD, BDD, CI/CD

PROFESSIONAL EXPERIENCE

SIRIS Software LLC – Farmington Hills, Michigan
 Senior Software Developer

Jan 2025 – Present

Project: AI-Enabled Healthcare Member Services & Claims Platform

- Designed and developed scalable **full-stack healthcare applications** using **Java 17, Spring Boot, Spring Cloud, TypeScript, Angular, and RESTful microservices**.
- Built and maintained backend microservices for healthcare workflows including **member eligibility, claims processing, provider data, authorization, benefits, and healthcare transactions**.
- Developed responsive frontend applications using **Angular, TypeScript, RxJS, Angular Material, HTML5, CSS3, and reusable component architecture**.
- Implemented secure REST APIs using **Spring Security, OAuth 2.0, JWT, OpenID Connect, role-based access control, and API gateway security**.
- Designed microservices using **Spring Boot, Spring Cloud, service discovery, API Gateway, Resilience4j, and centralized configuration**.
- Integrated **Generative AI capabilities** into healthcare applications using **Azure OpenAI/OpenAI APIs** for intelligent document summarization, healthcare knowledge assistance, and natural language-based user interactions.
- Developed AI-powered workflows using **prompt engineering, LLM integration, embeddings, vector search, and Retrieval-Augmented Generation (RAG)** to provide context-aware responses.
- Built intelligent healthcare chat capabilities that enabled users to search and retrieve information from structured and unstructured healthcare documentation.

- Integrated AI services with Java applications through secure REST APIs and developed reusable service layers for **prompt management, response processing, validation, and exception handling**.
- Developed document processing workflows using **OCR, NLP, AI classification, and automated data extraction** for healthcare-related documents.
- Implemented event-driven communication using **Apache Kafka** for asynchronous processing of claims, eligibility updates, notifications, and downstream integrations.
- Developed Kafka producers and consumers using **Spring Kafka** and implemented retry, dead-letter queue, and error-handling mechanisms.
- Built backend services using **Spring Data JPA, Hibernate, PostgreSQL, and SQL Server** with optimized queries and transaction management.
- Implemented caching using **Redis** to improve application performance and reduce database load.
- Developed automated unit and integration tests using **JUnit 5, Mockito, Spring Boot Test, and Testcontainers**.
- Implemented frontend testing using **Jest, Jasmine, Karma, Cypress, and Playwright**.
- Containerized applications using **Docker** and deployed microservices to **Kubernetes/Azure Kubernetes Service (AKS)**.
- Built CI/CD pipelines using **Azure DevOps, Jenkins, GitHub Actions, Maven, and Docker**.
- Integrated **Azure Key Vault** for secure storage and retrieval of application secrets, certificates, and API credentials.
- Implemented application monitoring using **Azure Application Insights, Splunk, ELK, Prometheus, and Grafana**.
- Collaborated with product owners, healthcare analysts, architects, QA teams, and DevOps teams in an Agile/Scrum environment.
- Participated in architecture discussions, code reviews, technical design sessions, sprint planning, and production support activities.

Environment: Java 17, Spring Boot, Spring Cloud, Spring Security, Microservices, TypeScript, Angular, RxJS, HTML5, CSS3, Azure OpenAI, OpenAI APIs, GenAI, RAG, Embeddings, Kafka, PostgreSQL, SQL Server, Redis, Docker, Kubernetes, AKS, Azure DevOps, Azure Key Vault, JUnit, Mockito, Cypress, Playwright, Git.

Cognizant Technology Solutions – New Jersey (Client: Elevance Health)

Software Developer

Sep 2023 – Dec 2024

Project: Healthcare Member, Provider & Claims Management Platform

- Developed enterprise healthcare applications using **Java 11/17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and REST APIs**.
- Designed and implemented scalable **microservices** for healthcare member management, provider information, claims, benefits, and authorization workflows.
- Developed frontend applications using **Angular, TypeScript, JavaScript, RxJS, HTML5, CSS3, and Angular Material**.
- Built reusable Angular components, services, directives, pipes, and reactive forms to support complex healthcare workflows.
- Developed secure APIs using **Spring Security, OAuth 2.0, JWT, and role-based access control**.

- Implemented API Gateway patterns for routing, authentication, authorization, request validation, and service communication.
 - Integrated healthcare systems with external applications using **REST, SOAP, JSON, XML, and secure API integrations**.
 - Developed asynchronous workflows using **Apache Kafka and Spring Kafka** for claims events, eligibility updates, provider updates, and notification processing.
 - Implemented Kafka consumers with error handling, retry logic, dead-letter topics, and message reprocessing capabilities.
 - Developed data access layers using **Spring Data JPA, Hibernate, Oracle, PostgreSQL, and SQL Server**.
 - Optimized SQL queries, stored procedures, indexes, and database transactions to improve application performance.
 - Implemented AI-assisted capabilities for healthcare knowledge search, document classification, and automated content summarization.
 - Integrated AI services with backend Java applications using REST-based integrations and reusable AI service components.
 - Developed prompt templates and validation mechanisms to improve the consistency and reliability of AI-generated responses.
 - Implemented caching using **Redis** for frequently accessed member, provider, and reference data.
 - Created unit and integration tests using **JUnit, Mockito, Spring Boot Test, and REST Assured**.
 - Implemented frontend test automation using **Jasmine, Karma, Cypress, and Selenium**.
 - Used **Docker** to containerize applications and supported deployments across development, QA, and production environments.
 - Created CI/CD pipelines using **Jenkins, GitHub Actions, Azure DevOps, Maven, and SonarQube**.
 - Implemented centralized logging and monitoring using **Splunk, ELK Stack, and Application Insights**.
 - Participated in Agile ceremonies, code reviews, technical discussions, production support, and defect resolution.
- Environment:** Java 11/17, Spring Boot, Spring MVC, Spring Security, Microservices, Angular, TypeScript, JavaScript, RxJS, Kafka, REST, SOAP, Oracle, PostgreSQL, SQL Server, Redis, AI/GenAI, OpenAI APIs, Docker, Jenkins, GitHub Actions, Azure DevOps, JUnit, Mockito, Cypress, Selenium, Splunk, Git.

Capgemini America – Chicago, Illinois (Banking & Financial Services)

Software Developer

Aug 2022 – Aug 2023

Project: **Digital Banking & Financial Services Platform**

- Developed full-stack banking applications using **Java 8/11, Spring Boot, Spring MVC, Spring Security, TypeScript, Angular, and REST APIs**.
- Designed and developed microservices for customer onboarding, account management, payments, transactions, and financial services workflows.
- Developed responsive user interfaces using **Angular, TypeScript, RxJS, HTML5, CSS3, Bootstrap, and reusable UI components**.

- Built RESTful APIs using Spring Boot and implemented service-to-service communication across distributed applications.
- Implemented authentication and authorization using **Spring Security, OAuth 2.0, JWT, and role-based access control.**
- Developed API integrations with internal and third-party banking systems using **REST, SOAP, JSON, and XML.**
- Implemented asynchronous processing using **Apache Kafka and RabbitMQ** for transaction processing, payment events, and customer notifications.
- Developed Kafka producers and consumers using Spring Kafka and implemented message retry and exception-handling mechanisms.
- Built persistence layers using **Spring Data JPA, Hibernate, Oracle, PostgreSQL, and MongoDB.**
- Optimized database queries, indexes, stored procedures, and transaction management for high-volume financial transactions.
- Implemented AI-enabled features for customer service assistance, intelligent search, transaction categorization, and automated document processing.
- Integrated AI services with Java applications through secure APIs and created reusable services for AI request and response processing.
- Developed automated unit and integration testing using **JUnit, Mockito, Spring Boot Test, and REST Assured.**
- Developed UI test automation using **Selenium, Jasmine, Karma, and Cypress.**
- Containerized applications using **Docker** and supported deployments in cloud environments.
- Created and maintained CI/CD pipelines using **Jenkins, Git, Maven, SonarQube, and GitHub.**
- Implemented centralized logging and application monitoring using **ELK Stack and Splunk.**
- Participated in code reviews, technical design discussions, Agile ceremonies, and production issue resolution.
- Collaborated with business analysts and financial domain teams to translate requirements into scalable technical solutions.

Environment: Java 8/11, Spring Boot, Spring MVC, Spring Security, Microservices, Angular, TypeScript, JavaScript, RxJS, Kafka, RabbitMQ, REST, SOAP, Oracle, PostgreSQL, MongoDB, AI/GenAI, OpenAI APIs, Docker, Jenkins, Maven, SonarQube, Selenium, Cypress, JUnit, Mockito, Git.

Infosys Limited – Richardson, Texas (Retail & Enterprise Applications)

Software Developer

Sep 2019 – Jul 2022

Project: [Enterprise Retail Commerce & Order Management Platform](#)

- Developed enterprise applications using **Java 8, Spring Framework, Spring Boot, Spring MVC, Hibernate, and RESTful web services.**
- Developed full-stack applications using **Angular, TypeScript, JavaScript, HTML5, CSS3, and Bootstrap.**
- Designed and implemented backend services for product catalog, inventory, order management, customer management, and retail workflows.

- Developed REST APIs and integrated applications with enterprise systems, third-party services, and internal business applications.
- Implemented microservices using **Spring Boot** and supported migration from monolithic applications to distributed services.
- Developed reusable Angular components, services, directives, and reactive forms using **TypeScript and RxJS**.
- Implemented authentication and authorization using **Spring Security, OAuth 2.0, JWT, and role-based access control**.
- Developed asynchronous integrations using **Apache Kafka, JMS, and RabbitMQ**.
- Implemented database integration using **Hibernate, JPA, Oracle, SQL Server, and MySQL**.
- Created optimized SQL queries, stored procedures, indexes, and database scripts.
- Developed AI-assisted functionality for product search, customer support automation, recommendation workflows, and intelligent data classification.
- Integrated machine learning and AI services through REST APIs and implemented backend services for AI-based business capabilities.
- Developed automated test cases using **JUnit, Mockito, Selenium, and Spring Boot Test**.
- Implemented frontend testing using **Jasmine, Karma, and Protractor**.
- Used **Maven** for build automation and dependency management.
- Implemented CI/CD pipelines using **Jenkins and Git**.
- Used Docker for application containerization and supported cloud-based deployments.
- Implemented logging and monitoring using **Log4j, ELK Stack, and Splunk**.
- Participated in Agile/Scrum ceremonies, requirement analysis, development, testing, deployment, and production support.
- Collaborated with cross-functional teams to deliver scalable retail and enterprise application solutions.

Environment: Java 8, Spring Boot, Spring MVC, Hibernate, JPA, Angular, TypeScript, JavaScript, RxJS, Kafka, RabbitMQ, REST, Oracle, SQL Server, MySQL, AI/ML APIs, Docker, Jenkins, Maven, Selenium, JUnit, Mockito, Git, ELK, Splunk.

Tata Consultancy Services (TCS) – Ahmedabad, India (Enterprise Applications)

Associate Software Developer

Jul 2017 – Aug 2019

Project: **Enterprise Business Application Development**

- Developed enterprise applications using **Java, Spring, Spring MVC, Hibernate, JSP, Servlets, and RESTful web services**.
- Developed frontend functionality using **JavaScript, HTML5, CSS3, jQuery, and Bootstrap**.
- Built backend business logic and reusable service components using Core Java and Spring Framework.
- Developed REST APIs for integration with internal enterprise applications and third-party systems.
- Implemented database connectivity using **JDBC, Hibernate, Oracle, and SQL Server**.

- Developed SQL queries, stored procedures, database scripts, and data validation logic.
- Participated in application modernization activities and supported migration of legacy functionality to Spring-based architectures.
- Implemented application security and user access controls using Spring Security and enterprise authentication mechanisms.
- Developed unit test cases using **JUnit and Mockito**.
- Used **Maven** for project builds and dependency management.
- Used **Git, SVN, and Jenkins** for source control and build automation.
- Supported application deployments across development, QA, and production environments.
- Investigated production issues, performed root-cause analysis, and implemented defect fixes.
- Participated in Agile development, code reviews, technical discussions, and daily Scrum meetings.

Environment: Java, Core Java, Spring, Spring MVC, Hibernate, REST, JSP, Servlets, JavaScript, HTML5, CSS3, jQuery, Bootstrap, Oracle, SQL Server, JDBC, JUnit, Mockito, Maven, Jenkins, Git, SVN.
