

Yasaswini Niharika Dammu

BUSINESS DATA ANALYST

USA | +1 (312) 757-9381 | Email: yasaswini@myworkmails.com |LinkedIn

SUMMARY

Analytical and result-driven Business Data Analyst with 3+ years of experience delivering data-driven business solutions, performance dashboards, and process automation across financial, healthcare, and technology domains. Skilled in translating business needs into analytical models, developing BI dashboards, and driving strategic decisions through actionable insights. Proficient in SQL, Python, Power BI, Tableau, Excel, and data warehousing tools (Snowflake, AWS, Azure). Adept at requirements elicitation, data governance, and Agile collaboration. Recognized for improving forecasting accuracy, reducing reporting inefficiencies, and supporting cross-functional decision-making through data analytics excellence.

PROFESSIONAL EXPERIENCE

Business Data Analyst Deloitte (Internship) USA	Jan 2025 – Current
- Partnered with cross-functional stakeholders and SMEs to gather, document, and translate analytical requirements into actionable data-driven solutions, improving project delivery timelines and alignment by 25%. - Developed automated ETL workflows using SQL, Python, and Alteryx to extract and transform multi-source data (ERP, CRM, financial systems), reducing manual reporting effort by 40% while improving data accuracy and availability. - Designed and implemented Power BI and Tableau dashboards for C-level stakeholders, integrating Snowflake and Azure Synapse data, resulting in real-time KPI visibility and faster decision-making. - Conducted statistical forecasting and trend analysis using regression and time-series models in Python to identify performance deviations, improving budget forecast accuracy by 18%. - Built data governance frameworks, ensuring adherence to SOX and GDPR standards by implementing automated audit logs, data dictionaries, and lineage documentation across multiple business units. - Collaborated with engineering and product teams to design data validation scripts and QA test plans, reducing discrepancies in financial reporting by 22% through improved cross-system reconciliation. - Created business and functional requirement documentation (BRDs, FRDs, user stories) in Confluence and JIRA, translating business needs into technical specifications for development and testing teams. - Led root cause analysis (RCA) on data anomalies and KPI mismatches across business functions, identifying gaps in pipeline logic and saving over \$1.8M annually through data correction and process reengineering. - Partnered with the finance and operations departments to build interactive dashboards and scorecards for cost optimization, resource allocation, and ROI measurement, improving efficiency by 15%. - Conducted ad hoc business deep dives and executive presentations, delivering actionable insights on revenue leakage, product performance, and cost savings that influenced strategic business priorities.	

Business Data Analyst IBM India	July 2020 – May 2023
- Designed, developed, and optimized data pipelines using SQL and Python to support enterprise reporting for global financial clients, ensuring seamless data ingestion and a 35% reduction in latency across systems. - Built KPI dashboards and visualization models in Power BI and Tableau integrating data from Oracle, SQL Server, and AWS Redshift, improving business process monitoring and stakeholder visibility by 45%. - Performed variance and trend analysis on revenue, expenses, and operational costs using statistical models, providing recommendations that drove a \$700K reduction in process inefficiencies. - Partnered with finance, compliance, and product teams to document business processes and translate requirements into analytics-ready datasets, enabling more consistent and accurate business reporting. - Developed SQL stored procedures, window functions, and CTEs for high-volume data aggregation, optimizing complex data queries and improving data retrieval performance by 40%. - Collaborated with data engineers to migrate legacy reporting systems to AWS and Azure cloud environments, enabling scalable reporting and improving system uptime by 30%. - Conducted data quality checks, audit validation, and reconciliation testing between production and warehouse environments, reducing discrepancies by 20% and strengthening data reliability. - Created automated Excel and Alteryx workflows to standardize recurring reports for sales and operations teams, cutting manual workload by 60 hours per month. - Supported end-to-end UAT and release testing cycles by preparing data samples, verifying business logic, and validating dashboard outputs, ensuring defect-free analytics delivery post-deployment. - Delivered insightful executive reports and data presentations that summarized market performance, customer behavior, and risk exposure, enabling senior management to make informed strategic decisions.	

TECHNICAL SKILLS

- Data Analysis & BI Tools:** Power BI, Tableau, Looker, Excel (VBA, Pivot Tables, Power Query), Qlik Sense
- Programming & Querying:** SQL (T-SQL, PL/SQL), Python (Pandas, NumPy, Matplotlib), R, DAX, M Language
- Databases & Warehousing:** SQL Server, Snowflake, BigQuery, Redshift, Oracle, MySQL, Azure Synapse
- ETL & Data Integration:** Alteryx, Talend, Informatica, SSIS, Azure Data Factory, Airflow
- Statistical & Predictive Analysis:** Regression, Forecasting, A/B Testing, Hypothesis Testing, Clustering
- Cloud Platforms:** AWS (S3, Redshift, Athena), Azure (Data Lake, Synapse), GCP (BigQuery, Data Studio)
- Data Governance & Quality:** GDPR, HIPAA, SOX Compliance, Metadata Management, Data Lineage
- Visualization & Reporting:** Executive Dashboards, KPI Tracking, Scorecards, Self-Service BI
- Documentation & BA Tools:** BRD, FRD, User Stories, JIRA, Confluence, Visio, Lucidchart
- Agile & Project Tools:** Scrum, Kanban, PI Planning, Azure DevOps, Trello
- Automation & Scripting:** SQL Stored Procedures, Python Automation, Excel Macros, Power Automate
- Soft Skills:** Stakeholder Management, Communication, Data Storytelling, Strategic Decision Support

Education

Masters DePaul University, Chicago, IL, USA	June 2023 – March 2025
Bachelors BITS Pilani Dubai, Dubai, UAE	Aug 2018 – June 2022
