

Ara Ghonyan

Software Development Engineer in Test

508-333-7009 | Ar.Ghonyan@gmail.com | Watertown, Massachusetts | Green Card Holder

PROFESSIONAL SUMMARY:

Motivated SDET with 5+ years' experience of effective Automation Software Testing with advanced knowledge of:

- Proficient in Java, specializing in test automation using Selenium WebDriver.
- Extensive experience with test framework development using JUnit and TestNG.
- Strong knowledge of build automation and dependency management with Maven.
- Skilled in behavior-driven development (BDD) using Cucumber and Gherkin.
- In-depth knowledge of API testing, utilizing tools like REST Assured and Postman.
- Proficient in SQL and JDBC for database testing.
- Solid understanding of software development life cycle (SDLC), software test life cycle (STLC), and Agile/Scrum methodologies.
- Excellent problem-solving skills and attention to detail.

TECHNICAL SKILLS:

- **Testing tools:** Selenium WebDriver, Cucumber, JUnit, TestNG, REST-Assured, Postman
- **Methodologies and concepts:** Object Oriented Programming, Page Object Model (POM), Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), Defect Life Cycle, Agile Scrum
- **Testing types:** Automated and Manual Functional Testing, UI Testing, API Testing (REST-Assured), Database Testing, Behavioral Driven Development (BDD, Gherkin language), Data Driven Testing (DDT), Smoke and Regression Testing, 508 Accessibility Testing (Wave Tool)
- **Languages:** Java, Gherkin
- **Databases:** MySQL, Oracle, JDBC, SQL
- **Build and CI/CD Tools:** Maven, Jenkins, AWS
- **Design patterns:** Page Object Model (POM), Singleton, POJO
- **Tools:** Git, Jira Xray

EXPERIENCE:

Tracmula

SDET

June 2021 - Present

- Developed and maintained Java Test Automation Framework using Java, Maven, Selenium WebDriver, Cucumber and JUnit.
- Designed comprehensive UI, API, and DB test cases and test scenarios in Gherkin language.
- Implemented the Page Object Model (POM) design pattern for test automation framework, enhancing test code maintainability and readability.
- Managed manual and automated test case execution, and tracked software defects using Jira Xray.
- Collaborated with PM, Dev, and QA teams to ensure clear understanding of project requirements.
- Actively engaged in daily stand-ups, sprint planning, and other Agile/Scrum ceremonies.
- Utilized Maven for project build management and dependency resolution, ensuring consistent test environment setup and configuration.
- Executed SQL queries and JDBC to perform data validation and database testing, ensuring data integrity and accuracy.
- Implemented version control using Git/GitHub, focused on continuous integration with Jenkins.

Environment: Java OOP, IntelliJ IDEA, Selenium WebDriver, Maven, Cucumber (BDD/DDT, POM, Gherkin), JUnit, MySQL, Postman, REST Assured, JDBC, JSON, Jenkins, Git/GitHub, AWS EC2, Jira-Xray, Agile Scrum.

- Developed and maintained automated test scripts using Java, Selenium, Maven, and TestNG.
- Implemented Page Object Model (POM) design pattern for maintainable and efficient test automation.
- Collaborated with cross-functional teams to define and implement BDD scenarios using Cucumber and Gherkin, facilitating effective communication between developers, testers, and business team.
- Conducted API testing using REST Assured and Postman, validating RESTful services and various HTTP methods (GET, POST, PUT, DELETE).
- Executed SQL queries and JDBC for database testing, verifying data integrity.
- Integrated test automation with Jenkins for continuous integration and automated test execution.
- Reported and tracked defects using Jira, ensuring timely resolution.
- Prepared detailed test reports using HTML reports and Cucumber JSON reports.

Environment: Java OOP, IntelliJ, Maven, Eclipse, Selenium WebDriver, Cucumber (BDD/DDT, Gherkin), TestNG, Oracle, SQL, JDBC, Postman, REST Assured, AWS, JSON, XML, Git/GitHub, Jira, Agile Scrum.

Western Survey for Seismic Protection, Armenia
Senior Specialist

October 2014 - January 2019

- Processed and analyzed earthquake data involved monitoring and assessing seismic activity.
- Collected seismic data and checked data quality, including waveform data, earthquake location parameters, and related metadata.
- Investigated seismic parameters based on earthquakes catalog.
- Involved integrating data from including different types of seismological instruments and data formats into Oracle database.
- Archived historical seismic data for long-term research and retrospective analysis.
- Developed SQL queries to extract seismic data based on specific criteria and research needs.

Environment: SeisComp3, ZMAP (MATLAB), Java, ArcGIS, Oracle, SQL, GMT, MS Office.

EDUCATION:

- **Master of Disaster Management**
 - National Graduate Institute for Policy Studies (GRIPS) – Tokyo, Japan **2013 – 2014**
- **Bachelor of Geology**
 - Yerevan State University – Yerevan, Armenia 2003 – 2007.
