

ZAHOOR ANJAM

SENIOR FULL STACK PYTHON DEVELOPER

Flushing, New York | +1 (209) 860-9492 | zahoor.anjam949@gmail.com

PROFESSIONAL SUMMARY

Senior Full Stack Python Developer with 7+ years of experience designing, developing, and supporting secure, scalable, and high performance web applications. Strong backend expertise in Python, Django, Django REST Framework, Flask, FastAPI, RESTful APIs, asynchronous services, authentication, and database-driven systems. Experienced in building responsive front-end applications with React.js, Next.js, Vue.js, Angular, JavaScript, and TypeScript, as well as integrating AI services and third-party platforms. Proficient in PostgreSQL, MySQL, and MongoDB, with hands-on experience in database design, query optimization, automation, debugging, CI/CD, Docker, and production support. Known for delivering maintainable end-to-end solutions and collaborating effectively with product, design, AI, QA, and engineering teams in Agile environments.

CORE TECHNICAL SKILLS

Backend & APIs: Python, Core Python, OOP, Django, Django REST Framework, Flask, FastAPI, RESTful APIs, asynchronous programming, Node.js, .NET Core

Frontend Development: React.js, Next.js, Vue.js, Angular, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, responsive web design

Databases: PostgreSQL, MySQL, MongoDB, Django ORM, database design, data validation, query optimization

AI & Integrations: OpenAI API, AI API integration, prompt engineering, LLM-powered applications, third-party API integrations, GitHub Copilot

Security & Architecture: JWT authentication, authorization, RBAC, secure API communication, microservices, reusable and maintainable architecture

Tools & Delivery: Git, GitHub, Docker, CI/CD, API testing, debugging, performance optimization, code reviews, Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior Full Stack Python Developer | Fusionbox

March 2023 - Present

Denver, Colorado (Remote)

- Built and maintained full-stack web applications using Python, Django, Flask, FastAPI, React.js, Next.js, Node.js, and .NET Core. Delivered scalable solutions from front-end interfaces to backend services and databases.
- Designed secure RESTful APIs using Django REST Framework, Flask, and FastAPI. Focused on clean architecture, validation, performance, and maintainable code.
- Developed reusable and responsive UI components with React.js, Next.js, Tailwind CSS, and Bootstrap. Ensured cross-browser compatibility and optimized user experience.
- Integrated OpenAI APIs, AI services, and third-party platforms into applications. Enabled AI-powered features and seamless external system communication.
- Implemented JWT authentication, Role-Based Access Control (RBAC), and secure API communication. Protected sensitive data and enforced user permissions.
- Designed and optimized databases using PostgreSQL, MySQL, and MongoDB. Improved query performance, API response times, and application reliability.
- Collaborated with product managers, designers, AI engineers, QA engineers, and developers. Delivered production-ready features through code reviews, testing, and issue resolution.

Software Engineer | Coiled

March 2020 - Feb 2023

New York, NY

- Developed full-stack web applications using Python, Django, Flask, FastAPI, Vue.js, Angular, Node.js, and .NET Core for client-facing and internal business solutions.
- Designed secure RESTful APIs and backend services, integrating third-party platforms through reliable and maintainable interfaces.
- Built responsive and reusable UI components with Vue.js and Angular, delivering consistent and user-friendly experiences.
- Developed Python automation scripts for data processing and backend operations, improving workflow efficiency and reliability.
- Implemented authentication, authorization, input validation, and error handling to ensure secure application access and API communication.
- Designed and maintained databases using PostgreSQL, MySQL, and MongoDB, optimizing data models and query performance.
- Participated in Agile development, including sprint planning, code reviews, testing, debugging, and production deployments.

Junior Full Stack Developer | AKTRA INC

Oct 2018 - January 2020

Reston, Virginia

- Assisted in developing web applications using Python, Django, Flask, React.js, JavaScript, and Node.js.
- Supported RESTful API development, backend functionality, and database integration using Python and Django.
- Created Python scripts for automation, data processing, and internal development tasks.
- Developed responsive UI components using React.js, JavaScript, HTML5, and CSS3, integrating them with backend APIs.
- Supported database development using MySQL, PostgreSQL, and MongoDB, including schema updates and query optimization.
- Assisted with third-party API integrations, testing, debugging, deployments, and issue resolution.
- Participated in code reviews, documentation, Agile discussions, and the complete software development lifecycle.

ENGINEERING STRENGTHS

- **Full-Stack Development:** Builds scalable applications with Python, modern front-end frameworks, APIs, authentication, and databases.
- **Problem Solving:** Resolves complex technical issues with scalable and maintainable solutions.
- **Code Quality:** Writes clean, reusable code and contributes to testing, debugging, and code reviews.
- **Collaboration:** Works effectively with cross-functional Agile teams to deliver quality software.
- **Adaptability:** Quickly learns new technologies and applies them to evolving business needs.

EDUCATION

Bachelor in Computer Science
The College of Saint Rose

Oct 2014 - July 2018
