

VIKTOR MEDVEDEV

Software Development Engineer in Test

Tallahassee, FL · 850-225-9458 · viktormedvedev2022@gmail.com · www.linkedin.com/in/viktormedvedev

SUMMARY

Software Development Engineer in Test with 10+ years of experience in UI and API automation using Java and JavaScript. With a Master's degree in Computer Science and strong technical background, built UI frameworks with Cypress and enterprise-grade solutions using Selenium WebDriver. Integrated tests into CI/CD with Jenkins and Docker, reducing regression time by 40%. Currently improving API coverage in a large energy domain project and expanding skills in Azure.

WORK EXPERIENCE

QA Automation Engineer | Duke Energy

March 2023 – Present

Industry: Energy | Remote (HQ: Charlotte, NC)

- Developed and maintained over 150 UI automation test scripts using Java and Selenium WebDriver within a Cucumber BDD framework, significantly reducing manual regression testing time by over 20 hours per sprint.
- Automated 100+ API tests with RestAssured, Java, and Postman, boosting CRM coverage by 35% and detecting 40+ critical issues early through payload validation in test/staging.
- Performed functional and regression testing of a large-scale CRM system, identifying and helping resolve customer-impacting bugs during UAT.
- Worked with MS SQL to validate data integrity, perform backend verifications, and write complex queries for testing CRM workflows, resulting in detection of several high-priority defects involving data consistency.

QA Tester | Carma (Salon & SPA)

October 2019 - February 2023

Industry: Cosmetics | Remote (HQ: Wilmington, MA)

- Designed a comprehensive UI/API test automation framework using Cypress and JavaScript, integrated with CI/CD (GitLab), reducing regression testing time by 40% and accelerating software delivery by weeks.
- Developed and executed over 150 automated functional and regression test cases for REST APIs using Cypress and JavaScript, increasing test efficiency and ensuring comprehensive coverage within tight sprint cycles.
- Automated testing pipelines in Jenkins and GitLab CI, enabling seamless code integration and reducing deployment time by up to several hours per release.
- Implemented automated database testing for MS SQL using JavaScript, validating data integrity across 200+ critical database operations and improving backend test coverage, accelerating issue detection during nightly builds.

DevOps Engineer | OREN-ORS

August 2004 - September 2019

Industry: Construction Technology | On-site (HQ: Orenburg)

- Ensured stable operation and maintenance of company IT infrastructure, including Windows Servers, SQL Server 2012, network equipment, and office hardware, achieving 99.9% uptime.
- Developed and maintained applied industrial software to support production processes, utilizing Beckhoff PLC programming skills and automation best practices.
- Managed company website development and support using CMS platforms such as WordPress, Joomla, and OpenCart, improving site performance and user experience.
- Configured and secured network components including VPNs, firewalls, and switches, ensuring reliable and secure communication across multiple sites.
- Provided technical support and training to staff on IT systems and tools, reducing downtime and increasing overall IT literacy within the company.

SKILLS

Java | JavaScript | TypeScript | Python | Bash | HTML | CSS | SQL | Selenium | Selenide | Cypress | Playwright | Cucumber
Rest-Assured | Postman | SoapUI | JUnit | TestNG | Maven | Gradle | Webpack | Git | GitLab CI | Jenkins | GitHub Actions
Docker | Kubernetes | Terraform | AWS | Azure | Google Cloud Platform (GCP) | MySQL | MS SQL Server | PostgreSQL
MongoDB | MS Access | Jira | Allure | Linux | Windows Server | Active Directory | Networking (TCP/IP, DNS, DHCP) | Apache

EDUCATION

Master's Degree in Information Security

Orenburg State University - 2022

Master's Degree in Computer Science

Orenburg State University - 2004
