

PARVATI JAYPRAKASH SOHANI

+1(857)313-5943 | sohani.p@northeastern.edu | <http://www.linkedin.com/in/parvati-sohani>

EDUCATION

Northeastern University

Boston, MA

Master of Science, Information Systems

Sep 2022 - May 2024

Relevant Coursework: Advance Database Management, Data Science, Web Design & User Experience, Business Analysis

Ramrao Adik Institute of Technology

Mumbai, India

Bachelor of Engineering, Computer Science

Sep 2016 - May 2019

Relevant Coursework: Data Warehouse & Mining, Relational Database Management System, Machine Learning, Data Structures

TECHNICAL SKILLS

Databases: MySQL, PostgreSQL, Oracle, MongoDB, ArangoDB, ApacheSpark, Redshift, Elasticsearch, Aurora, MapReduce

BI Tools: Tableau, PowerBI, Databricks, Streamlit, Draw.io, Talend, AirFlow, Fling, Alteryx, Excel, Microsoft Azure

Programming Languages: Python, SQL/PLSQL, R, HTML, Java Script, CSS3, R, CQL, macros

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scrapy, Scikitlearn, StatsModels, QuantLib, MapReduce

Cloud & Others: Azure, Oracle Cloud, Agile, Kanban, JIRA, Confluence, GitHub, Git, Docker, Kubernetes, CI/CD

WORK EXPERIENCE

Majesco Software and Solutions India Private Limited

Mumbai, India

Data Engineer

Jan 2020 - July 2022

- Engineered **Extract, Transform, Load (ETL)** pipelines in **Azure Data Factory** to load data into **Azure SQL Database** by preprocessing 200M+ raw data for policy management, claims processing and ensuring **100%** data validity
- Implemented clusters in **Python** to automate grouping customers, identifying auto insured insurance purchasing patterns by **8%**
- Automated generation of **250+ user forms** using **T-SQL** in stored procedures for faster data retrieval & optimizing runtime by **90%**
- Developed dashboards on customer's policy data utilizing **Tableau & SQL** to track customer **KPIs** boosting conversion rate by **30%**
- Collaborated with Business Analyst for enhancing application using **Azure DevOps**, following **CI/CD & agile practices** resulting in a seamless deployment process and **89%** acceleration in project timelines
- Architected **data models** to extract profound insights from customer data, contributing remarkable **12%** surge in policy sales
- Conducted in-depth performance tuning on **SQL queries**, employing **query optimization, index tuning, and database schema refinement techniques**, achieving **20%** reduction in average query response time
- Formulated project workflows & tasks using **JIRA & Confluence**, resulting in a **25%** increase in project completion rate

Ramrao Adik Institute of Technology

Mumbai, India

SQL Developer Intern

July 2017 - Dec 2017

- Orchestrated integration of **DDL, DML**, and **views** into DB-Minor, to develop and execute complex SQL queries, elevating practical database testing outcomes by **50%**
- Engineered a robust architecture with **procedures, functions, and triggers**, leading to a **30%** improvement in query performance

ACADEMIC PROJECTS

Audio Journaling Analysis System

- Developed audio journaling app, capturing user thoughts using **PostgreSQL** for storage & management of unstructured audio data
- Implemented **Cloud Function** triggered by modifications within a designated bucket using (**GCP**), automating audio file processing
- Utilized **Docker** containers to encapsulate **Streamlit, FastAPI & Airflow** components, enabling simplified dependency management

Loan Default Prediction and Investment Strategies

- Performed in-depth analysis of loan using **R** programming, comparing **Decision Trees, Random Forest, and Boosted tree models** to offer actionable insights for Lending Club investors, for informed decision-making
- Executed comprehensive model evaluation techniques, **including confusion matrix analysis, ROC curves, AUC values, and Cost-Based analyses**, assessing effective approach for predicting loan status & optimizing returns on investments
- Achieved a **94%** accuracy rate for both models, resulting in improved prediction accuracy and investment performance metrics

Designing Data Warehouse and Business Intelligence for IMDB

- Integrated dataset of 80 million records from multiple sources including **SQL Server, PostgreSQL and BigQuery**, to staging and building ETL data pipelines & performed source to target mapping in **Talend Studio**
- Streamlined data cleaning, profiling, & preparation with **Alteryx**, reducing transformed data load time from **6 hours to 20 minutes**
- Crafted interactive data visualization **dashboards** & reports to gain business intelligence from IMDB data using **Qlik & Power BI**
