Summary

Quality Assurance with years of experience designing and maintaining robust automation frameworks and driving quality assurance across web, API, and desktop applications. Proficient in Java, Selenium WebDriver, Cucumber, TestNG, REST Assured, and TestComplete, with hands-on expertise in integrating automation into CI/CD pipelines. Proven success in boosting test coverage by 50%, reducing execution time by 35%, and cutting regression cycles by 40%. Adept at collaborating with developers, QA teams, and leadership to deliver scalable, reliable, and high-quality software solutions.

Technical Skills

Selenium WebDriver | Cucumber | Junit | TestNG | POSTMAN | REST Assured | Jenkins | TestComplete | ReadyAPI | Jira | Git | GitKraken | GitLab | GitHub | Maven | Wave Evaluation Tool | Oracle | MySQL | PostgreSQL

Experience

Quality Assurance Engineer Lead

Oct 2024 - Aug 2025

Edge360 / 3SI

Ashburn, VA

- Designed and implemented end-to-end automated testing for a desktop surveillance system using TestComplete + JavaScript, improving system reliability and scalability.
- Spearheaded creation of a comprehensive automation suite, boosting test coverage by 50% and cutting execution time by 35%.
- Conducted UI and API testing with TestComplete, Postman, and ReadyAPI, ensuring consistent performance and seamless integrations.
- Enhanced code readability and maintainability by optimizing mapped objects and refining automation scripts.
- Collaborated with developers and leadership to evaluate new tools, raise bugs in JIRA, and integrate tests into CI/CD pipelines.
- Delivered actionable feedback on features and testing approaches, influencing tool adoption and improving team efficiency.

Software Developer in Testing (SDET)

Jan 2022 - Sep 2024

Amtrak

Washington DC

- Designed and implemented automated test scripts with Selenium WebDriver + Java, streamlining regression and functional testing.
- Developed and maintained automation suites for critical features, improving regression test cycles by 40%.
- Applied BDD frameworks (Cucumber/Gherkin) and modular test strategies, reducing maintenance by 30% and improving test reusability.
- Conducted API testing with RestAssured and Postman, validating performance and reliability of key services.
- Managed builds with Maven and integrated continuous testing in Jenkins CI/CD pipelines.
- Validated datasets across Oracle & MySQL using SQL queries, ensuring data integrity for downstream reporting.

Quality Assurance Automation Engineer

Jul 2019 - Dec 2021

Aetna

Chantilly, VA

- Developed and executed automated test cases with Selenium WebDriver and Java, reducing manual testing by 50%.
- Performed integration, functional, and regression testing using JUnit/TestNG, improving test execution efficiency by 30%.
- Built automation for RESTful API testing with RestAssured, ensuring reliability of key service endpoints.
- Applied BDD (Cucumber/Gherkin) and integrated automation into CI/CD pipelines (Jenkins) for seamless releases.
- Conducted SQL-based validation in PostgreSQL/MySQL to ensure data integrity and accurate reporting.
- Logged and tracked defects with JIRA, collaborating closely with developers to ensure timely resolution.

Education

Associates Degree in Information Technology | Northern Virginia Community College, Alexandria, VA

Certifications

- Microsoft Database Administrator | [Link](#)
- Azure Database
- CSC Network Administration
